ANNALS OF THE NEW YORK ACADEMY OF SCIENCES

VOLUME 331

December 28, 1979

ANNALS INDEX (1975—1977)

Editors

BILL M. BOLAND AND JUSTINE CULLINAN

CONTENTS

Annals by Volume	1
Annals by Title	3
Papers by Author	5
Subject Index	103

ANNALS BY VOLUME

- 240 (1975). Recent Advances in Hemophilia. L. M. ALEDORT, *Editor and Conference Cochairman*. M. S. GILBERT AND S. I. RAPAPORT, *Conference Cochairmen*.
- 241 (1974). Hemoglobins: Comparative Molecular Biology Models for the Study of Disease. H. KITCHEN AND S. H. BOYER, *Editors and Conference Cochairmen*. J. S. CASS AND L. M. MEYER, *Conference Cochairmen*.
- 242 (1974). Properties and Functions of $(\text{Na}^+ + \text{K}^+)\text{-Activated Adenosinetriphosphatase}$. A. ASKARI, *Editor and Conference Chairman*.
- 243 (1975). Biological Actions of Dimethyl Sulfoxide. S. W. JACOB, *Editor and Conference Chairman*. R. HERSCHLER, *Editor*.
- 244 (1975). The Biological Role of Porphyrins and Related Structures. A. D. ADLER, *Editor and Conference Chairman*.
- 245 (1975). Aquatic Sciences. J. C. BAIARDI AND G. D. RUGGIERI, *Editors and Cochairmen*.
- 246 (1975). Toxicity of Vinyl Chloride-Polyvinyl Chloride. I. J. SELIKOFF AND E. C. HAMMOND, *Editors and Conference Cochairmen*.
- 247 (1975). Biologic Effects of Nonionizing Radiation. P. E. TYLER, *Editor and Conference Chairman*.
- 248 (1975). Neurophysins: Carriers of Peptide Hormones. R. WALTER, *Editor and Conference Chairman*.
- 249 (1975). Thymus Factors in Immunity. H. FRIEDMAN, *Editor and Conference Cochairman*. W. S. CEGLOWSKI, *Conference Cochairman*.
- 250 (1974). Hudson River Colloquium. O. A. ROELS, *Editor and Conference Chairman*.
- 251 (1975). Electrostatic and Electromagnetic Confinement of Plasmas and the Phenomenology of Relativistic Electron Beams. L. C. MARSHALL, *Editor and Conference Cochairman*. N. ROSTOKER, *Conference Cochairman*. H. L. SAHLIN, *Editor*.
- 252 (1975). Medical Consequences of Alcoholism. F. A. SEIXAS, *Editor and Conference Chairman*. K. WILLIAMS AND S. EGGLESTON, *Editors*.
- 253 (1975). The Biology of Cytoplasmic Microtubules. D. SOIFER, *Editor and Conference Chairman*.
- 254 (1975). Fifth International Conference on Immunofluorescence and Related Staining Techniques. W. HIJMAN AND M. SCHAEFFER, *Editors and Conference Cochairmen*.
- 255 (1975). Chemistry, Biology, and Clinical Uses of Nucleoside Analogs. A. BLOCH, *Editor and Conference Cochairman*. R. K. ROBINS AND A. MITTLEMAN, *Conference Cochairmen*.
- 256 (1975). Mechanisms of Tissue Injury with Reference to Rheumatoid Arthritis. R. J. PERPER, *Editor and Conference Cochairman*. C. M. PEARSON, *Conference Cochairman*.
- 257 (1975). Role of Magnetic Fields in Physics and Astrophysics. V. CANUTO, *Editor and Conference Chairman*.
- 258 (1975). Second Conference on Vitamin C. C. G. KING AND J. J. BURNS, *Editors and Conference Cochairmen*.
- 259 (1975). Carcinofetal Proteins: Biology and Chemistry. H. HIRAI AND E. ALPERT, *Editors and Conference Cochairmen*.
- 260 (1975). Institutions and Science Public Policy. M. LANGER AND D. K. MILLER, *Editors and Conference Coorganizers*.
- 261 (1975). Environment and Society in Transition: World Priorities. B. PREGEL, H. D. LASSWELL, AND J. MCHALE, *Editors and Conference Cochairmen*.
- 262 (1975). Seventh Texas Symposium on Relativistic Astrophysics. P. G. BERGMANN, E. J. FENYVES, AND L. MOTZ, *Editors*.
- 263 (1975). Developmental Psycholinguistics and Communication Disorders. D. AARONSON AND R. W. RIEBER, *Editors and Conference Cochairpersons*.
- 264 (1975). Carriers and Channels in Biological Systems. A. E. SHAMOO, *Editor and Conference Chairman*.
- 265 (1976). Ethical and Scientific Issues Posed by Human Uses of Molecular Genetics. M. LAPPÉ AND R. S. MORISON, *Editors and Conference Cochairmen*.
- 266 (1975). Pathobiology of Invertebrate Vectors

- of Disease. L. A. BULLA, JR. AND T. C. CHENG, *Editors and Conference Cochairmen*.
- 267 (1976). Third Conference on the Laser. L. GOLDMAN, *Editor and Conference Chairman*.
- 268 (1976). Regional Variation in Modern Greece and Cyprus: Toward a Perspective on the Ethnography of Greece. M. DIMEN AND E. FRIEDL, *Editors and Conference Coorganizers*.
- 269 (1975). Occupational Monitoring for Genetic Hazards. M. S. LEGATOR AND A. HOLLAENDER, *Editors and Workshop Organizers*.
- 270 (1976). Psychology in Progress: An Interim Report. K. SALZINGER, *Editor*.
- 271 (1976). Occupational Carcinogenesis. U. SAF-FIGOTTI AND J. K. WAGONER, *Editors and Conference Cochairmen*.
- 272 (1976). Catalytic Chemistry of Solid-State Inorganics. W. R. MOSER AND J. HAPPEL, *Editors*.
- 273 (1976). Work in Progress on Alcoholism. F. A. SEIXAS, *Editor and Conference Chairman*. S. EGGLESTON, *Editor*.
- 274 (1976). Myasthenia Gravis. D. GROB, *Editor and Conference Chairman*.
- 275 (1976). Atherogenesis. R. A. CAMERINI-DAVALOS, E. L. BIEMAN, W. REDISCH, AND D. B. ZILVERSMIT, *Editors*.
- 276 (1976). International Conference on Immunobiology of Cancer. H. FRIEDMAN AND C. SOUTHAM, *Editors and Conference Cochairmen*.
- 277 (1976). International Conference on Immunotherapy of Cancer. C. M. SOUTHAM AND H. FRIEDMAN, *Editors and Conference Cochairmen*.
- 278 (1976). Seventh International Conference on Sarcoidosis and Other Granulomatous Disorders. L. E. SILTZBACH, *Editor and Conference Chairman*.
- 279 (1976). The Glass Transition and the Nature of the Glassy State. M. GOLDSTEIN AND R. SIMHA, *Editors and Workshop Cochairmen*.
- 280 (1976). Origins and Evolution of Language and Speech. H. B. STEKLIS, S. R. HARNAD, AND J. LANCASTER, *Conference Coorganizers*.
- 281 (1976). Interactions of Drugs of Abuse. E. S. VESELL AND M. C. BRAUDE, *Editors and Conference Cochairmen*.
- 282 (1976). Chronic Cannabis Use. R. L. DORNBUSH, A. M. FREEDMAN, AND M. FINK, *Editors and Conference Cochairmen*.
- 283 (1977). The Behavior of Blood and Its Components at Interfaces. L. VROMAN AND E. F. LEONARD, *Editors and Conference Coorganizers*.
- 284 (1977). Third Conference on Antiviral Substances. E. C. HERRMANN, JR., *Editor and Conference Chairman*.
- 285 (1977). Issues in Cross-Cultural Research. L. L. ADLER, *Editor and Conference Organizer*.
- 286 (1977). Biochemical Actions of Progesterone and Progestins. E. GURPIDE, *Editor and Conference Chairman*.
- 287 (1977). The Genetic Basis of Epidemics in Agriculture. P. R. DAY, *Editor and Conference Coorganizer*. J. G. HORSFALL AND SIR O. H. FRANKEL, *Conference Coorganizers*.
- 288 (1977). Amerinds and Their Paleoenvironments in Northeastern North America. W. S. NEWMAN AND B. SALWEN, *Editors and Conference Cochairmen*.
- 289 (1977). Annals Index (1960-1974). B. M. BOLAND, *Editor*.
- 290 (1977). Tonic Functions of Sensory Systems. B. M. WENZEL AND H. P. ZEIGLER, *Editors and Conference Cochairmen*.
- 291 (1977). The Roots of American Psychology: Historical Influences and Implications for the Future. R. W. RIEBER AND K. SALZINGER, *Editors and Conference Coorganizers*. T. VERHAVE, *Conference Coorganizer*.
- 292 (1977). Comparative Perspectives on Slavery in New World Plantation Societies. V. RUBIN AND A. TUDEN, *Editors and Conference Coorganizers*.
- 293 (1977). Anthropology and the Climate of Opinion. S. A. FREED, *Editor*.
- 294 (1977). Five Decades of Weak Interactions. N. P. CHANG, *Editor and Conference Chairman*.
- 295 (1977). The Place of Transition Metals in Organic Synthesis. D. W. SLOCUM, *Editor and Conference Chairman*.
- 296 (1977). Conceptual and Investigative Approaches to Hypnosis and Hypnotic Phenomena. W. E. EDMONSTON, JR., *Editor and Conference Organizer*.
- 297 (1977). ACTH and Related Peptides: Structure, Regulation, and Action. D. T. KRIEGER AND W. F. GANONG, *Editors and Conference Coorganizers*.
- 298 (1977). Aquatic Pollutants and Biologic Effects with Emphasis on Neoplasia. H. F. KRAYBILL, C. J. DAWE, J. C. HARSHBARGER, AND R. G. TARDIFF, *Editors and Conference Cochairmen*.
- 299 (1977). Evolution and Lateralization of the Brain. S. J. DIMOND AND D. A. BLIZARD, *Editors and Conference Cochairmen*.
- 300 (1977). Food and Nutrition in Health and Disease. N. H. MOSS AND J. MAYER, *Editors and Conference Cochairmen*. R. I. HENKIN AND W. KREHL, *Associate Cochairmen*.
- 301 (1977). The Marathon: Physiological, Medical, Epidemiological, and Psychological Studies. P. MILVY, *Editor and Conference Chairman*.
- 302 (1977). Eighth Texas Symposium on Relativistic Astrophysics. M. D. PAPAGIANNIS, *Editor*.
- 303 (1977). Electrical Properties of Biological Polymers, Water, and Membranes. S. TAKASHIMA AND H. M. FISHMAN, *Editors and Conference Coorganizers*. K. S. COLE AND R. GUTTMAN, *Honorary Cochairpersons*.

ANNALS BY TITLE

- ACTH and Related Peptides: Structure, Regulation, and Action.** 297 (1977).
- Amerinds and Their Paleoenvironments in Northeastern North America.** 288 (1977).
- Annals Index (1960-1974).** 289 (1977).
- Anthropology and the Climate of Opinion.** 293 (1977).
- Aquatic Pollutants and Biologic Effects with Emphasis on Neoplasia.** 298 (1977).
- Aquatic Sciences.** 245 (1975).
- Atherogenesis.** 275 (1976).
- Behavior of Blood and Its Components at Interfaces, The.** 283 (1977).
- Biochemical Actions of Progesterone and Progestins.** 286 (1977).
- Biologic Effects of Nonionizing Radiation.** 247 (1975).
- Biological Actions of Dimethyl Sulfoxide.** 243 (1975).
- The Biological Role of Porphyrins and Related Structures.** 244 (1975).
- The Biology of Cytoplasmic Microtubules.** 253 (1975).
- Carcinofetal Proteins: Biology and Chemistry.** 259 (1975).
- Carriers and Channels in Biological Systems.** 264 (1975).
- Catalytic Chemistry of Solid-State Inorganics.** 272 (1976).
- Chemistry, Biology, and Clinical Uses of Nucleoside Analogs.** 255 (1975).
- Chronic Cannabis Use.** 282 (1976).
- Comparative Perspectives on Slavery in New World Plantation Societies.** 292 (1977).
- Conceptual and Investigative Approaches to Hypnosis and Hypnotic Phenomena.** 296 (1977).
- Developmental Psycholinguistics and Communication Disorders.** 263 (1975).
- Eighth Texas Symposium on Relativistic Astrophysics.** 302 (1977).
- Electrical Properties of Biological Polymers, Water, and Membranes.** 303 (1977).
- Electrostatic and Electromagnetic Confinement of Plasmas and the Phenomenology of Relativistic Electron Beams.** 251 (1975).
- Environment and Society in Transition: World Priorities.** 261 (1975).
- Ethical and Scientific Issues Posed by Human Uses of Molecular Genetics.** 265 (1976).
- Evolution and Lateralization of the Brain.** 299 (1977).
- Fifth International Conference on Immunofluorescence and Related Staining Techniques.** 254 (1975).

SUBJECT INDEX

- AAFC** (see 2,2'-anhydro-1- β -D-arabinofuranosyl-5-fluorocytosine)
- Abdominal motor system of hermit crab, origins of asymmetry in, 299: 43-58**
- A blood group antigen and carcinoembryonic antigen, 259: 389-403**
- Abolitionism in northeast Brazil, impact of, 292: 107-122**
- Absorption, intestinal, effects of ethanol on, 252: 228-234**
- Abstinence vs. responsible drinking in treatment of problem drinkers, 273: 488-491**
- Abstract face of sign language, 280: 514-538**
- Abuse**
 drugs of (see Drugs of abuse)
 polydrug, and maturing national drug abuse data base, **281: 311-320**
- Academic institutions, role of, and national science policy, 260: 76-83**
- Academies of Science, regional, renaissance of, 260: 114-121**
- Acceleration**
 collective effect, neutrons and radioisotopes produced by, **251: 217-233**
 collective ion
 experimental studies of, **251: 514-535**
 in relativistic electron beam deuterated polyethylene target interaction, **251: 238-272**
 theoretical models for, **251: 536-549**
 via two-stream instability, **251: 582-589**
 "Acceptors" for progesterone in avian oviduct, **286: 43-63**
- Accretion**
 physics of, and astronomy of x-ray sources, **302: 229-243**
 possibilities for, and stellar winds, **302: 665-668**
 stellar, magnetic effects in, **262: 123-132**
- Accretion disk, optical properties of, in system HZ Her, 302: 55-60**
- Acetaldehyde metabolism, effects of pyrogallol and Dopa decarboxylase inhibitor R04-4602 on, 273: 227-233**
- 4-Acetamido-4' isothiocyanato-stilbene-2,2' disulfonic acid (SITS), experiences with, 254: 65**
- Acetic acid, rhodium complex-catalyzed carbonylation of methanol to, 295: 79-82**
- Acetylcholine blockade of neuromuscular junction, 274: 46-59**
- Acetylcholine receptors**
 ability of, to bind alpha-bungarotoxin after exposure to myasthenic serum, **274: 244-253**
 and myasthenia gravis, **274: 116-129**
 antibodies to
 immunologic and electrophysiologic studies of, **274: 354-376**
 in myasthenia gravis, **274: 235-243**
 at motor end plates of normal and pathologic muscle, **274: 85-107**
 from *Electrophorus* and *Torpedo*, **274: 108-115**
 from *Torpedo californica*, purification and incorporation of, into phospholipid vesicles, **264: 175-182**
 molecular and functional properties of, **264: 183-202**
- Acetylene and coordinated olefins, 295: 160-173**
- Acetylene complexes, cobalt-carbonyl, in organic synthesis, 295: 2-14**
- Acid, ascorbic (see Ascorbic acid; see also Vitamin C)**
- Acid secretion, redox and ATP in, 264: 456-475**
- Acoustic effects induced by microwaves in mammalian auditory systems, 247: 194-218**
- Acoustic holography, medical, 267: 295-311**
- Acoustic inflow, role of, in development of adaptive behavior, 290: 270-284**
- Acridine orange photoactivation by argon laser, tumor destruction by, 267: 191-200**
- 4'-(9-Acridinylamino)-methanesulfon-*m*-aniside (SN**

- 11841), antiviral activity of, **284**: 463-471
- ACTH**
- action of, on adrenal steroidogenesis, **297**: 329-335
 - and aldosterone, **297**: 370-372
 - and central noradrenergic and dopaminergic neuron tyrosine hydroxylase, **297**: 284-294
 - and cortisol secretion in psychiatric disease, **297**: 621-627
 - and related peptides, **297**: 1-664
 - as tumor marker, **297**: 603-620
 - bioassay of, using isolated cortex cells, **297**: 220-241
 - cells containing, in rat pituitary, **297**: 183-200
 - cells of origin of
 - in man, **297**: 167-182
 - in rat pituitary, **297**: 201-204
 - cytochemical bioassay of, **297**: 242-259
 - different molecular form of, **297**: 27-48
 - effects of
 - and catecholamines, **297**: 275-283
 - on adrenal cAMP and steroid synthesis, **297**: 314-328
 - on adrenal organelles, **297**: 295-313
 - on cytochrome P450 systems of adrenal cortex, **297**: 349-360
 - introductory review of, **297**: 3-26
 - neuropeptides related to, behavioral effects of, **297**: 263-274
 - plasma levels of
 - and radioimmunoassay in diagnosis of pituitary-adrenal dysfunction, **297**: 205-219
 - circadian periodicity of, **297**: 561-567
 - in adrenalectomized rats, **297**: 498-508
 - receptors, **297**: 295-313
 - regulation of
 - clinical aspects of, **297**: 628-632
 - neural pathways in, **297**: 455-476
 - release of, in response to hemorrhage, neural control of, **297**: 477-497
 - secretion of
 - neurotransmitters involved in, **297**: 509-517
 - regulation of, **297**: 591-593
 - serotonin regulation of, **297**: 527-535
 - trophic action of, **297**: 336-348
- Activity**
- level of, after somatosensory deafferentation in monkeys, **290**: 348-365
 - physical (see Physical activity)
 - skilled, and language, **280**: 150-166

- Antibodies
and antiantibodies in human malignancy, **276**: 316-327
antitumor, conjugated to diphtheria toxin or ricin, immunotherapy of animal tumors with, **277**: 690-699
antitypus, modified through gut of louse, **266**: 6-24
as carriers of radionuclides and cytotoxic drugs in cancer, **277**: 671-689
circulating, to glomerular basement membrane, **254**: 600-602
digoxin-specific, **242**: 717-730
- Factor VIII
and immunosuppressive therapy, **240**: 389-399
characterization of, **240**: 350-361
life-threatening hemorrhage in patients with, treated by animal AHG concentrates, **240**: 362-369
- humoral, synergistic with antiviral agents in *Herpesvirus hominis* encephalitis, **284**: 321-334
in study of digitalis, **242**: 731-736
lymphocytotoxic and RNA, in inflammatory bowel disease, **278**: 574-585
preformed antidor, hepatic transplantation in patients with, **252**: 145-158
serum acetylcholine receptor, in myasthenia gravis, **274**: 235-243
to acetylcholine receptors, immunologic and electrophysiologic studies of, **274**: 354-376
to $\text{Na}^+ + \text{K}^+$ -ATPase, effects of, on reactions catalyzed by enzyme, **242**: 372-388
to parasitic agents, detected by immunofluorescence, **254**: 304-314
to T cell in sarcoidosis, **278**: 88-100
tumor-specific, cancer therapy by drugs attached to, **277**: 670
- Antibody
and kinetics of $\text{Na}^+ + \text{K}^+$ pump in goat red blood cells, **242**: 343-356
fetal IgM as, **254**: 77-93
search for, in sera from sarcoidosis patients, **278**: 220-224
- Antibody-antigen complexes in intra-articular collagenous tissues, **256**: 10-24
- Antibody-dependent cellular cytotoxicity in peripheral blood of myasthenia gravis patients, **274**: 421-433
- Antibody formation
effects of leukemia virus infections on, **276**: 411-416
in mice immunized with cholera toxin, **249**: 413-424
stimulation of, through polypeptide thymic fraction, **249**: 380-386
with enzyme markers, **254**: 175-189
- Antibody-induced inhibition of cytophilic antibody receptors, **276**: 229-242
- Antibody-induced movement of protozoan surface membrane antigens, **254**: 315-325
- Antibody method, peroxidase-labeled, **254**: 203-211
- Antibody receptors, cytophilic, antibody-induced inhibition of, **276**: 229-242
- Antibody-stimulating factor isolated from bovine thymus, **249**: 211-219
- Anticholinesterases for myasthenia gravis, **274**: 623-630
- Anticollagen sera, defined IF studies of, **254**: 614-617
- Antigen
carcinoembryonic
and concanavalin A, **259**: 366-381
structural studies of, **259**: 355-365
DNA synthetic responses to, cortisone-sensitive thymocytes in, **249**: 451-461
hepatitis B
in hepatocarcinogenesis, and α -fetoprotein, **259**: 156-167
in Nagasaki, epidemiologic study of, **259**: 239-247
high doses of, administration of, to produce serum sickness in rabbits, **254**: 603-613
syngeneic tumor, immune response to, **276**: 91-96
to Factor VIII, synthesis of, by cultured human endothelial cells, **240**: 62-69
- Antigen-antibody complexes in intra-articular collagenous tissues, **256**: 10-24
- Antigen characterization of human interferons, **284**: 703-710
- Antigen competition
effect of, on immune responses to tumors, **276**: 496-501
role of T-cell immunoglobulin in, **249**: 424-437
- Antigen evidence for inductive activity of thymopoietin on thymocyte precursors, **249**: 290-299
- Antigen expression of human leukemic blasts, **276**: 146-164
- θ -Antigen expression regulated by altering cyclic AMP level and by thymic factor, **249**:

- 316-327
- Antigenicity
loss of, and depletion of Ia alloantigens in mutant L2C leukemia, **276**: 381-385
tumor, and immunochemistry of carcinoembryonic antigen, **259**: 382-388
- Antigen markers, HL-A, in myasthenia gravis, **274**: 440-450
- Antigen recognition and *Ir* genes, **249**: 541-547
- Antigens
associated with Epstein-Barr virus, **254**: 516-522
blood group, A, B, and Lewis, and carcinoembryonic antigen, **259**: 389-403
bound to Sepharose beads, microfluorometric assays with, **254**: 137-151
cell surface, virion and virus-induced, **276**: 343-357
cellular, lost during malignant transformation, **276**: 243-253
colon carcinoma, in rat, **259**: 404-411
DNA tumor virus-induced, IF staining of, **254**: 541-550
erythrocyte surface, and cation transport, **242**: 324-342
- HL-A
and LD, in myasthenia gravis, **274**: 451-460
in thymoma patients with myasthenia gravis, **274**: 468-474
- P₁, A, and MN (T), blood group, in malignancy, **277**: 428-435
- poxvirus, detected by IF staining, **254**: 394
- surface
antibody-induced movement of, **254**: 315-325
on malignant melanoma cells detected by immunofluorescence method, **254**: 528-540
- T-cell, nature and function of, **249**: 505-522
- tissue, preservation of, in immunofluorescent antibody technique, **254**: 27-34
- to *Vibrio cholerae*, lipopolysaccharide, immune response to, and T- and B-lymphocytes, **249**: 404-412
- tumor
biologic and biochemical properties of, **276**: 11-25
dual effects of, for resistance to or enhancement of tumor growth, **276**: 106-123
immune responses to, mediated by immune RNA, **276**: 278-302
immunogenicity of, **276**: 26-44
- tumor-associated
high-sensitivity radioimmunodiffusion tests for, **276**: 75-90
humoral immune responses to, **277**: 706-707
viral and tumor, in transplantable mammary tumor systems, **276**: 358-368
- Antihemophilic factor (see also Factor VIII), immunologic methods of measuring, implications of, **240**: 97-108
- Antih herpes compounds, relative potencies of, **284**: 49-59
- Antih herpesviral activity, cell-dependent, of 5-methylarabinosylcytosine, **284**: 342-350
- Antihuman Fab conjugates in detection of tissue autoantibodies by immunofluorescence, **254**: 66-68
- Antihuman immunoglobulin in detection of tissue autoantibodies by immunofluorescence, **254**: 66-68
- Anti-influenza compounds, relative potencies of, **284**: 254-263
- Antileukemic agent, AAFC, chemical properties of, **255**: 59-70
- Antimatter-matter collision hypothesis for origin of cosmic γ -ray bursts, **262**: 197-208
- Antimitotic drugs and intra-axonal transport of neurotransmitters, **253**: 507-516
- Antineoplastic agents, potentiation of, by oral DMSO, **243**: 194-208
- Antiparasitic agents, nucleoside analogs as, **255**: 306-316
- Antiplacental ferritin antiserum for cancer diagnosis, **259**: 446-449
- Antirhinovirus compound, ICI 73602 as, **284**: 305-309
- Antisera
antivector, neutralization of togavirus by, **266**: 251-254
rabbit, preparation of, with "directed" specificities for mouse leukemia, **277**: 647-669
- Antiserum to Na⁺ + K⁺-ATPase, effects of, on ion transporting and hydrolytic activities of the enzyme, **242**: 357-371
- Antislavery novel, Cuban, portrait of slave in, **292**: 356-367
- Antisocial conduct, ethics vs. relevance in research of, **296**: 90-104
- Antithymosin globulin and recovery of T cells in antithymosin-treated mice, **249**: 499-504
- Antithymosin-treated mice, recovery of T cells in, antithymosin globulin in, **249**: 499-504
- Anti-Tj^a, anti-A, and anti-T in malignancy, **277**: 438-435
- α_1 -Antitrypsin
and α_2 -macroglobulin interacting with neutrophil collagenase and elastase, **256**: 409-419
serum, and immunoglobulin levels in lepromatous leprosy, **278**: 125-128
- Antitumor agents, nucleoside analogs as, **255**: 202-212
- Antitumor antibodies conjugated to diphtheria toxin or ricin, immunotherapy of animal tumors with, **277**: 690-699
- Antitumor cellular immune response, paralysis of, **276**: 254-259
- Antitumor drugs inhibiting oncornavirus reverse transcriptase and cellular nucleic acid polymerases, **284**: 508-524
- Antitumor effects
of ribavirin on L1210 leukemia in mouse, **284**: 585-590

- of thymic extract, and T-lymphocyte maturation, **249**: 328-334
- Antitumor immunity
activation of macrophages for, **276**: 520-528
mode of action of mycobacterial fractions in, **276**: 536-549
- Antitumor nucleoside analogs, clinical resistance to, **255**: 235-243
- Antityphus antibodies, modification of, through gut of louse, **266**: 6-24
- Antivector antisera, neutralization of togavirus by, **266**: 251-254
- Antiviral activity
and selectivity of 6-azauridine, **284**: 410-417
of 4'-(9-acridinylamino)-methanesulfonm-aniside (SN 11841), **284**: 463-471
of 9- β -D-arabinofuranosyladenine analogs, **284**: 81-90
of bleomycin, mechanism of, **284**: 367-374
of 5-iodo-2'-deoxyuridine or ribavirin, **284**: 233-238
of nucleoside analogs, biochemical basis for, **255**: 342-358
of polynucleotide mimics in viral RNA, **284**: 682-696
of trifluorothymidine, molecular mechanism of, **255**: 317-325
of vidarabine, effect of adenosine deaminase inhibitor on, **284**: 60-80
seen by development of viral resistance, **284**: 624-631
- Antiviral agents
and inhibition of replication of RNA tumor virus, **284**: 472-507
synergistic with humoral antibodies in *Herpesvirus hominis* encephalitis, **284**: 321-334
with immunopotentiating action, levamisole and inosiplex as, **284**: 139-152
- Antiviral chemotherapy
and herpes simplex viruses types 1 and 2, **284**: 594-598
cutaneous herpes simplex infection as model for, **284**: 624-631
iontophoretic application of, **284**: 604-612
- Antiviral compounds
evaluation of, and acute vs. persistent infections in cell cultures, **284**: 599-603
testing of, use of animal corneas for, **284**: 182-189
- Antiviral humoral substance as serum protective factor, **284**: 418-430
- Antiviral peptide, plant, inhibiting poliovirus replication, **284**: 431-440
- Antiviral potential of phosphonoacetic acid, **284**: 310-320
- Antiviral properties of 5-halo-5'-amino-deoxyribonucleosides, **284**: 335-341
- Antiviral substances, third conference on, **284**: 1-720
- Antivirus drug
arabinosyl- N^6 -hydroxyadenine as, **284**: 351-357
mini diagnostic laboratory as adjunct to, **284**: 122-127
- Aorta, rabbit, arteriosclerosis in, **275**: 76-77
- Aperture, contrast of dose distribution in phantom heads due to, **247**: 454-472
- Apes
cross-modal perception in, **280**: 143-149
multiple hemoglobin α -chain loci in, **241**: 39-60
- Aphasia
dissociations of language in, **280**: 868-884
linguistic competence in, **263**: 263-277
mastery of visual communication system in, **280**: 885-897
- Aphid-transmitted plant viruses, circulative, vector specificity for, **266**: 293-301
- Aplysia* ganglion cells, neuronal excitability and cholinergic transmission in, effect of DMSO on, **243**: 337-357
- Aplysia* neuron, "tonic" firing of, and slow membrane phenomena, **290**: 103-113
- Apolipoproteins and plasma lipoproteins, **275**: 169-179
- Appetite, and control of food intake, **300**: 321-334
- Aquacultural ecosystems, **245**: 26-38
- Aquatic animals
environmental carcinogenesis in, and tumor registry, **298**: 280-289
in biomedical research, **245**: 39-56
neoplasms of, **298**: 305-315
- Aquatic pollutants, **298**: 1-604
biologic effects of, **298**: 1
effects of microbial activity on, **298**: 104-110
- Aquatic sciences, **245**: 3-70
- 9- β -D-Arabinofuranosyladenine
analogs of, structure and antiviral activity of, **284**: 81-90
increased toxicity of, in presence of inhibitor of adenosine deaminase, **284**: 91-102
in inhibition of *Herpesvirus hominis* DNA synthesis, **284**: 34-48
5'-monophosphate, labeled, with increased metabolic stability, **284**: 30-33
- Arabinofuranosylcytosine (see also Cytosine arabinoside)
deaminated monophosphate nucleotide after administration of, **255**: 287-291
- Arabinosides, purine, biologic activities of, **255**: 468-480
- Arabinosylcytosine, tumor cells sensitive and resistant to, 3-deazauridine in, **255**: 501-521
- Arabinosyl- N^6 -hydroxyadenine as antiviral drug, **284**: 351-357
- Ara-C (see also Cytosine arabinoside)
and derivatives as immunosuppressive nucleoside analogs, **255**: 366-371
therapy with, **255**: 244-246
- Ara-T donor, 5-methylarabinosylcytosine as, antihersperal activity of, **284**: 342-350
- Arbovirus, tranovarially maintained, ecology of, **266**: 144-151

- Arbovirus infection
cellular resistance to, **266**: 197-203
of vertebrate and insect cell cultures, **266**:
241-250
- Archaeologic implications of geomorphologic evolution of lower Shenandoah valley, **288**:
189-193
- Archaeologic indicators of development of language capabilities, **280**: 275-288
- Archaeologic project, *Hirundo*, as interdisciplinary approach to Maine prehistory, **288**:
457-471
- Archaeologic settings related to late Quaternary paleographic changes in Middle Atlantic coast, **288**: 35-69
- Archaeologic site, Shawnee-Minisink, geological setting of, **288**: 218-222
- Archaeology in Messenia, **268**: 158-167
- Archaic
in lower Hudson, **288**: 411-430
of Lake George region, **288**: 431-438
on Long Island, **288**: 400-410
Piedmont, patterning in, **288**: 375-391
- Archaic site distributions and habitats in southern New England, **288**: 439-456
- Archaic societies in upper Susquehanna valley of New York, **288**: 392-399
- Archetypes in ideologies of sex, **285**: 618-645
- Architecture
of brain underlying language, **280**: 240-256
prehistoric, on Peruvian coast, state bureaucracies reflected in, **293**: 229-245
- Archives, Dutch, for research into slavery, **292**:
501-509
- Arene-chromium tricarbonyl complexes in organic synthesis, **295**: 59-78
- Arene-ferrocene reactions, and hydrogenation of aromatic ligands, **295**: 192-200
- Arene-metal complexes in organic synthesis, **295**:
36-51
- Argolid, southern
historical and cultural studies of, **268**: 74-91
pastoral adaptive strategies in, **268**: 275-285
- Argon laser, acridine orange photoactivation by, causing tumor destruction, **267**: 191-200
- Arid zone, water potential of, **300**: 33-39
- Ariel V
high-latitude catalogue, **302**: 361-385
recent x-ray results from, **302**: 386-402
- Aromatic hydrocarbons, metabolism of, in marine organisms, **298**: 482-496
- Aromatic ligands, hydrogenation of, during ferrocene-arene reactions, **295**: 192-200
- Arousal function of central catecholamine neurons, **270**: 45-56
- Arrhythmic response to $AY-22-241$, $Na^+ + K^+$ -ATPase activity during, **242**: 671-682
- Arsenic, inorganic, ambient level approach to, for control of occupational cancerogenic exposures, **271**: 179-186
- Arterial endothelial cells, hyperreactive, and treatment of atherosclerosis, **275**: 266-285
- Arterial smooth muscle cells in tissue culture, lipoprotein uptake and degradation by, **275**: 199-203
- Arterial tissue, atherosclerotic, cholesteryl ester metabolism in, **275**: 228-237
- Arterial wall cells in sclerogenesis, **275**: 286-301
- Arterial wall components and plasma low-density lipoproteins, **275**: 153-168
- Arteries
celiac, selective arteriography of, in thoracic sarcoidosis, **278**: 433-438
injured, healing responses of, **283**: 310-316
injury to
immunologic, in atherogenesis, **275**: 210-227
tissue lipid after, **275**: 180-198
- Arteriography, selective, of celiac artery in thoracic sarcoidosis, **278**: 433-438
- Arteriosclerosis
coronary, and exercise training, **301**: 495-508
in rabbit aorta, **275**: 76-77
- Arthritis
rheumatoid (*see* Rheumatoid arthritis)
treated by topically applied DMSO, **243**: 91-97
- Arthropathy, hemophilic, and degenerative joint diseases, **240**: 285-290
- Arthropod cells, effects of viruses on, **266**: 195-196
- Arthropods of pathogenic rickettsia, **266**: 3-5
- Articulatory movements, rhythmic, in natural speech, **263**: 236-243
- Artificial interfaces, evaluation of, with *in vivo* systems, **283**: 542-549
- Artificial organs, blood at surfaces of, **283**: 443-456
- Asbestiform mineral, gold miners exposed to, mortality among, **271**: 336-344
- Asbestos
household contact with, and risk of neoplasms, **271**: 311-323
occupational exposure to, and smoking and laryngeal carcinoma, **271**: 308-310
threshold limit values approach to, **271**: 152-169
- Asbestos fibers, exposure to, in hard-rock gold mine, **271**: 345-352
- Asbestos workers
in Tyler, Texas, program for, **271**: 353-364
prospective surveillance of, lung cancer and mesothelioma in, **271**: 448-456
- Ascidia*, search in, for beginnings of vertebrate immune responses, **266**: 334-342
- Ascites hepatoma and α -fetoprotein synthesis, **259**: 74-79
- Ascorbate, liquid chromatographic analysis of, **258**: 70-71
- Ascorbate free radical, properties of, **258**: 231-237
- Ascorbate oxidase and related copper proteins, **258**: 209-220
- Ascorbate sulfate
liquid chromatographic analysis of, **258**: 70-71
metabolism and chemistry of, **258**: 48-69
- Ascorbic acid (*see also* Vitamin C)

- activating proly hydroxylase in fibroblasts, **258**: 278-287
- and athletic performance, **258**: 458-464
- and collagen synthesis in cultured fibroblasts, **258**: 288-306
- and cytochromes, **258**: 201-208

 Athens, family in, and regional variations, **268**: 410-418
 Atherogenesis, **275**: 1-390
 macro- and micro rheology in, **275**: 10-27
 neural factors in, **275**: 117-130
 role of platelet in, **275**: 321-329
 role of triglyceride lipoproteins in, **275**: 138-144
 Atherosclerosis
 advanced, regression of, **275**: 363-378
 and vessel wall metabolism, **275**: 302-310
 immunity to, and marathon running, **301**: 561-578
 induced by dietary cholesterol, polyclonal origin of, **275**: 336-347
 occlusive, **275**: 379-385
 prevention of, by fat-modified diet, **300**: 379-382
 progression and regression of, and cAMP and cAMP phosphodiesterase, **275**: 311-320
 treatment of, and hyperreactive arterial endothelial cells, **275**: 266-285
 Atherosclerotic arterial tissue, cholesteryl ester metabolism in, **275**: 228-237
 Atherosclerotic plaques, monoclonal character of, **275**: 96-100
 Athlete's heart syndrome, **301**: 931-941
 Athletic performance and ascorbic acid, **258**: 458-464
 Atmospheric transmission of lasers, safety aspects of, **267**: 366-372
 Atomic vapors, tunable VUV light in, nonlinear generation of, **267**: 30-50
 Atoms as monitors of galactic evolution, **262**: 2-20
 ATP
 and redox in acid secretion, **264**: 456-475
 binding of
 to $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 158-167
 to progesterone receptors, **286**: 29-42
 -DPG levels
 and *in vivo* red cell glycolytic control, **241**: 513-523
 in red cells, **241**: 513-523
 effect of, on Na^+/K^+ affinity and catalytic activity of $\text{Na}^+ + \text{K}^+$ -activated enzyme system, **242**: 168-184
 membrane, and organization of red cell Na^+/K^+ pump, **242**: 459-460
 synthesis of, by $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 80-91
 ATPase
 in sarcoplasmic reticulum, tryptic fragments of, **264**: 326-334
 microsomal, effect of electromagnetic fields on, **247**: 292-300
 transport, in catalyzing oxygen exchanges, **242**: 133-138
 ATPase activity
 Na^+ -dependent, and uncoupled efflux of sodium ions from red blood cells, **242**: 461-470
 of erythrocyte membranes, effects of Ca^{2+} on, **242**: 317-323
 ouabain-inhibited, potassium-dependent, in schistosoma sporocysts, **266**: 465-479
 ATPase system, K^+ -stimulated, of microsomal membranes from gastric oxyntic cells, **242**: 255-267
 Attenuation and symbiosis in insects, **266**: 166-172
 A-type particles, intracisternal, in mouse plasma tumor cells, **243**: 172-184
 Auditory perception and speech evolution, **280**: 708-717
 Auditory receptive units, cortical feline, and behavioral states, **290**: 180-199
 Auditory systems
 mammalian, microwaves inducing auditory effects in, **247**: 194-218
 of cat, symmetrical lateralization of function in, **299**: 255-263
 Australia, fieldwork in, multidisciplinary collaboration in, **285**: 707-710
 Autoacceleration of intense relativistic electron beam, **251**: 294-311
 Autoantibodies
 production of, in thymoma patients with myasthenia gravis, **274**: 468-474
 tissue, detected by immunofluorescence, **254**: 66-68
Autographa californica, nuclear polyhedrosis virus of, and vertebrate viper cell line, **266**: 327-331
 Autoimmune disease, thymosin in treatment of, **271**: 390-401; **274**: 390-401
 Autoimmune myasthenia gravis (see Myasthenia gravis, autoimmune)
 Autoimmune system, T- and B-cell interactions in, **256**: 105-116
 Automated search for transient optical point sources, **262**: 209-213
 Automobile driving, effects of alcohol and cannabis on, **282**: 240-256
 Autonomy in sign language, **280**: 505-513
 Autopsy showing pathology of alcoholism, **273**: 385-387
 Avian myeloblastosis virus DNA polymerases, inhibition of, by anthrocycline compounds, **284**: 566-575
 Awareness (see also Consciousness)
 altered states of, control of, **296**: 162-174
 Axial cosmologies, homogeneous, with electromagnetic fields and dust, **262**: 253-274
 Axon
 giant, of squid
 activation and blockage of gating current in,

- 303: 322-338
voltage-dependent membrane capacity of, 303: 306-321
of squid, ion movements and kinetics of, 303: 355-379, 399-423
- Axonal flow in hypothalamopituitary system of rat, action of colchicine on, 253: 670-684
- Axonal transport
in sympathetic nerves, effects of colchicine and vinblastine on, 253: 528-534
participation of microtubules in, 253: 472-506
to and from motor nerve ending, 274: 31-45
- Axonemal microtubule alterations in mussels, 253: 192-212
- Axonemes, flagellar, assembly of chick-brain tubulin onto, 253: 147-177
- Axoplasmic transport, inhibition of, by colchicine, podophyllotoxin, and vinblastine, 253: 517-527
- AY-22-241, arrhythmic response to, $\text{Na}^+ + \text{K}^+$ -ATPase activity during, 242: 671-682
- Azapurine nucleosides as cytotoxic agents, synthesis of, 255: 292-305
- 6-Azauridine, antiviral activity and selectivity of, 284: 410-417
- Baboons, use of formants in grunts of, 280: 673-693
- Bacillus Calmette-Guérin
as surgical adjuvant therapy for stage II melanoma, 277: 187-194
contact immunotherapy of local and metastatic deposits of rat tumors, 277: 124-134
for head and neck cancer, 277: 339-344
in cancer immunotherapy, 277: 209-227
in Japan, 277: 160-186
in immunotherapy in malignant melanoma and breast and colorectal cancer, 277: 135-159
oral, in immunotherapy of malignant melanoma, 277: 355-366
- Bacteria
heme and chlorophyll synthesis in, 244: 334-347
photosynthetic, characterization of phototrap in, 244: 297-319
- Bacterial membrane vesicles, isolated, active transport in, 264: 350-357
- Bacteriochlorophyll, endor experiments on, 244: 239-259
- Baculovirus infections in estuarine and marine shrimp, 266: 528-536
- Baganda of Uganda, Ponzo illusion among, 285: 408-417
- Ballistic control of rhythmic articulatory movements in natural speech, 263: 236-243
- $\text{Ba}_{1-x}\text{Pb}_x\text{V}_2\text{O}_8$, palmierite series, structural inorganic chemistry of, 272: 45-60
- Barbuda, slave-breeding in, 292: 510-535
- Basal bodies, assembly of chick-brain tubulin onto, 253: 147-177
- Basophil granulocytes, human, cell surface IgE on, 254: 462-475
- Basque isolation, hematologic approach to, 293: 185-193
- Battelle Memorial Institute, laser fusion research at, 267: 126-134
- B blood group antigen and carcinoembryonic antigen, 259: 389-403
- B-cell subpopulation in sarcoidosis, 278: 80-87
- B-cell activity in peripheral blood of myasthenia gravis patients, 274: 421-433
- B-cell interactions in autoimmune system, 256: 105-116
- B-cell quantification in sarcoid lymphocytes, 278: 69-79
- B cells
distribution of, in myasthenia gravis patients, 274: 411-420
in immunity, activation of, 249: 68-88
- BCG (see *Bacillus Calmette-Guérin*)
- Beam, laser, in information scanning and recording, 267: 384-410
- Bees, distance communication in, 280: 433-442
- Beetle, cereal leaf, in North America, breeding for resistance against, 287: 230-237
- Behavior
abnormal, defining and comparing across cultures, 285: 664-675
adaptive, acoustic inflow in development of, 290: 270-284
affective, modulated by olfactory system in pigeon, 290: 314-330
and neural function, relationship between, 247: 433-439
animal, stimulus patterns in, 290: 60-71
culture and ecology, relationships among, 285: 19-31
feeding, in pigeon, and tonic and phasic effects, 290: 331-347
in interactive models for evolution of language, 280: 660-672
maternal kinesic, and cognitive development in children, 285: 389-407
mating, in male cats, and tonic and phasic effects, 290: 299-313
operant, experimental analysis of, 291: 374-385
patterning of, and tonic hypothesis, 290: 370-395
purposive, language development as, 280: 212-226
reproductive, sensory control of, in female rodents, 290: 72-97
sexual, role of progesterone in, 286: 331-354
trance, and hypnosis, 296: 194-207
- Behavioral aspects of marijuana use, 282: 186-210
- Behavioral baselines and low-level microwave radiation, 247: 425-433
- Behavioral changes in rats exposed to ethanol in utero, 273: 328-330
- Behavioral-cognitive theory and trance-state the-

- ory of hypnosis, **296**: 34-47
- Behavioral development in monkeys, and somato-sensory restriction, **290**: 285-294
- Behavioral disorders in children of alcoholic parents, **273**: 507-517
- Behavioral effects
 of drugs, interactions of, **281**: 50-63
 of neuropeptides related to ACTH, MSH, and β LPH, **297**: 263-274
 of pulsed microwave radiation, **247**: 440-453
- Behavioral methods for study of drug interactions, **281**: 64-73
- Behavioral observations of marijuana users, **282**: 72-84
- Behavioral science research on alcohol abuse and alcoholism, **273**: 555-557
- Behavioral states, and changes in cortical auditory receptive units in cats, **290**: 180-199
- Behavioral tasks, and microwave dose-response relationships, **247**: 410-416
- Behavioral therapy, role of hypnosis in, **296**: 250-263
- Benzene
 exposure to, leukemia associated with, **271**: 143-151
 halogenated, and xenobiotic metabolism, **298**: 159-169
- Benzidine and 2-naphthylamine and voluntary substitution of technological alternatives, **271**: 170-175
- Benzoyl chloride, workers exposed to, cancer in, **271**: 67-70
- Benzyrene, inhalation of, and cancer, **271**: 116-124
- Benzyl-methacrylate, immunogenicity of tumors alkylated with, **277**: 412-427
- Bering Sea, diseases of fish in, **298**: 290-304
- Beryllium disease
 chronic, in ceramic factory workers in Japan, **278**: 636-653
 differentiation of, from sarcoidosis, **278**: 654-664
- Beryllium macrophage migration inhibition test, **278**: 204-211
- Beta decay, contribution of, to understanding of weak interaction, **294**: 37-51
- Bibliography on toxicology of vinyl chloride-polyvinyl chloride, **246**: 322-337
- Bichlorinated pyrimidines, inhibition of virus multiplication by, **284**: 294-304
- Bight, Middle Atlantic, late Quaternary paleographic changes in, **288**: 35-69
- Bilayer ion permeability, function of lipid in, **264**: 2-16
- Bilayer membrane
 lipid
 as assay for ion-conductance-inducing membrane materials, **264**: 483-485
 ion transport in, electric characteristics of, **303**: 266-280
 lymphocytes and hemocyanin interacting with, **264**: 476-482
 planar, physical chemistry of, **303**: 243-265
- Bilayers
 excitable, channel gating in, **264**: 304-313
 lipid, in nonaqueous media, electric properties of, **303**: 295-297
- Bile acid metabolism, ascorbic acid in, **258**: 410-421
- Biliary duct reconstruction, reappraisal of, **252**: 145-158
- Bilirubin, enzymatic formation of, **244**: 533-552
- Bilirubin IX- α , thermal and photochemical reactions to, **244**: 553-569
- B immunocytes, stimulation of, by T-cell factor produced in leukocyte cultures, **249**: 264-277
- Binaries, x-ray
 evolutionary processes in, **302**: 14-35
 masses of, and optical light curves, **262**: 376-378
 parameters of, **262**: 299-311
 related to non-x-ray sources, **302**: 1-5
- Binary sources, x-ray polarimetry of, **262**: 367-375
- Binary star evolution, mass transfer effects in, **302**: 36-46
- Binary systems
 close, x-ray emission processes in, **302**: 6-13
 discovery of pulsar in, **262**: 490-492
 gravitational radiation damping and energy loss in, **302**: 557-564
 x-ray, OB supergiants in, **262**: 379-384
- Binding
 hormone-neurophysin, **248**: 494-512
 of β -galactosides to *Lac* carrier protein, **264**: 350-357
 progesterone
 in fetal membranes, **286**: 304-312
 in liver and thymus, **286**: 355-368
- Binding properties in immunohistochemistry, and rhodamine conjugates, **254**: 35-54
- Binding proteins and membrane transport, **264**: 358-372
- Binding reaction, protein-ligand, kinetics of, **303**: 47-56
- Binding sites, nuclear, for progesterone in avian oviduct, **286**: 43-63
- Bioassays
 carcinogenicity
 of vinyl chloride, **246**: 195-218
 predictive value of, **271**: 431-443
 cytochemical, of corticotropin, **297**: 242-259
 of ACTH using isolated cortex cells, **297**: 220-241
- Biochemical adaptations to endurance exercise, physiologic consequences of, **301**: 440-450
- Biochemical aspects of degenerative joint diseases and hemophilic arthropathy, **240**: 285-290
- Bioogenic amines, and respiratory and analgesic actions of ethanol and other narcotics, **273**: 256-262

- Biologic matter, field interaction with, **303**: 198-213
- Biologic systems, single-cell, effects of nonionizing electromagnetic radiation on, **247**: 352-366
- Biology, coherent and quasi-coherent optical methods in, **267**: 216-229
- Biomaterials
and blood, **283**: 2-5
in contact with blood, *ex vivo* evaluation of, **283**: 494-523
in vitro evaluation of, **283**: 473-476
in spinning disc apparatus, **283**: 457-472
research in, future direction of, **283**: 332-355
- Biomechanical approach to running injuries, **301**: 888-899
- Biomechanical comparisons
of elite and good distance runners, **301**: 328-345
of male and female distance runners, **301**: 793-807
- Biomechanics of speech sounds, **280**: 631-642
- Biomedical research, aquatic animals in, **245**: 39-56
- Biomembranes (*see also* Membranes)
lipid-protein interactions in, **264**: 142-160
- Biomolecules
dielectric relaxation of, real-time measurement of, **303**: 47-56
of arbitrary shape, polarizability density and charge distribution, Poisson equation for, **303**: 22-37
- Biomphalaria glabrata*
effects of *Schistosoma mansoni* on, **266**: 380-393
fine structure of encapsulation in, **266**: 446-464
heavy metal toxicity to, **266**: 437-444
microsporidian parasite of, **266**: 513-527
neoplasms and tumor-like growths in, **266**: 411-425
pathologic conditions and susceptibility to infection in, **266**: 394-410
- Biopolymers, chemical transition of, induced by electric field, **303**: 190-197
- Biopsy
fine-needle aspiration, of spleen in diagnosis of sarcoidosis, **278**: 517-521
flexible-bronchoscope, of lung and bronchial wall in intrathoracic sarcoidosis, **278**: 522-527
guided hepatic, showing unusual splenomegaly liver disease in PVC production workers, **246**: 95-134
- Biorefractories in drinking water and body burden, **298**: 547-556
- Biosynthesis
ascorbic acid, in plants, **258**: 7-23
collagen, by endothelial cells in culture, **275**: 104-113
 α -fetoprotein, albumin, hemopexin, and haptoglobin, and growth state of hepatocyte cultures, **259**: 45-58
globin chain
and hemoglobin Ann Arbor, **241**: 232-241
disturbances in, **241**: 232-241
heme, in red cells, effect of lead and genetic factors on, **244**: 419-440
hemoglobin
and immunologic purification of hemoglobin-chain synthesizing polysomes, **241**: 204-222
regulatory and evolutionary interrelationships in, **241**: 204-222
neurophysin, in guinea pig, **248**: 36-45
nucleoside analog and minimycin formation, **255**: 390-401
nucleoside antibiotic, **255**: 390-401
peptide, related to corticotropins and β -melanotropins, **297**: 49-62
porphyrin
drug-induced, **244**: 472-480
later stages of, **244**: 591-602
uroporphyrinogen, mechanism of, **244**: 371-395
vitamin B₁₂, **244**: 356-370
- Birefringence
effect on, of chemical transitions of biopolymers induced by electric field, **303**: 190-197
of DNA, chromatic, and their complexes, **303**: 170-189
- Bis (chloromethyl) ether, cytologic observations and cancer incidence after exposure to, **271**: 71-80
- Bivalve mollusks from Oregon estuaries, neoplastic disease in, **298**: 356-373
- Black body radiation from incipient black hole, **262**: 296-297
- Black holes
and gravitational waves, **262**: 275-283
and unpredictability, **302**: 158-160
attrition of, **262**: 95-112
evaporation of, and particle detectors, **302**: 186-190
incipient, black body radiation from, **262**: 296-297
thermodynamics of, **302**: 161-165
torque and momentum transfer in accreting, **262**: 113-122
white hot, **262**: 289-291
with gravitational radiation, **302**: 569-604
- Black-light frequencies showing genetic continuity and metabolic regulation, **247**: 327-351
- Black lipid membranes, channels along, **303**: 281-291
- Bladder
cancer of, treatment of, **277**: 239-240
carcinoma of, ascorbic acid in prevention of, **258**: 432-437
- Blastogenic reactions with viral and tumor antigens in transplantable mammary tumor systems, **276**: 358-368
- Blasts, leukemic, antigen expression and cell surface properties of, **276**: 146-164
- Bleomycin, antiviral action of, mechanism of, **284**: 367-374

- Block, neuromuscular, in myasthenia gravis, **274**: 143-173
 immune factors in, **274**: 493-515
- Blockade, acetylcholine, of neuromuscular junction, **274**: 46-59
- Blockage, chemical, of gating current in squid giant axon, **303**: 322-338
- Blood
 and biomaterials, **283**: 2-5
 and its components
 behavior of, at interfaces, **283**: 1-560
 interacting at hydrogel interfaces, **283**: 372-382
 at artificial organ surfaces, **283**: 443-456
 biomaterials in contact with, *ex vivo* evaluation of, **283**: 494-523
 concentration of alcohol in, and desire to drink, **273**: 360-363
 derivatives and problems of
 with respect to Factor VIII, **240**: 165-171
 with respect to Factor IX, **240**: 172-180
 detection of mutagenic substances in, **269**: 16-20
 formed elements of
 incorporation of analog purine nucleosides into, **255**: 412-434
 reacting with plasma proteins at interfaces, **283**: 65-76
 in dissemination of polyvinyl chloride particles, **246**: 164-171
 interacting with hydrophobic polymer surfaces, **283**: 356-371
 materials affecting behavior of, at surfaces, **283**: 6-16
 peripheral
 of myasthenia gravis patients, T- and B-cell activity in, **274**: 421-433
 of sarcoidosis patients, T- and K-cell activity in, **278**: 52-68
 T cells in, effect of thymosin on, **249**: 300-307
- Blood chemistry and lipid profiles of elite distance runners, **301**: 346-360
- Blood coagulation factors at phospholipid surfaces, **283**: 104-110
- Blood components
 and blood interacting at hydrogel interfaces, **283**: 372-382
 organization of, near interfaces, **283**: 17-36
- Blood elements at foreign surfaces, **283**: 256-269, 457-472
 and adsorption of plasma proteins, **283**: 37-49
- Blood flow
 conditions of, at interfaces with flexible vessel walls, **275**: 2-9
 myocardial, during exercise, **301**: 213-223
- Blood-forming system, microwave effect on, **247**: 232-242
- Blood group antigens
 A, B and Lewis, and carcinoembryonic antigen, **259**: 389-403
 P₁, A, and MN (T) in malignancy, and anti-Tj^a, anti-A, and anti-T, **277**: 428-435
- Blood interface, cell-lined, nonwoven microfiber scaffolds at, **283**: 419-437
- Blood latex-ingesting cells in myasthenia gravis patients, **274**: 411-420
- Blood lymphocytes
 immunoglobulin determinants on, in children and fetal tissue, **254**: 262-279
 peripheral, in sarcoidosis, **278**: 101-107
- Blood plasma, trace metal content of, effect of thermal and radio-frequency exposure on, **247**: 282-291
- Blood resources, demand of hemophilic on, magnitude of problem of, **240**: 155-161
- Blood screening tests, epidemiologic study of, in workers exposed to PVC, **246**: 80-87
- Blood shear rate and platelet deposition on subendothelium, **283**: 284-292
- Blood-transmitted hepatitis, **240**: 191-200
- Blood vessels
 luminal surface of, adhesions of leukocytes, erythrocytes and noncellular material to, **283**: 179-207
 of hypertensive rats, increased collagen formation in, **275**: 101-103
- Blood volume, pulmonary capillary, in pulmonary sarcoidosis, **278**: 284-291
- B lymphocytes
 and cutaneous anergy in inflammatory bowel disease, **278**: 565-573
 and immune response to exotoxin and antigens of *Vibrio cholerae*, **249**: 404-412
 chemotactic lymphokine production by, **256**: 375-385
 in dermatitis, **254**: 592-599
- Body burden and biofactories in drinking water, **298**: 547-556
- Body composition of elite distance runners, **301**: 361-370
- Body fluids, effects of sweating on, **301**: 160-174
- Body morphology and capacity for hypnosis, **296**: 105-118
- Body physique and composition of female distance runner, **301**: 764-776
- Body temperature and ethanol and serotonin metabolism, **273**: 247-255
- Bohr effect, alkaline, of human hemoglobin, **241**: 465-471
- Bone
 destruction of, role of lymphocytes and macrophages in, **256**: 132-140
 lesions of, among PVC production workers in Japan, **246**: 78-79
 sarcoidosis of, **278**: 475-487
- Bone marrow, thalassemic, globin translation in, **241**: 253-261
- Bone marrow cells
 differentiation of into T-lymphocytes, effect of thymic factors on, **249**: 335-342
 treated with thymic factor, θ -bearing T-cells from, **249**: 54-60
- Bone marrow chromatin, human, cell-free transcription of, **241**: 263-273

- Bone marrow lymphocytes, immunoglobulin determinants on, in children and fetal tissue, **254**: 262-279
- Borohydride reduction method characterizing acyl phosphate in transport ATPases, **242**: 77-79
- Boston City Hospital, prospective study of fetal alcohol syndrome at, **273**: 118-129
- Bowel disease, inflammatory
 lymphocytotoxic and RNA antibodies in, **278**: 574-585
 T and B lymphocytes and cutaneous anergy in, **278**: 565-573
 tissue homogenates from patients with, in induction of granulomas, **278**: 560-564
- Brain
 alcohol-membrane interaction in, reversibility of, **273**: 295-302
 and vocal tract, and search for evolutionary bottlenecks, **280**: 643-649
 architecture and mechanisms of, underlying language, **280**: 240-256
 asymmetry of
 evolution of, **299**: 213-221
 historical perspective on, **299**: 4-17
 -damaged patients, memory disorders in, role of language in, **280**: 857-867
 development of, after early malnutrition, **300**: 262-265
 electrical activity in, and inhalation of hashish, marijuana, and cannabis, **282**: 387-398
 evolutionary origin of, **299**: 23-25
 and development of self-conscious mind, **299**: 161-179
 and lateralization of, **299**: 477-501
 anthropological perspective on, **299**: 424-447
 and locomotion in gastropod molluscs, **299**: 26-34
 functional deficits of, and chronic cannabis use, **282**: 323-343
 human, lateralization of, **299**: 412-414
 infant, pre-language and functional asymmetry of, **299**: 370-379
 in vertebrates, origin of, **299**: 74-86
 lateralization of, **299**: 273-280
 left, early injury to, and lateralization of cerebral speech, **299**: 355-369
 mammalian, and adaptive advantage of cerebral asymmetry, **299**: 264-272
 $\text{Na}^+ + \text{K}^+$ -activated ATPase in
 effect of ethanol on, **273**: 331-337
 reconstitution of active transport by, **264**: 387-397
 neurophysin-secreting pathways in, studied by light microscopy, **248**: 92-111
 novel peptides originating in, with opiate-like activity, **297**: 131-157
 of cats, effects of electromagnetic radiation on, **247**: 63-73
 of lamprey in comparative perspective, **299**: 97-145
- opioid peptides in, **297**: 108-114
 organization of, **299**: 415-423
 primitive forms of, early and Recent, **299**: 87-96
 porcine, purification of tubulin and high-molecular-weight proteins from, **253**: 107-132
 programming activity of, embryonic determination of, **299**: 306-308
- Brazil
 introduction of coffee rust into, **287**: 57-71
 Kuikuru Indians of, shamanism and witchcraft among, **293**: 215-228
 Northeast, abolitionism in, **292**: 107-122
 slaveholding society in, **292**: 311-342
- Breast cancer
 bacillus Calmette-Guérin in immunotherapy of, **277**: 135-159
 receptors in, **286**: 87-89
 role of progesterone in, **286**: 90-100
- Breast cancer cells, receptor in, progesterone and glucocorticoid interaction with, **286**: 101-115

- synthesis of albumin during, and α -fetoprotein, **259**: 37-44
- tubulin expression through, **253**: 292-303
- Cell density related to sodium and potassium change in red cells, **242**: 693-703
- Cell-dependent antitherpesviral activity of 5-methylarabinosylcytosine, **284**: 342-350
- Cell-derived inhibitors of human neutrophil chemotaxis, **256**: 210-221
- Cell differentiation
- branched-chain amino acid transaminase during, **259**: 347-354
- in *Naegleria*, flagellar tubulin synthesis during, **253**: 318-332
- Cell-free synthesis of globin chains, **241**: 142-155
- Cell-free transcription of human bone marrow chromatin, **241**: 262-273
- Cell function in cultures irradiated *in vitro*, effect of microwaves on, **247**: 263-274
- Cell line
- cabbage looper, nuclear polyhedrosis virus of alfalfa looper in, **266**: 302-326
- vertebrate viper, and nuclear polyhedrosis virus of *Autographa californica*, **266**: 327-331
- Cell-lined nonwoven microfiber scaffolds at blood interface, **283**: 419-437
- Cell-mediated immunity
- in autochthonous tumor rejection, **276**: 188-206
- in herpes virus patients treated with inosiplex, **284**: 190-196
- modulation of, by x-rays, **256**: 342-351
- to mouse tumors, **276**: 176-187
- Cell membrane models, effects of cannabinoids and CNS depressants on, **281**: 151-161
- Cell migration, measurement of, with HeNe laser, **267**: 152-159
- Cell populations, analysis of, with fluorescence-activated cell sorter, **254**: 163-171
- Cell sorter, fluorescence-activated, in analysis of cell populations, **254**: 163-171
- Cell surface, action of digoxin at, **242**: 703-707
- Cell surface antigens, virion and virus-induced, **276**: 343-357
- Cell surface fluidity, and microtubules, **253**: 445-454
- Cell surface IgE on human basophil granulocytes, **254**: 462-475
- Cell surface properties of human leukemic blasts, **276**: 146-164
- Cell surface receptor binding and endocytosis of low-density lipoprotein, **275**: 244-257
- Cell systems
- DMSO in, radioprotective and cryoprotective properties of, **243**: 246-256
- embryo, effects of microwave radiation on, **247**: 401-407
- monoamine, immunohistochemistry in study of, **254**: 407-432
- Cell types, chemotaxis of, to connective tissue degradation products, **256**: 177-189
- Cell ultrastructure, influence of DMSO on, **243**: 122-138
- Cell wall skeleton of *Mycobacterium bovis*-bacillus Calmette-Guérin, immunotherapy of cancer with, **277**: 209-227
- Cells (see also specific cells)
- ACTH-containing, in rat pituitary, **297**: 183-200
- animal
- amino acid transport in, **264**: 428-441
- utilization of nucleotides by, **255**: 269-286
- arterial smooth muscle, in tissue culture, lipoprotein uptake and degradation by, **275**: 199-203
- arterial wall, in sclerogenesis, **275**: 286-301
- arthropod and vertebrate, effects of viruses on, **266**: 195-196
- B and T, quantification of, in sarcoid lymphocytes, **278**: 69-79
- blood latex-ingesting, T and B, in myasthenia gravis patients, **274**: 411-420
- bone-marrow, differentiated into T lymphocytes, **249**: 335-342
- breast cancer, receptor in, progesterone and glucocorticoid interaction with, **286**: 101-115
- cancer, placental alkaline phosphatase in, **259**: 261-272
- cultured, α -fetoprotein synthesis in, **259**: 74-79
- cultured human endothelial, in synthesis of Factor VIII antigen, **240**: 62-69
- elongation of, in lens, and microtubules, **253**: 333-347
- endothelial, biosynthesis of collagen and metabolism of lipids by, **275**: 104-113
- epithelioid and giant, and sarcoidosis, **278**: 3-6
- α -fetoprotein-producing
- in experimental liver cancer, **259**: 217-220
- in hepatitis and liver cirrhosis, **259**: 253-258
- FL amnion, isozyme from, compared with Kasahara isozyme, **259**: 337-346
- hemopoietic stem, effects of tumor virus on, **276**: 442-454
- hepatoma, α -fetoprotein synthesis in, **259**: 211-216
- hyperreactive arterial endothelial, and treatment of atherosclerosis, **275**: 266-285
- IgM-secreting, necessity for T-cells in induction of, **249**: 477-484
- immunocyte precursor, effects of tumor virus on, **276**: 442-454
- immunologically reactive, stimulatory effect of methanol extraction residue on, **276**: 536-549
- inflammatory, in destruction of synovial tissues, **256**: 288

- in invertebrates, multiple viral infections of, **266**: 232-240
- in vitro* cultivation of, and microsporidian parasite of *Biomphalaria glabrata*, **266**: 513-527
- isolated adrenal, ascorbic acid in, and steroidogenesis, **258**: 422-432
- isolated cortex, bioassay of ACTH using, **297**: 220-241
- Langerhans', and lung interstitium, **278**: 599-611
- leukemic, and resistance to cytosine arabinoside, **255**: 247-251
- linear electrical properties of, **303**: 342-354
- liver and epithelial, smooth muscle contractile protein antigens in, **254**: 489-504
- mammalian, laser flow microphotometry for analysis and sorting of, **267**: 176-190
- marrow-dependent, and genetic resistance to immune suppression by Friend leukemia virus, **276**: 217-228
- mononuclear, immunologic identification of subpopulations of, in sarcoid granulomas, **278**: 136-146
- muscle, in chronic alcoholism, **252**: 274-286
- of origin of ACTH
- in man, **297**: 167-182
- in rat pituitary, **297**: 201-204
- Peyer's patch lymphoid, intestinal, **278**: 539-545
- preparation of, for immunohistochemical processing, **254**: 21-26
- rat ascites hepatoma, synthesis of α -fetoprotein by, **259**: 29-36
- significance of heme binding in, **244**: 651-661
- suppressor T, as regulators of lymphocyte function, **256**: 365-374
- synovial, activation of, induced by polypeptide mediator, **256**: 304-317
- T and B, interacting in autoimmune system, **256**: 105-116
- T and K, in peripheral blood of sarcoidosis patients, **278**: 52-68
- thymus-derived leukemic, differentiation of, **249**: 484-491
- T rosette-forming, related to cellular immunity in sarcoidosis, **278**: 108-116
- tumor
- irradiated, in immunotherapy of malignant melanoma, **277**: 355-366
- lymphocytes sensitized against, **276**: 165-175
- macrophage-mediated cytotoxicity of, **276**: 134-145
- modified, immunogenicity of, **276**: 61-74
- modified to increase immunogenicity, **276**: 45-60
- neuraminidase-treated, as immunogen in leukemia, **277**: 313-331
- syngeneic, as escape mechanism from immune surveillance, **276**: 455-465
- virus-modified, in immunotherapy of osteosarcoma patients, **277**: 396-411
- Cellular antigens, loss of, during malignant transformation, **276**: 243-253
- Cellular cytotoxicity, antibody-dependent, in peripheral blood of myasthenia gravis patients, **274**: 421-433
- Cellular hypersensitivity, tumor-directed, in patients with renal carcinoma, **276**: 260-271
- Cellular immune factors in neuromuscular block of myasthenia gravis, **274**: 493-515
- Cellular immune response, antitumor, paralysis of, **276**: 254-259
- Cellular immunity
- effects of leukemia virus infections on, **276**: 411-416
- in sarcoidosis, T rosette-forming cells related to, **278**: 108-116
- Cellular immunology, "signal theory" in, **249**: 27-33
- Cellular interactions controlling immune reactivity of T lymphocytes, **249**: 106-115
- Cellular metabolism, interference of ethanol in, **252**: 11-20, 24-50
- Cellular nucleic acid polymerases, inhibition of, by antitumor drugs, **284**: 508-524
- Cellular resistance to arbovirus infection, **266**: 197-203
- Cellular responses
- in experimental autoimmune myasthenia gravis, **274**: 283-299
- of heart to ethanol, **252**: 250-263
- Center of Alcohol Studies, research carried out by, **273**: 81-86
- Central nervous system
- correlates, and sensory discrimination, **299**: 244-254
- depressants, effects of, on cell membrane models, **281**: 151-161
- effects of modulated vhf fields on, **247**: 74-81
- in weighting of factors governing reward, **290**: 158-179
- of insect, **299**: 59-71
- role of progesterone in, **286**: 331-354
- trauma to, DMSO in, **243**: 362-389
- Cen X-3 revisited, **262**: 312-330
- Ceramic factory workers in Japan, chronic beryllium disease in, **278**: 636-653
- Cereal leaf beetle in North America, breeding for resistance against, **287**: 230-237
- Cerebral asymmetry
- adaptive advantage of, **299**: 264-272
- and holistic vs. analytic processes, **263**: 251-262
- changes in factors affecting development of, **280**: 821-833
- morphologic, of modern man, fossil man, and nonhuman primate, **280**: 349-366
- Cerebral calcium levels, selective action of alcohols on, **273**: 280-294
- Cerebral dominance
- in monkeys, search for, **280**: 732-744
- ontogeny of, **263**: 244-250
- Cerebral speech, lateralization of, and early left-brain injury, **299**: 355-369

- Cerebral states, modulation of, and the sensorium, **290**: 396-420
- cGMP and cAMP, reciprocal effects of, on microtubule-dependent release of lysosomal enzymes, **253**: 750-762
- α Chain in mammary gland of rabbit localized by immunoelectron microscopy, **254**: 190-202
- Champlain Sea
and Quaternary deposits in St. Lawrence lowland, **288**: 498-507
marine mammals in, **288**: 508-537
- Chance, Darwinian idea of, **291**: 233-245
- Change, orientation to, in advanced and developing societies, **285**: 565-581
- Channel gating in excitable bilayers, mechanism for, **264**: 304-313
- Channel precursors, voltage-induced aggregation of, membrane excitation through, **264**: 247-264
- Channel properties and noise analysis in membranes, **303**: 382-388
- Channels (*see also* Carriers and channels)
along black lipid membranes, **303**: 281-291
- Charge distribution of biomolecules, Poisson equation for, **303**: 22-37
- Chemical blockage of gating current in squid giant axon, **303**: 322-338
- Chemical carcinogenesis
and natural modified nucleosides, **255**: 564-566
introductory remarks about, **271**: 39
- Chemical carcinogens, hepatic disposition of, effect of DMSO on, **243**: 185-193
- Chemical correlations between α -fetoproteins in man and mammals, **259**: 109-118
- Chemical groups, specific, controlling ionic conductance in nerve, **264**: 293-303
- Chemically active substituents, materials with, **283**: 396-403
- Chemical mutagens, potential environmental, detected by *Drosophila*, **269**: 26-33
- Chemical pollutants
interacting with virus in crustacean, **298**: 497-504
related to diseases in fish, **298**: 535-546
- Chemical transition of biopolymers induced by electric field, **303**: 190-197
- Chemicals
carcinogenic risk of, IARC program to evaluate, **271**: 396-409
industrial organic, through utilization of synthesis gas, **295**: 239-248
- Chemistry
blood, in elite distance runners, **301**: 346-360
defect, and catalysis in oxidation and reduction over perovskite-type oxides, **272**: 3-21
of peroxidase intermediates, **244**: 80-93
of soluble and membrane-bound cytochrome P-450, **244**: 107-131
organic, and the laser, **267**: 201-215
physical, of planar bilayer membranes, **303**: 243-265
structural inorganic, of palmierite series $\text{Ba}_{1-x}\text{Pb}_x\text{V}_2\text{O}_6$ and its application to catalysis, **272**: 45-60
- Chemoception in Wistar rat, tonic processes in, **290**: 226-269
- Chemoimmunotherapy
adoptive
of cancer in animals, **277**: 492-504
of murine leukemia, **276**: 573-583
of syngeneic mouse mammary carcinomas with methanol extraction residue, **277**: 195-208
- Chemotactic lymphokine production by T and B lymphocytes, corticosteroid inhibition of, **256**: 375-385
- Chemotaxis
leukocyte, in human disease, abnormalities of, **256**: 386-410
neutrophil, plasma and cell-derived inhibitors of, **256**: 210-221
of cell types to connective tissue degradation products, **256**: 177-189
of rat leukocyte, pharmacologic alterations of, **256**: 190-209
- Chemotherapeutic activity of nucleosides related to pyrrolo [2,3-d]pyrimidine nucleoside, **255**: 91-103
- Chemotherapeutic agents
antiviral, iontophoretic application of, **284**: 604-612
cytokinins as, **255**: 225-234
inhibiting viral DNA synthesis, **284**: 396-409
- Chemotherapy
antiviral
and herpes simplex viruses types 1 and 2, **284**: 594-598
cutaneous herpes simplex infection as model for, **284**: 624-631
combination, vs. transfer factor in osteogenic sarcoma, **277**: 558-574
intratumoral, inducing tumor immunity, **276**: 565-572
of picornavirus infections, equestron as Achilles' heel for, **284**: 638-649
with neuraminidase-treated tumor vaccine and bacillus Calmette-Guérin for head and neck cancer, **277**: 339-344
- Chessboard titrations compared with IgG polymer particles, **254**: 551-558
- Chiggers (*see also* Mites, trombiculid)
acquisition of *R. tsutsugamushi* by, during feeding process, **266**: 91-114
- Child language, and origins of language, **280**: 170-172
- Child-molester and alcoholism, **273**: 492-496
- Child-mother dyad, vocalizing in unison and alternation in, **263**: 89-100
- Children (*see also* Pediatric entries)
cognitive development in, and maternal kinesic

- behavior, **285**: 389-407
- communicative competence of, **280**: 592-597
- development of, and effects of maternal drinking, **273**: 115-117
- development of language and reasoning in, and mathematical linguistics, **280**: 120-126
- drawings of, cross-cultural measurement of variations in, **285**: 227-281
- education of, for environmental and "social" awareness, **261**: 250-252
- hemophilic (see Hemophiliacs)
- in remission from acute leukemia, immunization of, with "living" mixed leukoblast vaccine, **277**: 384-395
- intrathoracic sarcoidosis in, **278**: 532-538
- Jewish and Druze, person perception and social interaction of, **285**: 338-354
- language-impaired, linguistics vs. cognition in, **263**: 59-69
- language of, semantics and syntax of, **280**: 227-237
- Navajo, respiratory illness in, vitamin C for, **258**: 513-522
- prepubertal, work capacity in, effects of endurance training regimen on, **301**: 734-747
- preschool, communicative speech of, **263**: 114-131
- profoundly deaf, nature of language in, **263**: 70-75
- with alcoholic parents, behavioral disorders in, **273**: 507-517
- with fetal alcohol syndrome, psychologic handicaps in, **273**: 140-145
- young, feeding practices in, **300**: 197-209
- Chimpanzee
- acquisition of language-type skills in, **270**: 90-123
- and language evolution, **280**: 598-603
- communicative competence of, **280**: 592-597
- mastery of language-type skills by, **280**: 562-578
- study of language in, **280**: 579-588
- Chlordiazepoxide, long-term use of, in alcoholism, **273**: 381-384
- Chloride bicarbonate exchange mechanism in gastric mucosa, **264**: 442-455
- Chloroethers, laboratory and epidemiologic studies of, **271**: 81-90
- Chloroform, differential toxicity of, in mouse, **298**: 170-176
- Chloroperoxidase, halogenating agent of, model for, **244**: 94-106
- Chlorophylls
- antenna and reaction center, **244**: 260-280
- dimers, interaction of, with lutein, **244**: 320-326
- endor experiments on, **244**: 239-259
- molecular orbital theory of, **244**: 204-213
- plant, and associated proteins, **244**: 281-296
- synthesis of, in bacteria, **244**: 334-347
- Chloroprene, risk of cancer in workers exposed to, **271**: 91-93
- Chlorpromazine free radical and related compounds, interaction of Na^+ + K^+ -ATPase with, **242**: 527-542
- Cholera toxin
- effect of, on adrenal cAMP and steroid synthesis, **297**: 314-328
- mice immunized with, and stimulation of cAMP levels and modulation of antibody formation, **249**: 413-424
- Cholesterol
- dietary, inducing atherosclerosis, **275**: 336-347
- metabolism of, ascorbic acid in, **258**: 410-421
- Cholesteryl ester metabolism in atherosclerotic arterial tissue, **275**: 228-237
- Choline oxidation, and acute and chronic effects of ethanol ingestion, **273**: 194-204
- Cholinergic nerves, intra-axonal transport of neurotransmitters in, **253**: 507-516
- Cholinergic receptor desensitization, **274**: 130-139
- Cholinergic transmission, effect of DMSO on, in *Aplysia* ganglion cells, **243**: 337-357
- Christmas factor (see also Factor IX)
- properties of, **240**: 34-42
- Chromatin
- bone marrow, cell-free transcription of, **241**: 262-273
- electric dichroism and birefringence of, **303**: 170-189
- structure of ovalbumin gene in, **286**: 135-146
- Chromatography
- affinity, tubulin prepared by, **253**: 260-271
- liquid, in analysis of ascorbate, **258**: 70-71
- Chromatophores, teleost, microtubule-dependent movement of pigment granules in, **253**: 692-701
- Chromium, protein film on, ellipsometric study of, **283**: 77-85
- Chromium tricarbonyl-arene complexes in organic synthesis, **295**: 59-78
- Chromosomes
- movement of, role of spindle microtubules in, **253**: 383-406
- of lemuriformes, **293**: 125-159
- Cigarette smokers, and vitamin C, **258**: 156-168
- Ciliary inhibition in mussels, **253**: 192-212
- Circadian periodicity of plasma ACTH levels, **297**: 561-567
- Circadian rhythms, entrainment of, tonic and phasic effects of light on, **290**: 51-59
- Circulation
- central, during prolonged exercise, **301**: 189-194
- in Hudson estuary, **250**: 39-111
- skin, regulated during prolonged exercise, **301**: 195-212
- Cirrhosis of liver
- and alcohol, **252**: 63-84
- clinical significance of α -fetoprotein in, **259**: 234-238
- α -fetoprotein-producing cells in, **259**: 253-258
- hemagglutination and radioimmunoassay in study of, **259**: 196-210

- Laennec's, and increased susceptibility to infection, **252**: 348-352
- related to volume of alcohol abuse, **252**: 85-105
- Cistrons, multiple, for fetal hemoglobin in man, **241**: 70-79
- Clams, soft-shell
- neoplasms in, **298**: 409-426
- in New England, **298**: 522-534
- Class
- distribution of, among Greek students, **268**: 385-394
- jogging, physiologic profile of, **301**: 550-560
- relevance of concept of, to study of modern Greek society, **268**: 395-409
- Climatic changes, how and why of, **300**: 40-53
- Climatic terms, calibration of micropaleontological data in, **288**: 93-118
- Clotting, effect of, on structure and function of human Factor VIII, **240**: 79-83
- Clouds, interstellar, encounters with, **302**: 665-668
- Club of Rome, report of, **300**: 228-238
- Clusters, x-ray globular, optical observations of, **302**: 248-260
- Coagulation factors
- at phospholipid surfaces, **283**: 104-110
- role of surface in activation of, **283**: 88-92
- Coastal environment of Delaware, late Quaternary paleographic changes in, **288**: 35-69
- Coastal North America, northeastern, late Quaternary environments in, **288**: 90-92
- Cobalt-carbonyl acetylene complexes, use of, in organic synthesis, **295**: 2-14
- Cocaine, interactions of, with amphetamine and lithium, **281**: 441-455
- Cochlea and action of Corti's organ, **247**: 219-231
- Coding, linguistic, covert oral behavior in, **270**: 57-89
- Coercive power of hypnosis, research into, **296**: 86-89
- Coffee rust, introduction of, into Brazil, **287**: 57-71
- Cognition in cross-cultural research, **285**: 505-513
- Cognitive ability and handedness, **299**: 233-243
- Cognitive-behavioral theory and trance-state theory of hypnosis, **296**: 34-47
- Cognitive development
- cross-cultural, and Piaget's theory, **285**: 332-337
- in child and maternal kinesic behavior, **285**: 389-407
- study in, **285**: 374-388
- Cognitive function, evolution of, **280**: 810-820
- Cognitive impairment in language-impaired child, **263**: 59-69
- Cognitive organization in man and animals, **280**: 131-142
- Cognitive performance in hashish users, effects of cannabis on, **282**: 313-322
- Cognitive research, cross-cultural, developmental theories applied to, **285**: 366-373
- Cognitive-state theory based on laterality, **296**: 274-283
- Coherent optical methods in biology and medicine, **267**: 216-229
- Coherent VUV light in atomic vapors, nonlinear generation of, **267**: 30-50
- Coke by-products, cancer in workers exposed to, **271**: 102-115
- Colcemid, and neurite development, **253**: 545-561
- Colchicine
- action of, on axonal flow and pituitary in hypothalamopituitary system of rat, **253**: 670-684
- and neurite development, **253**: 545-561
- and tubulin, reaction between, **253**: 232-238
- blocking secretion of plasma protein in rat liver, **253**: 780-788
- effect of, on axonal transport and transmitter release in sympathetic nerves, **253**: 528-534
- inhibiting axoplasmic transport, **253**: 517-527
- modulating lymphocyte receptor mobility, **253**: 455-469
- tubulin binding site, affinity labeling of, **253**: 247-259
- Colds
- common, ascorbic acid for, **258**: 505-512
- function and metabolism of ascorbic acid during, **258**: 529-539
- Colindale (K 12) materials in analysis of results of Kveim test, **278**: 681-686
- Colitis, chronic ulcerative, immunology of, **278**: 586-591
- Collagen
- biosynthesis of
- by endothelial cells in culture, **275**: 104-113
- in oral mucosal epithelium, effect of ascorbic acid deficiency on, **258**: 253-263
- destruction of, role of lymphocytes and macrophages in, **256**: 132-140
- increased formation of, in blood vessels of hypertensive rats, **275**: 101-103
- metabolism of, function of ascorbic acid in, **258**: 264-277
- synthesis of
- in cultured fibroblasts and ascorbic acid, **258**: 288-306
- related to catecholamines, **275**: 114-116
- Collagenase
- neutrophil, α_2 -macroglobulin and α_1 -antitrypsin interacting with, **256**: 409-419
- production of, by synovial tissue, **256**: 289-303
- Collagenous tissue, intra-articular, antigen-antibody complexes in, **256**: 10-24
- Collapse
- from magnetic to gravitational, understanding of, **257**: 189-221
- gravitational, approach to, **262**: 47-53
- of stellar cores, and neutrino flow, **262**: 54-64
- stellar, magnetic effects in, **262**: 123-132
- Collective ion acceleration
- experimental studies of, **251**: 514-535
- theoretical models of, **251**: 536-549
- via two-stream instability, **251**: 582-589

- Collision hypothesis, matter-antimatter, for origin of cosmic γ -ray bursts, **262**: 197-208
- Colon, carcinoma of, antigens to, **259**: 404-411
- Colony-forming units, kinetics of, and the thymus, **249**: 468-476
- Colorectal cancer, bacillus Calmette-Guérin in immunotherapy of, **277**: 135-159
- Colorimetric assay of enzymatic oxidation of diethyldithiocarbamate by xanthine oxidase, **273**: 212-218
- Coma
 hepatic, and action of methanethiol on $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 573-576
 hyperammonemic, and hepatic encephalopathy, **252**: 116-123
- Communication
 carbon dioxide laser in, **267**: 329-341
 competence in, in child and chimpanzee, **280**: 592-597
 distance, in bees, **280**: 433-442
 for improved medical care, laser in, **267**: 359-365
 human, role of primates in, **280**: 467-480
 in man and animals, **280**: 131-142
 in primates and human language, **280**: 539-541
 referent, in schizophrenia and the perseverative-chaining model, **270**: 124-140
 space, laser in, Nd:YAG technology status of, **267**: 342-358
 system of
 animal, tonic properties of, **290**: 43-50
 visual, mastery of, in aphasia, **280**: 885-897
- Communicative behavior of gulls, complexities in, **280**: 413-432
- Communicative potential, and ontogeny of primate intelligence, **280**: 173-211
- Communicative speech of preschool children, **263**: 114-131
- Communities
 local plant, in southern Argolid, **268**: 109-126
 with polyvinyl chloride production facilities, oncogenic and mutagenic risks in, **271**: 49-57
- Community
 Cuban, economic adaptations of, **293**: 194-205
 local, and regionalism in Greece, **268**: 18-27
 of Aspidia, depopulated Maniat, **268**: 168-198
- Commutability, new theory of groupings and conservations based on, **291**: 350-371
- Competence
 and performance, some comments on, **263**: 201-204
 linguistic, in aphasia, **263**: 263-277
 relationship of, to performance, **263**: 197-200
 theories of, necessity for, **263**: 178-196
- Complement depletion, effect of, on experimental tissue injury, **256**: 426-440
- Complement-derived enzymes, inhibition of, **256**: 441-450
- Complement system
 activation of, in rheumatoid arthritis, **256**: 96-104
 in tumor immunity, **276**: 303-315
- Complexes
 antigen-antibody, in intra-articular collagenous tissues, **256**: 10-24
 arene-metal, in organic synthesis, **295**: 36-51
 chromium tricarbonyl-arene, in organic synthesis, **295**: 59-78
 circulating immune, in erythema nodosum and early sarcoidosis, **278**: 212-219
 cobalt-carbonyl acetylene, in organic synthesis, **295**: 2-14
 diene and enone iron-tricarbonyl, **295**: 254-270
 η^4 -diene and η^3 -allyl, of molybdenum, **295**: 186-191
 group VIII transition metal, oxidative addition of organic halides to, **295**: 52-58
 IgG, in patients with rheumatoid arthritis, **256**: 73-81
 immune
 and penicillamine treatment of rheumatoid arthritis, **256**: 330-337
 clinical significance of, in rheumatoid disease, **256**: 338-341
 in initiation of tissue injury, **256**: 8-9
 intermediate, formed by self-association of IgG-rheumatoid factors, **256**: 82-87
 iron-carbonyl, reactivity of mono-olefinic ligands in, **295**: 141-150
 π , to solvated metals to metal clusters, **295**: 83-102
- Compton scattering in strong external electromagnetic fields, **257**: 72-76
- Computers
 generating space-time, **302**: 569-604
 in simulation of electrostatic confinement of plasmas, **251**: 370-380
 in simulation of radiofrequency confinement of plasma, **251**: 94-111
- Computing, optical, with laser light, **267**: 430-447
- Concanavalin A
 and heterogeneity of carcinoembryonic antigen, **259**: 366-381
 modulating lymphocyte receptor mobility, **253**: 455-469
- Concanavalin-A-treated Friend-virus-infected mice, impairment of B-lymphocyte functions in, **276**: 466-478
- Conditioning, cultural, and space and density, **285**: 593-604
- Conductance, ionic, in nerve, specific chemical groups controlling, **264**: 293-303
- Configurational properties, statistical thermodynamics of, **279**: 68-77
 of polymer liquids, **279**: 2-14
- Confinement
 electromagnetic, **251**: 358-366

- electrostatic
 experimental developments in, **251**: 126-138
 of plasmas, computer simulation of, **251**: 370-380
 theoretical developments in, **251**: 139-151
 theoretical models of experiments in, **251**: 190-212
 experiments in, electrostatic and electromagnetic, made at French A.E.C., **251**: 322-345
- plasma
 by electromagnetic ring, **251**: 550-567
 by megagauss magnetic fields, **251**: 649-667
 electrostatic and electromagnetic, **251**: 1-711
 high-density, **251**: 2-29
 in electrostatically stoppered spindle-cusp magnetic field, **251**: 367-369
 laser-produced, by radiofrequency electromagnetic fields, **251**: 381-393
 using high-energy electron and ion rings, **251**: 472-482
 radiofrequency, of plasma, **251**: 94-111
 system, spherical electrostatic, using six ion guns, **251**: 179-189
- Conformal anomalies and stress tensor calculations, **302**: 166-185
- Conformational changes in solution, **303**: 123-141
- Conformation of carriers and channels, **264**: 203-220
- Congenital anomalies associated with anesthetics, **271**: 58-66
- Conjugate specificity, microfluorometric evaluation of, DASS system in, **254**: 94-107
- Connecticut drainage, and Paleoindians and paleo-lakes, **288**: 333-348
- Connective tissue
 and cytolytic action of thymus-derived lymphocytes, **256**: 141-149
 degradation products of, chemotaxis of cell types to, **256**: 177-189
 disorders of, role of DMSO in, **243**: 391-392, 393-394
 of joints, human neutrophil lysosomal proteases on degradation of, **256**: 402-408
- Connective-tissue-degrading enzymes of human leukocytes, **256**: 233-253
- Consciousness (*see also* Self-conscious entries)
 altered states of
 and EEG alpha activity, **296**: 154-161
 and hypnosis and suggestions, **296**: 34-47
 bilateral organization of, **299**: 448-458
 divided, neodissociation interpretation of, **296**: 48-59
 evolution of, and lateral specialization, **299**: 397-411
- Consequences, uncertain, ethical scientific responsibility in face of, **265**: 1-12
- Constancy, anatomy of, **290**: 421-435
- Contact activation of human Hageman factor, **283**: 93-103
- Contaminants
 organic
 and inorganic, in marine animals, **298**: 47-79
 in reused waste water, **298**: 561-572
 health implications of, **298**: 557-560
- Continental shelf, man on, **288**: 245-256
- Continuum light from supernovae, **302**: 81-89
- Contraceptive agent, adrenocortical reserve metabolism of, and frequent marijuana use, **282**: 173-179
- Contractile proteins in platelet activation and contraction, **283**: 218-236
- Controlled thermonuclear research general relativistic power plants, new approaches to, **251**: 623-631
- Conversational interaction, mother-infant exchanges as, **263**: 89-100
- Copernicus, recent x-ray results from, **302**: 386-402
- Copper-binding ligands inhibiting Rous sarcoma virus, **284**: 525-532
- Copper-mining and -smelting industry, workers in, bronchogenic carcinoma in, **271**: 260-268
- Copper proteins related to ascorbate oxidase, **258**: 209-220
- Copper sulfate in contact inactivation of DNA and RNA viruses, **284**: 533-543
- Cores, stellar, collapse of, and neutrino flow, **262**: 54-64
- Corneas, animal, in testing of antiviral compounds, **284**: 182-189
- Coronary arteriosclerosis and exercise training, **301**: 495-508
- Coronary heart disease
 deaths anticipated from, in marathon runners, **301**: 620-626
 in marathon runners, **301**: 593-619
 prediction of, by fitness determination and stress testing, **301**: 642-652
 related to physical activity, **301**: 561-578
- Coronary patients
 marathon running in, metabolic adjustments to, **301**: 466-483
 rehabilitation of, marathon running for, **301**: 484-494
- Cortex
 adrenal, cytochrome P450 systems of, and ACTH, **297**: 349-360
 anatomic variations in, and localization of language function, **280**: 834-843
 isolated cells of, bioassay of ACTH using, **297**: 220-241
 unilateral ablation of, effects of, **299**: 255-263
- Cortical auditory receptive units, changes in, as function of behavioral states, **290**: 180-199
- Cortical functions, higher, lateralization of, **299**: 459-473

- Corticoids, adrenal, and catecholamines, **297**: 275-283
- Corticosteroids
 feedback actions of, **297**: 580-590
 inhibiting chemotactic lymphokine production by T and B lymphocytes, **256**: 375-385
 in long-term treatment of pulmonary sarcoidosis, **278**: 717-721
 in myasthenia gravis, **274**: 577-595, 623-630
 in treatment of ocular myasthenia gravis, **274**: 652-658
- Corticotropin
 cytochemical bioassay of, **297**: 242-259
 in myasthenia gravis, **274**: 577-595
 peptides related to, **297**: 49-62
- Corticotropin-releasing factor and ACTH, **297**: 220-241
 and vasopressin, **297**: 395-404
 extra-CNS, **297**: 420-435
 in rat hypothalamus, **297**: 436-454
 isolation and chemical properties of, **297**: 395-404
 neurotransmitters regulating, **297**: 527-535
- Corticotropin-thymus growth hormone and rejection of skin allografts, **249**: 387-401
- Cortisol secretion and ACTH in psychiatric disease, **297**: 621-627
- Cortisone-sensitive thymocytes in DNA synthetic responses to antigen, **249**: 451-461
- Corti's organ, action of, and cochlea, **247**: 219-231
- Corynebacterium parvum*
 immunochemotherapy with, in disseminated cancer, **277**: 241-251
 in cancer therapy, design of trials for, **277**: 252-259
 in immunoadjuvant studies of cancer therapy, **277**: 269-287
- COS-B observations of localized high-energy gamma-ray emission, **302**: 349-360
- Cosmic and laboratory plasma physics, relations between, **257**: 179-188
- Cosmic evolution of radio-source populations, **302**: 656-664
- Cosmic x-ray sources, polarization of, **302**: 312-328
- Cosmological constant and cosmological change, **302**: 423-438
- Cosmologies, homogeneous axial, with electromagnetic fields and dust, **262**: 253-274
- Cosmology
 and singularities, **262**: 231-240
 quantum, recent developments in, **262**: 467-469
 significance of evolution of galaxies for, **262**: 436-448
- Costa Rica
 cannabis use in, **282**: 2-16
 chronic marijuana users in, neuropsychologic, intellectual and personality correlates of, **282**: 266-306
- Cost of doing science, **265**: 102-111
- Counseling, genetic, approaches to, **240**: 132-137
- Countries, developing, protein-calorie deficits in, **300**: 176-187
- Coupling
 energy, role of ionophores in, **264**: 61-82
 excitation-contraction, and dielectric properties of muscle membrane, **264**: 278-292
- Courtroom, scientists in, and public interest law, **260**: 111-113
- Co-vidarabine
 as inhibitor of vidarabine deaminase, **284**: 21-29
 effect of, on antiviral activity of Vira-A for DNA virus replication, **284**: 60-80
 in inhibition of adenosine deaminase, **284**: 9-20
- Crab, abdominal motor system of, origins of asymmetry in, **299**: 43-58
- Crab Nebula, possible gamma-ray line from, **302**: 532-537
- Creation, graviton, in early universe, **302**: 439-444
- Creolization, conflict in, **292**: 41-62
- Crithidia luciliae* as substrate for determining anti-DNA with immunofluorescence technique, **254**: 505-515
- Crohn's disease
 immunology of, **278**: 586-591
 transmissibility of, **278**: 546-559
- Crop disease
 control of loss through, by host gene management systems, **287**: 255-274
 genetic defense of rice against, **287**: 275-286
 interactions between hosts and parasites in, **287**: 124-150
- Crop epidemics
 genetic interdependence of host and parasite in, **287**: 97-106
 in India, and genetic vulnerability, **287**: 72-85
- Crop epidemiology, contribution of mathematical models to, **287**: 164-180
- Crop populations, role of, illustrated by EPIMUL76, **287**: 164-180
- Crops
 agricultural, DMSO in, **243**: 228-236
 British, and host genetic resistance in epidemic disease in, **287**: 21-28
 host, plant diseases lacking genetic resistance of, biological control of, **287**: 45-56
 major, in U.S. in 1976, **287**: 86-96
- Cross-cultural cognitive development, and Piaget's theory, **285**: 332-337
- Cross-cultural comparisons of abnormal behavior, difficulty of, **285**: 664-675
- Cross-cultural definition and measurement of marital power, **285**: 646-652
- Cross-cultural findings, statistical robustness of, **285**: 151-184
- Cross-cultural measurements
 establishing validity in, **285**: 308-325
 of variations in children's drawings, **285**: 227-281
- Cross-cultural perspective
 on ethnic identity studies, **285**: 32-45

- on psychopathology, **285**: 742-745
 on societal morphogenesis and intra-family violence, **285**: 717-730
 sex roles in, **285**: 612-617
- Cross-cultural psychology, methodological issues in, **285**: 215-216
- Cross-cultural research
 anthropology and psychology providing common ground in, **285**: 13-18
 causal analysis in, **285**: 66-74
 cognition and perception in, **285**: 505-513
 cognitive, developmental theories applied to, **285**: 366-373
 direction of, **285**: 659-661
 exaltation of, **285**: 750-753
 hologeistic, **285**: 75-88
 interdisciplinary, plea for, **285**: 1-2
 in the next century, **285**: 94-98
 into psychotherapy, **285**: 737-741
 issues in, **285**: 1-753
 methods and issues in, **285**: 89-93
 need for experimentation in, **285**: 104-118
 problems of language in, **285**: 141-150
 problems of measurement in, **285**: 131-140
 publication and dissemination of data in, **285**: 203-214
 reasons for, **285**: 3-12
 special aspects of, **285**: 355-362
 unwanted variables in, and mental health and aged, **285**: 712-716
- Cross-cultural researchers
 acceptance and rejection of, ethical issues influencing, **285**: 185-202
 relation of, to their professions, **285**: 217-218
- Cross-modal perception in apes, **280**: 143-149
- Crustacea, decapod, positional orientation in, **299**: 35-42
- Crustacean, chemical pollutants interacting with virus in, **298**: 497-504
- Cryoprotective agents
 for platelet preservation, DMSO as, **243**: 306-307
 glycerol compared with DMSO as, in tumor, **243**: 317-319
- Cryoprotective properties of DMSO in cellular systems, **243**: 246-256
- Cryptocodium cohnii*, utilization of Fe^{3+} by, **245**: 16-25
- Crystallization behavior related to structure in amorphous systems, **279**: 185
- Crystals, molecular, glass transition and secondary relaxation in, **279**: 117-140
- CTR (see Controlled thermonuclear research)
- Cuba, African population in, **292**: 187-201
- Cuban antislavery novel, portrait of slave in, **292**: 356-367
- Cuban community, economic adaptations of, **293**: 194-205
- Cuban slave society, social structure of, in 19th century, **292**: 259-266
- Cultural areas, frontier between, Thessaly as, **268**: 43-58
- Cultural change on coast of Labrador, **288**: 481-497
- Cultural conditioning, space and density, **285**: 593-604
- Cultural elaboration, stages of, in Pleistocene, **280**: 275-288
- Cultural perspective on farming and foraging in prehistoric Greece, **268**: 127-142
- Cultural studies of southern Argolid, **268**: 74-91
- Culture
 and personality revisited, **285**: 119-130
 and psychology and running, **301**: 970-1001
 development and sex, **285**: 653-658
 ecology and behavior, relationships among, **285**: 19-31
 folk, of Maniat, and ethnic mosaic in southeast Peloponnese, **268**: 199-206
 man's, and woman's nature, **293**: 15-24
 memory in, studies of, **285**: 297-307
 subjective
 and interpersonal relations among cultures, **285**: 418-434
 and technology, and "nuclear allergy" in Japanese, **285**: 516-538
 objective indicators of, **285**: 435-450
- Cultures
 cell (see Cell cultures)
 early
 in Hudson drainage basin, **288**: 316-332
 on Strait of Belle Isle, Labrador, **288**: 472-480
 interpersonal relations among, and subjective culture, **285**: 418-434
- Current
 associated with ionic gating structures in nerve membrane, **264**: 265-277
 gating, in squid giant axons, activation and chemical blockage of, **303**: 322-338
- Curved space-time, quantum field theory in, **302**: 114-157
- Curves, optical light, and masses of x-ray binaries, **262**: 376-378
- Cushing's syndrome, **297**: 594-602
- Cutaneous anergy in inflammatory bowel disease, **278**: 565-573
- Cutaneous hypersensitivity reactions, delayed, in cancer patients, **276**: 407-410
- Cutaneous neoplasms, effects of nucleoside analogs on, **255**: 216-224
- Cutaneous tumors, metastatic, effects of injection of supernatants from lymphoid cell lines on, **276**: 584-591
- Cutting-oil mist, workers exposed to, cancer mortality in, **271**: 94-101
- Cyanate in treatment of sickle cell anemia, **421**: 538-544
- Cycles, replication, of animal viruses, microtubules in, **253**: 440-444
- Cyclic AMP (see cAMP)

- Cyclic nucleotides
 effect of, on virus infection, **284**: 375-388
 in lymphocyte function, **256**: 352-364
- Cyclohexyl-methacrylate, immunogenicity of tumors alkylated with, **277**: 412-427
- Cyclopeptides, "sandwich" complexation in, and membrane processes, **264**: 221-243
- Cyclophosphamide
 DMSO as potentiator for, in cancer therapy, **243**: 412-420
 in management of hemophiliacs with Factor VIII inhibitors, **240**: 412-418
- Cyclotron emission, strong, in hard x-ray spectrum of Her-1, **302**: 538-544
- Cyclotron wave, monochromatic electron, in plasma, excitation of, **251**: 312-321
- Cyg X-2
 and Sco X-1, **262**: 400-403
 optical light variations of, periodicity in, **302**: 403-407
- Cyprus
 anthropological, sociological and geographical fieldwork in, **268**: 345-354
 future anthropological fieldwork on, **268**: 355-362
 modern, regional studies and ethnography of, **268**: 3-9
 peasant incorporation in, in last century, **268**: 363-378
- Cytidine triphosphate, participation of, in sodium-dependent phosphorylation, transphosphorylation, and hydrolysis, **242**: 139-148
- Cytochemical bioassay of corticotropin, **297**: 242-259
- Cytochemistry of effects of *Schistosoma mansoni* on *Biomphalaria glabrata*, **266**: 380-393
- Cytochrome c
 ligand-binding reactions and oxidation-reduction equilibria of, **244**: 51-59
 turnover of, in skeletal muscle, effects of endurance exercise on, **301**: 431-439
- Cytochrome c oxidase, reactions of oxygen to, **244**: 1-9
- Cytochrome oxidase, reaction of, to oxygen, **244**: 163-173
- Cytochrome P450
 of adrenal cortex, effect of ACTH on, **297**: 349-360
 soluble and membrane-bound, chemistry of, **244**: 107-131
- Cytochromes and ascorbic acid, **258**: 201-208
- Cytogenetics
 and industrial monitoring, **269**: 4-11
 role of, in mutagenesis testing, **269**: 12-15
- Cytokinins as chemotherapeutic agents, **255**: 225-234
- Cytologic monitoring of nickel sinter plant workers, **271**: 365-369
- Cytologic observations after exposure to bis (chloromethyl) ether, **271**: 71-80
- Cytology, sputum, in aluminum potroom workers, **271**: 239-242
- Cytolytic action of thymus-derived lymphocytes, and connective tissue, **256**: 141-149
- Cytophilic antibody receptors, antibody-induced inhibition of, **276**: 229-242
- Cytoplasmic enzymes and platelet protein kinase phosphorylation reaction, **283**: 159-174
- Cytosine arabinoside, resistance to, in leukemic cells, **255**: 247-251
- Cytotoxic agents, azapurine nucleosides as, synthesis of, **255**: 292-305
- Cytotoxic aspects of interaction of ascorbic acid, alloxan, and 6-hydroxydopamine, **258**: 221-230
- Cytotoxic drugs, antibodies as carriers of, in cancer, **277**: 671-689
- Cytotoxicity
 cellular antibody-dependent, in blood of myasthenia gravis patients, **274**: 421-433
 influence of DMSO on, **243**: 122-138
 macrophage-mediated, and rheumatoid arthritis, **256**: 275-287
 of tumor cells, **276**: 134-145
 thymus-derived cell-mediated, in lymphocyte proteins, **249**: 47-53
- DAB-hepatocarcinogenesis, hepatic tissue in, and α -fetoprotein **259**: 156-167
- Damping
 gravitational radiation, and energy loss in binary systems, **302**: 557-564
 of differential rotation in cores of neutron stars, **302**: 528-531
- Danish Virgin Islands, slave laws in, **292**: 174-186
- Darwinian idea of chance, fortunes of, **291**: 233-245
- DASS system
 for immunodiagnosis of helminth infections, **254**: 119-136
 some applications of, **254**: 108-118
- Data base of national drug abuse, and polydrug abuse, **281**: 311-320
- Data processing device, optical, real-time, **267**: 417-429
- Dating
 carbon-14, non-counting errors in, **288**: 174-180
 radiocarbon
 notes from Merlin's diary on, **288**: 181-188
 use and abuse of, **288**: 167-173
- DEAA fluorene in immunoadjuvant studies of cancer therapy, **277**: 269-287
- Deaf children, nature of language in, **263**: 70-75
- Deafferentation
 somatosensory, in monkeys, alertness and movement after, **290**: 345-365
 trigeminal, in pigeon, and tonic and phasic effects, **290**: 331-347
- Deaminated monophosphate nucleotide after administration of arabinofuranosyl cytosine or deoxycytidine, **255**: 287-291

- Deaths from coronary heart disease anticipated in marathon runners, statistical analysis of, **301**: 620-626
- 3-Deazauridine in tumor cells sensitive and resistant to arabinosylcytosine, **255**: 501-521
- Decapod crustacea, positional orientation in, physiologic aspects of, **299**: 35-42
- Decriminalization of marijuana in Oregon, **282**: 405-415
- Deer, sickling phenomena of, **241**: 594-604, 605-613, 614-622
- Defect chemistry and catalysis in oxidation and reduction over perovskite-type oxides, **272**: 3-21
- Defense mechanisms, impaired, and acute alcoholism, **252**: 343-347
- Defined antigen substrate spheres (DASS) system in microfluorometric evaluation of conjugate specificity, **254**: 94-107
- Defined IF studies of anticollagen sera, **254**: 614-617
- Degenerative joint disease, **240**: 340-341 and hemophilic arthropathy, **240**: 285-290
- Dehydroascorbate uptake and reduction by neutrophils, erythrocytes, and lymphocytes, **258**: 238-242
- Dehydrogenase, alcohol, pathophysiologic role for, and retinol, **273**: 317-327
- 17 β -Dehydrogenase in endometrium, **286**: 190-198
- Delinquents, adolescent, cannabis and alcohol effects on assaultiveness in, **282**: 85-94
- Demersal fishes of Southern California, erosion of fin in, **298**: 177-189
- Democracy, determination of cancer risk in, **271**: 421-430
- Demographic data
in psychological test of marathon runners, **301**: 1010-1019
of Surinam plantation slaves just before emancipation, **292**: 161-173, 205-225
- Denotative semantic subspaces differentiated from affective ones, **285**: 476-500
- Densification, pressure-induced, of polymers, hole theory to estimate, **279**: 88-93
- Density, mean mass, in universe, **262**: 21-29
- Dental extractions in hemophiliacs, epsilon-aminocaproic acid for, **240**: 267-276
- Dental therapy in hemophilia
hypnosis in, **240**: 263-266
new approaches to, **240**: 259-262
- Deoxycorticotropin and adrenocorticotropin, **297**: 361-369
- Deoxycytidine
deaminated monophosphate nucleotide after administration of, **255**: 287-291
- 5-halogenated analogs of
inhibiting replication of herpes simplex viruses, **255**: 359-365
inhibiting replication of varicella-zoster virus, **284**: 389-395
- Deoxyribonucleic acid (*see* DNA)
- Dependence (*see* specific agent)
development of, agonist-antagonist interaction on, **281**: 244-251
- Deposits, Quaternary, in St. Lawrence lowland, **288**: 498-507
- Depressant actions of alcohol, sex-linked and genotype-determined differences in, **273**: 303-316
- Depressants, central nervous system, effects of, on cell membrane models, **281**: 151-161
- Depression after myocardial infarction, and distance running, **301**: 1029-1038
- Dermatitis, B and T lymphocytes in, **254**: 592-599
- Dermatologic disorders, DMSO for, **243**: 395-402
- Dermatoses, bullous, immunoglobulins in, detected by super-sandwich technique, **254**: 223-225
- Desensitization
cholinergic receptor, **274**: 130-139
genital, in male cats, **290**: 299-313
- Destruction of bone and collagen, role of lymphocytes and macrophages in, **256**: 132-140
- Detection
of environmental carcinogens as mutagens, method for, **271**: 5-13
of heterozygous carriers of hemophilia, lyonization causing error in, **240**: 141-146
of mutagenic metabolites of carcinogens in urine with *Salmonella*/microsome test, **269**: 21-25
of mutagenic substances in blood and urine, **269**: 16-20
of mutagens and carcinogens by DNA repair, **269**: 37-42
of potential environmental chemical mutagens by *Drosophila*, **269**: 26-33
- Detectors, particle, and black hole evaporation, **302**: 186-190
- Detoxification unit
alcohol, study of staff of, **273**: 409-419
in prevention of alcoholism, **273**: 395-402
- Developing countries, protein-calorie deficits in, **300**: 176-187
- Developing societies, orientation to change in, **285**: 565-581
- Development
and migration in the Serres basin, **268**: 59-70
barriers to, in Greece, **268**: 28-42
- Developmental psycholinguistics
and communication disorders, **263**: 5-287
role of language and thought in, **263**: 7-11
- Developmental psychology
and genetic epistemology, **291**: 332-341
- Developmental psychology and self, **291**: 149-167
- Dextroamphetamine and marijuana, combined effect of, **281**: 162-170
- Diabetes insipidus, hereditary hypothalamic, neurophysins in rat with, **248**: 345-364

- Diagnosis of myasthenia gravis
by electrical testing, **274**: 203-222
by nerve stimulation, **274**: 174-188
- Diagnostic laboratory, mini, as adjunct to use of antiviral drugs, **284**: 122-127
- α , β -Dialkylation of α , β -ethylenic ketones, **295**: 249-253
- Dialyzable transfer factor
in human osteosarcoma, **277**: 545-557
injection of, in sarcoidosis, acquisition of tuberculin sensitivity after, **278**: 129-135
- Dichroism, electric, of DNA, chromatic, and their complexes with cationic dyes, **303**: 170-189
- Dieldrin, suspension of use of, **271**: 187-195
- Dielectric absorption of polypeptides and substituted polysaccharides, **303**: 123-141
- Dielectric dispersion
of polyelectrolytes due to ion fluctuation, **303**: 107-120
subsecond measurement of, **303**: 90-106
- Dielectric lens for microwave irradiation of eye, **247**: 142-154
- Dielectric properties
of charged linear macromolecules with reference to DNA, **303**: 74-87
of lipoproteins in aqueous solution, **303**: 142-155
of muscle membrane and excitation-contraction coupling, **264**: 278-292
- Dielectric relaxation of biomolecules, real-time measurement of, **303**: 47-56
- Dielectrics, effect on, of chemical transitions of biopolymers induced by electric field, **303**: 190-197
- Dielectric theory and properties of DNA in solution, **303**: 59-73
- Diene complexes, chemistry of, **295**: 254-270
- Diet, fat-modified, in prevention of atherosclerosis, **300**: 379-382
- Dietary allowances for ascorbic acid, **258**: 491-497
- Dietary cholesterol inducing atherosclerosis in swine, **275**: 336-347
- Dietary fiber, action of, **300**: 283-289
- Diethyldithiocarbamate, enzymatic oxidation of, by xanthine oxidase, **273**: 212-218
- Differential rotation, damping of, in cores of neutron stars, **302**: 528-531
- Differentiation, T-cell, in congenitally athymic mice, immunofluorescence studies of, **254**: 226-242
- Digitalis
antibodies in study of, **242**: 731-736
cardiotoxicity and Na^+ + K^+ -ATPase, **242**: 658-670
- Digitonin as uncoupler of partial reactions of Na^+ + K^+ -ATPase, **242**: 149-157
- Digoxin
action of, at cell surface, **242**: 703-707
treatment with, related to sodium and potassium changes in red cells, **242**: 693-703
- Digoxin-specific antibodies, production and properties of, **242**: 717-730
- Dilantin in management of sedative-withdrawal seizures, **273**: 378-380
- Dill, D. B., special recognition of, **301**: 1-2
- Dimethylformamide, effect of, on morphology of tumor cells, **243**: 164-171
- Dimethylsulfoxide
and hydrogen peroxide, effect of, on tissue gas tensions, **243**: 320-324
as cryoprotective agent for platelet preservation, **243**: 306-307
as potentiator of cyclophosphamide in cancer therapy, **243**: 412-420
biological actions of, **243**: 5-508
compared with glycerol, as cryoprotective agents for tumor, **243**: 317-319
design of therapeutic trials for, **243**: 390
effect of
on blood concentrations of salicylic acid, sulfanilamide, and warfarin, **243**: 311-316
on forelimb regeneration of adult newt, **243**: 257-268
on hepatic disposition of chemical carcinogens, **243**: 185-193
on hypothalamic-pituitary-adrenal functions in rat, **243**: 325-336
on lysosomal membrane, **243**: 54-59
on morphology of tumor cells, **243**: 164-171
on neurite development, **243**: 279-296
on neuronal excitability and cholinergic transmission in *Aplysia* ganglion cells, **243**: 337-357
on *Pneumocystis carinii*, **243**: 278
on streptomycin-sensitive and -resistant *Escherichia coli*, **243**: 269-277
on subunit proteins, **243**: 38-53
for chronic skin ulcers, **243**: 408-411
for dermatologic disorders, **243**: 395-402
for diseases of the supporting motor apparatus, **243**: 497-499
for sterility due to tubal obstruction, **243**: 494-496
human toxicology of, **243**: 500-509
in agricultural crops, metabolism of, **243**: 228-236
in bronchiolitis, **243**: 460-467
in cellular systems, radioprotective and cryoprotective properties of, **243**: 246-256
in cellular ultrastructure and cytochemistry, **243**: 122-138
in general suppurative surgery, **243**: 497-499
in mental retardation, **243**: 449-459
in modification of Na^+ + K^+ -ATPase, **243**: 60-72
in nonmongoloid infantile oligophrenia, **243**: 432-448
in production of interferon in mouse, **243**: 308-310

- in respiratory insufficiency of bronchopulmonary origin, **243**: 475-484
- in retardation in mongoloid children, **243**: 421-431
- in retinal disease, **243**: 485-493
- in study of sperm motility control, **243**: 297-305
- in tinnitus of unknown origin, **243**: 468-474
- in treatment of leukemic and normal lymphocytes, **243**: 73-80
- metabolism and excretion of, after topical and parenteral administration, **243**: 139-150
- metabolites of, biological effects of, **243**: 104-109
- modifying effect of, on experimental skin tumor induction, **243**: 209-227
- modulating cell-mediated immunity, **243**: 81-90
- oral, potentiation of antineoplastic compounds by, **243**: 194-208
- penetration and clearance of, after application to the eye, **243**: 151-154
- pharmacologic and biochemical considerations of, **243**: 7-19
- pharmacologic effects of, on mammalian myocardium, **243**: 110-121
- physical properties of, and function in biological systems, **243**: 20-23
- radiolabeled, sprayed on peach fruit and foliage, **243**: 237
- role of, in connective tissue disorders, **243**: 391-392, 393-394
- stimulating erythroid differentiation and hemoglobin synthesis in murine virus-induced leukemic cells, **243**: 155-163
- to control aflatoxin production, **243**: 238-245
- topical
- antiarthritic and antithrombotic effects of, **243**: 91-97
 - in venous disorders of extremities, **243**: 403-407
- toxicity of, **243**: 98-103
- use of
- in central nervous system trauma, **243**: 362-389
 - to enhance resistance against sonic disruption, **243**: 358-361
- 2,4-Dinitrophenylmethacrylate, immunogenicity of tumors alkylated with, **277**: 412-427
- Diphenylhydantoin in management of sedative-withdrawal seizures, **273**: 378-380
- Diphosphoglycerate-adenosine triphosphate levels in red cells, **241**: 513-523
- 2,3-Diphosphoglycerate in mediating hemoglobin function of mammalian red cells, **241**: 498-512
- Diphtheria toxin
- antitumor antibodies conjugated to, in immunotherapy of animal tumors, **277**: 690-699
 - response to, influence of thymosin on, **249**: 264-277
- Diptera-borne disease, epidemiology of, inherited infection in, **266**: 115-124
- Disaster in Peruvian Andes, **293**: 246-274
- Discriminability, sensory, and central nervous correlates, **299**: 244-254
- Disease
- autoimmune, thymosin in treatment of, **271**: 390-401
- beryllium
- differentiated from sarcoidosis, **278**: 654-664
 - in ceramic factory workers in Japan, **278**: 636-653
- cardiovascular, nutritional epidemiology of, **300**: 335-359
- chronic states of, labor-management participation in long-term investigation of, **269**: 43-45
- clinical, and ascorbic-acid deficiency, **258**: 483-490
- coronary heart
- in marathon runners, **301**: 593-619, 620-626
 - predicted by fitness and stress testing, **301**: 642-652
 - related to physical activity, **301**: 561-578
- Crohn's
- immunology of, **278**: 586-591
 - transmissibility of, **278**: 546-559
- crop (see Crop disease)
- Diptera-borne, inherited infection in epidemiology of, **266**: 115-124
- epidemics
- agricultural, in Japan, **287**: 35-44
 - and host genetic resistance in British crops, **287**: 21-28
- genetic defense of rice against, **287**: 275-286
- human, abnormalities of leukocyte chemotaxis in, **256**: 386-401
- in fish
- chemical pollutants related to, **298**: 535-546
 - estuarine, in polluted habitats of Mississippi, **298**: 427-462
 - in the Bering Sea, **298**: 290-304
 - marine, and water waste discharge, **298**: 210-224
- inflammatory bowel
- lymphocytotoxic and RNA antibodies in, **278**: 574-585
- T and B lymphocytes and cutaneous anergy in, **278**: 565-573
- tissue homogenates from patients with, in induction of granulomas, **278**: 560-564
- ischemic heart, related to physical activity in Federal employees, **301**: 627-641
- joint, lymphocytes in propagation of, **256**: 150-168
- neoplastic
- and nonneoplastic, nucleoside analogs in treatment of, **255**: 266-268
 - in bivalve mollusks from Oregon estuaries, **298**: 356-373
 - nonneoplastic, nucleoside analogs in treatment of, **255**: 190-201
 - recognition factors and macrophage activation in treatment of, **277**: 20-44

- plant, lacking genetic resistance of host crops, biological control of, **287**: 45-56
- prevalance of, in workers exposed to VC and PVC, **246**: 22-41
- respiratory, among uranium miners, **271**: 280-293
- vascular, lysosomes in, **275**: 238-243
- viral, inosiplex in treatment of, **284**: 128-138
- Dispersion, dielectric, subsecond measurement of, **303**: 90-106
- Distance running (see Running)
- Divalent cation, electron paramagnetic studies of, **264**: 112-123
- Divalent cation ionophores derived from beef-heart mitochondria, **264**: 98-111
- DMSO (see Dimethylsulfoxide)
- DMSO-glycerol in isolation of mitotic apparatus of sea urchin, **253**: 378-382
- DNA
- and dielectric properties of charged linear macromolecules, **303**: 74-87
 - electric dichroism and birefringence of, **303**: 170-189
 - immunology of, use of *Crithidia luciliae* in, **254**: 505-515
 - in solution, dielectric theory and properties of, **303**: 59-73
 - recombinant, issues posed by technology of, **265**: 59-81
 - superhelical, dynamics of, with ethidium bromide, studied by electro-optic relaxation measurements, **303**: 159-169
- DNA polymerases
- avian myeloblastosis, inhibited by anthrocycline compounds, **284**: 566-575
 - viral, inhibition of, **255**: 532-543
- DNA repair to detect mutagens and carcinogens, **269**: 37-42
- DNA synthesis
- Herpesvirus hominis*, inhibited by 9- β -D-arabinofuranosyladenine in cellular and cell-free systems, **284**: 34-48
 - viral, inhibited by chemotherapeutic agents, **284**: 396-409
- DNA synthetic responses to antigen, cortisone-sensitive thymocytes in, **249**: 451-461
- DNA tumor virus-induced antigens, IF staining of, **254**: 541-550
- DNA viruses, contact inactivation of, by *N*-methyl isatin betathiosemicarbazone and CuSO₄, **284**: 533-543
- DNA virus replication, antiviral activity of vidarabine for, effect of co-vidarabine on, **284**: 60-80
- Dogs, hemoglobin α -chains in, multiplicity of, **241**: 411-415
- Dominance, cerebral
- in monkeys, **280**: 732-744
 - ontogeny of, **263**: 244-250
- Dopa decarboxylase inhibitor, RO-4602, effects of, on acetaldehyde metabolism, **273**: 227-233
- Dopamine metabolism, ethanol-induced alterations of, in rat liver, **273**: 219-226
- Dosage of ascorbic acid
- high, safety considerations with, **258**: 523-528
 - too great, diminished high-altitude resistance after, **258**: 377-381
- Dose distribution in phantom heads, and aperture and plane wave sources, **247**: 454-472
- Dose-response relationships
- and threshold concepts, **271**: 22-28
 - microwave, and behavioral tasks, **247**: 410-416
- Dosimetry, biologic, of microwaves, **247**: 499-509
- DPG-ATP levels and *in vivo* glycolytic control, **241**: 513-523
- Drainage
- Connecticut, and Paleoindians and paleo-lakes, **288**: 333-348
 - Hudson, early cultures in, **288**: 316-332
- Drink, desire for, related to age, blood alcohol concentration, and severity of withdrawal syndrome, **273**: 360-363
- Drinker, problem
- identification, motivation, and treatment of, **273**: 488-491
 - in Alaska, scheme to improve care for, **273**: 646-652
- Drinking
- in "introverted" and "extroverted" alcoholics, **273**: 481-487
 - maternal
 - and study of fetal alcohol syndrome at Boston City Hospital, **273**: 118-122
 - effects of, on child development, **273**: 115-117
 - responsible, vs. abstinence in treatment of problem drinkers, **273**: 488-491
- Drosophila*
- for detection of potential environmental chemical mutagens, **269**: 26-33
 - for mutagenesis screening, **269**: 34-36
- Drug abuse
- and maturing national drug abuse data base, **281**: 311-320
 - in Wisconsin, alcohol as primary determinant for hospitalization in, **273**: 388-394
- Drug Addiction Research Foundation of Ontario, research into alcoholism at, **273**: 87-97
- Drug addicts and alcoholics, comparisons between, **273**: 605-612
- Drug interactions
- assessment of, experiments for, **281**: 118-135
 - at genetic level, analysis of, **281**: 40-49
 - behavioral methods for study of, **281**: 64-73
 - developmental factors influencing, **281**: 90-97
 - in adult patient, clinical principles of, **281**: 98-105
 - methodologic problems in, **281**: 106-117
 - overview of factors affecting, **281**: 136-150
 - pharmacokinetic approaches to study of, **281**: 24-39
 - with marijuana, in neuron, **281**: 190-197
 - with methadone, **281**: 350-370

- Drug interference with effects of marijuana, **281**: 219-228
- Drug metabolism, microsomal, effects of ascorbic acid on, **258**: 119-131
- Drug receptors, microtubules as, **253**: 213-231
- Drugs (*see also specific drug and Pharmacologic agents*)
- antimitotic, and intra-axonal transport of neurotransmitters, **253**: 507-516
 - antitumor, inhibiting oncornavirus reverse transcriptase and cellular nucleic acid polymerases, **284**: 508-524
 - antiviral
 - arabinosyl-*N*⁶-hydroxyadenine as, **284**: 351-357
 - mini diagnostic laboratory as adjunct to, **284**: 122-127
 - attached to tumor-specific antibodies, cancer therapy by, **277**: 670
 - behavioral effects of, interactions of, **281**: 50-63
 - clinically relevant, interaction of stimulants with, **281**: 393-408
 - cytotoxic, antibodies as carriers of, in cancer, **277**: 671-689
 - euphoriant, neurochemical basis for alcohol as, **273**: 159-166
 - inducing porphyrin biosynthesis, mechanisms of, **244**: 472-480
 - of abuse
 - extraneuronal interactions of, **281**: 1-10
 - interactions of, **281**: vii-489
 - with alcohol, **281**: 384-392
 - sites in neuron for interactions of, **281**: 11-23
 - psychoactive
 - in treatment of alcoholics, **252**: 385-395
 - interacting with narcotic agonists and antagonists, **281**: 321-330
 - sedative, in therapy of alcoholism, **252**: 379-384, 396-399
 - various, interaction of, with amphetamine, **281**: 409-425
- Drunk-driving offenders in secondary prevention of alcoholism, **273**: 637-645
- Dust and homogeneous axial cosmologies, **262**: 253-274
- Dwarf models of x-ray bursts, and neutron star, **302**: 261-299
- Dwarfs, white, strong magnetic fields in, **257**: 80-81
- Dyad, mother-child, vocalizing in unison and alternation in, **263**: 89-100
- Dyes, potential sensitive, rapid optical changes of, **303**: 217-241
- Dynamic order parameter fluctuations in disordered system, **279**: 45-46
- Dynamic origin of Cabibbo angle, possible, **294**: 52-57
- Dynamo mechanism
 - for generation of large-scale magnetic fields, **257**: 141-155
 - new primary, **257**: 177-178
- Dynamo problems
 - nonlinear, and helical magnetohydrodynamic turbulence, **257**: 173-176
 - turbulent, and mean-field magnetohydrodynamics, **257**: 156-172
- Dyskinesias, amphetamine-elicited, after chronic methadone treatment in monkeys, **281**: 336-349
- EACA (*see* ϵ -Aminocaproic acid)
- Early postglacial environments in western New York, **288**: 223-233
- Echocardiography in analysis of cardiac function of distance runners, **301**: 297-309
- Ecologic basis of agricultural practices in Methana, Trizinia, **268**: 236-250
- Ecologic perspective on farming and foraging in prehistoric Greece, **268**: 127-142
- Ecology
 - and culture and behavior, relationships among, **285**: 19-31
 - of keystone virus, **266**: 144-151
- Economic adaptations of a Cuban community, **293**: 194-205
- Economic analysis of West Indian slave societies, **292**: 597-609
- Economic growth in finite world, **261**: 73-80
- Economic relations between metropolitan countries and Caribbean, **292**: 567-580
- Economics
 - and drive towards emancipation in British West Indies, **292**: 123-131
 - of circum-Caribbean slavery, **292**: 143-144
 - of West Indies, Scots' role in, **292**: 94-106
 - Puerto Rican sugar, and slavery, **292**: 553-563
 - slave, in 17th-century British Caribbean, **292**: 72-83
- Ecosystems, aquacultural, **245**: 26-38
- Edinburgh spleen as validated Kveim-Siltzbach test material, **278**: 670-680
- Edrophonium, response to, and saccade fatigue, for diagnosis of myasthenia gravis, **274**: 631-641
- Edrophonium infrared optokinetic nystagmography in diagnosis of myasthenia gravis, **274**: 642-651
- Education
 - for human survival, **261**: 115-125
 - in modern Greece, **268**: 419-428
 - of children for environmental and "social" awareness, **261**: 250-252
 - priorities in, **261**: 238-241
- Educational knowledge, legitimacy of, **285**: 282-296
- Educational opportunities among Greek students, inequalities among, **268**: 385-394
- Educational program, alcohol, for general hospital, **273**: 442-452

- Eels
 electric organ of, phosphoenzyme complexes of $\text{Na}^+ + \text{K}^+$ -ATPase in, **242**: 106-119
 European, temperature-dependent epidermal tumors in, **298**: 245-260
 with and without stomatopapillomas, viruses of, **298**: 233-244
- Effluents, sewage, and tissue lesions of tiger salamanders, **298**: 270-279
- Eggs, red, white and blue, as models of porphyrin and heme metabolism, **244**: 570-590
- Ego, temporalization of, in 19th century, **291**: 140-148
- Einstein-Cartan theory of gravity, advances in, **262**: 241-245
- Einstein equations, exact, numerical integration of, **262**: 141-144
- Elastase
 α_1 -antitrypsin and α_2 -macroglobulin interacting with, **256**: 409-419
 polymorphonuclear, mediating degradation of cartilage proteoglycan, **256**: 254-262
- Elastolytic proteases, synthetic site-directed inhibitors of, **256**: 420-425
- E-layers, relativistic non-neutral, equilibrium and synchrotron emission properties of, **251**: 407-420
- Electric activity in brain, and inhalation of hashish, marijuana, and cannabis, **282**: 387-398
- Electric characteristics
 of high-energy/density-exploded wire plasmas, **251**: 632-648
 of ion transport in lipid bilayer membranes, **303**: 266-280
- Electric dichroism and birefringence of DNA, chromatin and their complexes with cationic dyes, **303**: 170-189
- Electric field, chemical transitions of biopolymers induced by, **303**: 190-197
- Electric field probe, miniature broad-band, **247**: 481-493
- Electric impedance of excitable membranes, **303**: 298-305
- Electric interaction with biological matter, **303**: 198-213
- Electric organ of eel, phosphoenzyme complexes of $\text{Na}^+ + \text{K}^+$ -ATPase in, **242**: 106-119
- Electric properties
 linear, of cells, **303**: 342-354
 of biological polymers, water, and membranes, **303**: 1-446
 of lipid bilayers in nonaqueous media, **303**: 295-297
- Electric stimulation of central olfactory structures, development of seizures after, **290**: 200-216
- Electric testing in diagnosis of myasthenia gravis, **274**: 203-222
- Electrocardiographic changes during ethanol withdrawal, **273**: 364-370
- Electrocorticograms, spectral analysis of, showing synchronization of cortical neurons, **247**: 82-86
- Electrodynamics, quantum
 and feasibility of high magnetic fields, **257**: 29-43
 in high magnetic fields, **257**: 16-28
- Electroencephalographic alpha activity and altered states of consciousness, **296**: 154-161
- Electroencephalographic sleep characteristics of chronic marijuana users, **282**: 348-374
- Electroencephalographic studies of microwave effects on nervous system, **247**: 109-116
- Electromagnetic confinement, **251**: 358-366
 experiments of, made at French A.E.C., **251**: 322-345
 of plasmas, **251**: 1-711
- Electromagnetic fields
 and homogenous axial cosmologies, **262**: 253-274
 effects of
 on fecundity in chicken, **247**: 391-400
 on microsomal ATPase and mitochondrial oxidative phosphorylation, **247**: 292-300
 interacting with biologic membranes, possible physical substrates for, **247**: 117-124
 radiofrequency, confinement of laser-produced plasma by, **251**: 381-393
 strong external, Compton scattering in, **257**: 72-76
- Electromagnetic high-temperature plasma traps, **251**: 152-178
- Electromagnetic properties of vacuum in static limit for strong magnetic fields, **257**: 95-107
- Electromagnetic radiation
 biologic, research directions in, **247**: 539-545
 effects of
 on brain and spinal cord of cats, **247**: 63-73
 on granulocytes *in vitro*, **247**: 275-281
 on hematopoietic stem cells of mice, **247**: 243-250
 on implantation and intrauterine development of rat, **247**: 352-366
 on nervous system, **247**: 15-20
 nonionizing, effects of, on single-cell biologic systems, **247**: 352-366
 overview of research in, **247**: 6-14
 weak, detected by mammalian vestibulocochlear apparatus, **247**: 182-193
- Electromagnetic ring in confinement of plasmas, **251**: 550-567
- Electron beam pinches near target, causes of, **251**: 234-237
- Electron beams
 equilibrium and synchrotron emission properties of, **251**: 407-420
 relativistic, **251**: 1-711
 heating of dense plasma by, **251**: 483-493
 high current, focused up to high densities, **251**: 668-678

- in excitation of gas lasers, **251**: 590-608
 in neutron production, **251**: 273-293
 in plasma, relaxation of, **251**: 458-471
 intense, **251**: 213-216
 autoacceleration of, **251**: 294-311
 interaction with deuterated polyethylene target, collective ion acceleration in, **251**: 238-272
 microwave production with, **251**: 441-457
 plasma heating by, and controlled fusion, **251**: 421-440
 production and focusing of, and controlled fusion, **251**: 609-622
- Electron-beam storage devices for controlled fusion, **251**: 568-581
- Electron cyclotron wave, monochromatic, in plasma, excitation of, **251**: 312-321
- Electronic control of oxygenation of heme proteins, **244**: 187-203
- Electronic technology and spread of public knowledge, **261**: 242
- Electron microscopic study
 of α -fetoprotein synthesis in hepatoma cells, **259**: 211-216
 of host-parasite interface, **266**: 497-512
 of immunocytochemical localization of gonadotropic hormones, **254**: 433-461
 of ouabain-inhibited, K-dependent ATPase activity in schistosome sporocysts, **266**: 465-479
- Electron paramagnetic resonance in studies of divalent cation, **264**: 112-123
- Electron rings, high-energy, for plasma confinement, **251**: 472-482
- Electrons, accelerated, classical radiation of, quantum viewpoint on, **257**: 7-15
- Electron transport and ascorbic acid, **258**: 190-200
- Electro-oculographic sleep characteristics of chronic marijuana users, **282**: 348-374
- Electrophoresis
 in detection of carcinoplacental alkaline phosphatase, **259**: 321-324
 polyacrylamide gel, to quantify neurophysins in rat with diabetes insipidus, **248**: 345-364
- Electrophorus*, acetylcholine receptors from, **274**: 108-115
- Electrophysiologic aspects of experimental myasthenia gravis, **274**: 337-353
- Electrophysiologic correlations with thymectomy in myasthenia gravis, **274**: 555-573
- Electrophysiologic studies of antibodies to acetylcholine receptors, **274**: 354-376
- Electrostatic confinement
 experimental developments in, **251**: 126-138
 at French A.E.C., **251**: 322-345
 of plasmas, **251**: 370-380
 spherical system of, using six ion guns, **251**: 179-189
 theoretical developments in, **251**: 139-151
 theoretical models of experiments in, **251**: 190-212
- Electrostatic high-temperature plasma traps, **251**: 152-178
- Elite distance runners (see Runners, elite distance)
- Ellipsometric study of protein film on chromium, **283**: 77-85
- Emancipation of slaves in British West Indies, role of evangelism in, **292**: 123-131
- Embryo
 cell systems of, effects of microwave radiation on, **247**: 401-407
 early chick, determination and differentiation of erythropoiesis in, **241**: 93-98
 early development of, role of $\text{Na}^+ + \text{K}^+$ -ATPase in, **242**: 543-559
 in determination of brain programming activity, **299**: 306-308
 yolk sac of chick, erythropoiesis in, **241**: 99-112
- Embryotoxicity, halogenated nucleoside, mechanisms of, **255**: 552-558
- Emission
 cyclotron, in hard x-ray spectrum of Her-1, **302**: 538-544
 gamma-ray, localized high-energy, COS-B observations of, **302**: 349-360
- Emission processes, x-ray, in close binary systems, **302**: 6-13
- Emissivities, neutrino, in supernovae, **262**: 65-79
- Empire and slavery, **292**: 3-11
- Encapsulation, fine structure of, in *Biomphalaria glabrata*, **266**: 446-464
- Encephalitis, *Herpesvirus hominis*, antiviral agents synergistic with humoral antibodies in, **284**: 321-334
- Encephalization, theory of, **299**: 146-160
- Encephalopathy, hepatic, and hyperammonemic coma, **252**: 116-123
- End plate, motor
 in myasthenia gravis and in experimental autoimmune myasthenia gravis, **274**: 60-79
 of normal and pathologic muscle, acetylcholine receptor at, **274**: 85-107
- End-plate potentials in experimental autoimmune myasthenia gravis, **274**: 300-318
- End-plate ultrastructure and acetylcholine blockade of neuromuscular junction, **274**: 46-59
- Endocrine thymus and autoimmune disease, **274**: 390-401
- Endocytosis of low-density lipoprotein in fibroblasts, **275**: 244-257
- Endometrial glycogenesis in organ culture, steroid induction of, **286**: 249-259
- Endometrium
 estradiol receptor and 17 β -dehydrogenase in, **286**: 190-198
 local treatment of, by progesterone, **286**: 226-232
 protein composition of, during stages of menstrual cycle, **286**: 233-248
- Endor experiments on chlorophyll and bacteriochlorophyll, **244**: 239-259
- β -Endorphin
 and related peptides, biologic action of, **297**: 115-130

- from pituitary, isolation, structure, synthesis and morphine-like activity of, **297**: 158-166
- Endorphins**
 - in brain and pituitary, **297**: 108-114
 - with opiate-like activity, **297**: 131-157
- Endothelial cells**
 - arterial hyperreactive, and treatment of atherosclerosis, **275**: 266-285
 - cultured human, in synthesis of factor VIII antigen, **240**: 62-69
 - in culture, biosynthesis of collagen and metabolism of lipids by, **275**: 104-113
- Endothelial surface charge related to thrombogenesis**, **275**: 47-63
- Endothelium**
 - and presence of contractile and relaxing proteins of smooth muscle and platelets, **275**: 78-86
 - vascular, recent studies of, **275**: 64-75
- Endurance exercise**
 - adaptive responses in muscle fiber to, **301**: 411-423
 - biochemical adaptations to, **301**: 440-450
 - effects of, on cytochrome *c* turnover in skeletal muscle, **301**: 431-439
- Endurance runners (see Runners, endurance)**
- Endurance sports, and longevity and health**, **301**: 653-655
- Endurance training regimen, effects of, on work capacity in prepubertal children**, **301**: 734-747
- Energy**
 - and food and feed, **261**: 150-158
 - microwave, distribution of, in man, **247**: 473-480
 - priorities in the field of, **261**: 32-40
 - radiofrequency, and whole-animal absorption, **247**: 532-538
- Energy conservation and utilization, influence of nonionic organic solutes on**, **243**: 24-37
- Energy coupling, role of ionophores in**, **264**: 61-82
- Energy loss, gravitational**
 - in binary systems, **302**: 557-564
 - in scattering problems, **302**: 557-564
- Energy policy, world**, **261**: 186-203
- in global framework, **261**: 186-203
- Energy resources**
 - and land constraints in food production, **300**: 26-32
 - world, **261**: 215-224
- Enlightenment and drive towards emancipation in British West Indies**, **292**: 123-131
- Enone iron-tricarbonyl complexes, chemistry of**, **295**: 254-270
- Enteritis, regional, and ascorbic-acid deficiency**, **258**: 483-490
- Entrainment of circadian rhythms, tonic and phasic effects of light on**, **290**: 51-59
- Environment**
 - and society in transition, **261**: 1-xxx
 - Archaic, in upper Susquehanna valley of New York, **288**: 392-399
 - influence of, on foot of long distance runner, **301**: 881-887
 - late Glacial, in western New York, **288**: 223-233
 - late Pleistocene, in Middle Atlantic region, **288**: 206-217
 - late Quaternary, and man in western New York, **288**: 297-315
 - protection of, and world public order, **261**: 81-114
 - public order of, **261**: 255-260
 - related to neoplasms
 - in marine animals, **298**: 374-388
 - in rainbow trout, **298**: 389-408
 - social, and obesity, **300**: 298-320
 - traditional and modern, and modernization-relevant values, **285**: 582-592
 - working, **261**: 183-185
- Environmental awareness, education of children for**, **261**: 250-252
- Environmental carcinogenesis**
 - in aquatic animals, **298**: 280-289
 - studies of, in Great Lakes fishes, **298**: 261-269
- Environmental carcinogens as mutagens, method for detecting**, **271**: 5-13
- Environmental chemical mutagens, potential, detected by *Drosophila***, **269**: 26-33
- Environmental concerns beyond the workplace**, **246**: 296-302
- Environmental control, legal approaches to**, **250**: 182-185
- Environmental crisis, responsibility of the university in**, **261**: 137-146
- Environmental influences in ascorbic acid requirements in animals**, **258**: 151-168
- Environmental interference with effects of marijuana**, **281**: 219-228
- Environmental pollutants, assessment and mechanism of**, **298**: 141-158
- Environmental Protection Agency, philosophy of, in regulating human exposure to carcinogens**, **298**: 583-586
- Environmental significance of fin erosion in demersal fishes**, **298**: 177-189
- Enzyme activities in elite distance runners**, **301**: 323-327
- Enzyme complex, cardiac glycoside, nature of**, **242**: 577-597
- Enzyme conversion of 1,2,4-triazole-3-carboxamide to ribavirin-5'-phosphate**, **284**: 201-210
- Enzyme formation of bilirubin**, **244**: 533-552
- Enzyme markers, antibody formation with**, **254**: 175-189
- Enzyme oxidation of diethyldithiocarbamate by xanthine oxidase**, **273**: 212-218
- Enzyme release from polymorphonuclear leukocytes, cyclic nucleotides in modulation of**, **256**: 222-232
- Enzymes**
 - angiotensin-converting
 - elevated in granulomatous lymph nodes and serum in sarcoidosis, **278**: 498-513

- serum elevations of, in sarcoidosis, **278**: 488-497, 498-513
- carcino-fetal, biochemical and immunologic studies of, **259**: 287-297
- complement-derived, inhibition of, **256**: 441-450
- connective-tissue-degrading, of human leukocytes, **256**: 233-253
- cytoplasmic, and platelet protein kinase phosphorylation reaction, **283**: 159-174
- effects of microwave radiation on, **247**: 301-304
- lysosomal (*see* Lysosomal enzymes)
- Enzyme system, $\text{Na}^+ + \text{K}^+$ -activated, catalytic activity of, **242**: 168-184
- Eosinophilic granuloma of lung and external pulmonary granulomatosis, **278**: 612-617
- Epidemics
- agricultural, pest and disease, in Japan, **287**: 35-44
 - crop
 - genetic interdependence of host and parasite in, **287**: 97-106
 - in India, and genetic vulnerability, **287**: 72-85
 - disease, and host genetic resistance in British crops, **287**: 21-28
 - genetic basis of, in agriculture, **287**: vii-400
 - of Hessian flies, genetic basis for, **287**: 223-229
 - powdery mildew, population genetics of, **287**: 151-163
- Epidemiologic implications of antityphus antibodies modified through gut of louse, **266**: 6-24
- Epidemiologic investigations of alcohol and cancer of head and neck, **252**: 374-377
- Epidemiologic perspective on vectors and vertical transmission, **266**: 173-194
- Epidemiologic study
- of blood screening tests and illness history of PVC workers, **246**: 80-87
 - of cancer mortality in rubber workers, **271**: 125-137
 - of chloroethers, summary of, **271**: 81-90
 - of α -fetoprotein and hepatitis B antigen in Nagasaki, **259**: 239-247
 - of physical activity, **301**: 519-549
 - of relationship of physical activity to aging, health, and mortality, **301**: 703-719
 - of vinyl chloride, **246**: 225-267
- Epidemiology (*see also* Seroepidemiology)
- analytic, of sarcoidosis in Asia and Africa, **278**: 355-367
 - crop, contribution of mathematical models to, **287**: 164-180
 - descriptive, of sarcoidosis in Asia and Africa, **278**: 347-354
 - nutritional, of cardiovascular disease, **300**: 335-359
 - of Diptera-borne disease, inherited infection in, **266**: 115-124
- Epidermal tumors in European eel, temperature-dependent, **298**: 245-260
- Epigenesis of conversational interaction, infant-mother exchanges as, **263**: 89-100
- EPIMUL76, and role of crop populations, **287**: 164-190
- Epistemology, genetic, and developmental psychology, **291**: 332-341
- Epithelial cells
- smooth muscle contractile protein antigens in, **254**: 489-504
 - thymic, differentiation of T-cells by, **249**: 492-498
- Epithelioid cells, giant cells, and sarcoidosis, **278**: 3-6
- Epithelioma, occupational aspects of, **271**: 138-142
- Epithelium, oral mucosal, collagen biosynthesis of, and ascorbic acid deficiency, **258**: 253-263
- Epstein-Barr virus-associated antigens, **254**: 516-522
- Equations
- Einstein, numerical integration of, **262**: 141-144
 - of state for condensed matter in very strong magnetic field, **257**: 85-94
 - Poisson, for biomolecules of arbitrary shape, polarizability density and charge distribution, **303**: 22-37
- Equestron as Achilles' heel for chemotherapy of picornavirus infections, **284**: 638-649
- Equilibrium components of ion permeability mediated by nactin- and valinomycin-type carriers with some methylation, **264**: 34-60
- Equilibrium dialysis studies of hormone-neurophysin binding, **248**: 451-457
- Equilibrium of intense relativistic non-neutral E-layers and electron rings, **251**: 407-420
- Erosion of fin in demersal fishes, environmental significance of, **298**: 177-189
- Erythema nodosum, circulating immune complexes in, **278**: 212-219
- Erythroblasts, mouse spleen, globin mRNA of, **241**: 170-182
- Erythrocyte cells, oxygen binding to, **244**: 60-71
- Erythrocyte membranes
- ATPase and phosphatase activities of, effects of Ca^{2+} on, **242**: 317-323
 - mammalian, Na^+ -ATPase of, **242**: 305-316
- Erythrocytes (*see also* Red cells)
- adhesion of, to luminal surface of blood vessels, **283**: 179-207
 - amniotic fluid, sickle cell hemoglobin phenotypes in, **241**: 699-713
 - deer, mechanism of sickling in, **241**: 605-613, 614-622
 - incorporation of analog purine nucleosides into, **255**: 412-434
 - in uptake and reduction of dehydroascorbate, **258**: 238-242
- Erythrocyte surface antigens and cation transport, **242**: 324-342
- Erythroid differentiation in murine virus-induced leukemic cells, stimulated by DMSO, **243**: 155-163

- Erythropoiesis**
 and Na⁺-ATPase of mammalian erythrocyte membranes, **242**: 305-316
 in early chick embryo, determination and differentiation of, **241**: 93-98
 in yolk sac of chick embryo, beginnings of, **241**: 99-112
 ontogeny of, in fetal mouse, **241**: 113-118
- Erythropoietin** in A → C switch in sheep hemoglobin, **421**: 556-565
- Escherichia coli*, streptomycin-sensitive and -resistant, effect of DMSO on, **243**: 269-277
- Escherichia coli* B, ethionine-treated cells of, and incompletely methylated tRNA, **255**: 567-575
- Estradiol receptor** in endometrium, **286**: 190-198
- Estrogen**
 effects of, on ovalbumin synthesis, in withdrawn oviduct, **286**: 116-124
 in formation of progesterone receptor, **286**: 210-225
- Estrogen-binding properties** of α -fetoprotein, **259**: 119-130
- Estrogen-induced renal tumor**, experimental, progesterone receptor in, **286**: 369-383
- Estrogen receptor**, replenishment of, by progesterone, **286**: 161-179
- Estrogen receptors** in female genital tract, **286**: 180-189
- Estuaries** in Oregon, neoplastic disease in bivalve mollusks from, **298**: 356-373
- Estuarine fishes**, in polluted habitats of Mississippi, parasites and diseases of, **298**: 427-462
- Estuarine mollusks**, neoplasms in, **298**: 225-233
- Estuarine shrimp**, *Baculovirus* infections in, **266**: 528-536
- Estuary**, Hudson
 circulation in, **250**: 39-111
 geomorphology of, **250**: 5-38
 invertebrates of, **250**: 137-143
- Ethanol** (see also Alcohol)
 and serotonin metabolism and body temperature, **273**: 247-255
 effects of
 on intestinal absorption, **252**: 228-234
 on kinetic parameters of brain Na⁺ + K⁺-activated ATPase, **273**: 331-337
 inducing alterations of dopamine metabolism in rat liver, **273**: 219-226
 influence of, on human catecholamine metabolism, **273**: 263-279
 ingestion of, acute and chronic effects of, on choline oxidation, **273**: 194-204
 interactions of, with narcotics and narcotic antagonists, during acute, chronic, and withdrawal states, **281**: 297-310
 interference of
 in cellular metabolism, **252**: 11-20
 with hepatic cellular metabolism, **252**: 24-50
 maternal consumption of, and fetal hepatic metabolism in rat, **273**: 175-187
 physiologic responses to, among Tarahumara Indians, **273**: 151-158
 rats exposed to *in utero*, biochemical and behavioral changes in, **273**: 328-330
 respiratory or analgesic actions of, modulated by biogenic amines, **273**: 256-262
 responses of heart cells to, **252**: 250-263
 withdrawal of, and EKG changes, **273**: 364-370
- Ethical issues**
 influencing acceptance and rejection of cross-cultural researchers, **285**: 185-202
 in priority-setting for use of genetic technologies, **265**: 22-45
 posed by human use of molecular genetics, **265**: 1-208
- Ethical responsibility** in science in face of uncertain consequences, **265**: 1-12
- Ethics** in research on hypnosis and antisocial conduct, **296**: 90-104
- L-Ethionine-dependent inhibition** of N⁶-dimethyladenosine and 5-methylcytidine synthesis on tRNA level, **255**: 564-566
- Ethionine-treated cells** of *Escherichia coli* B, incompletely methylated tRNA in, **255**: 567-575
- Ethnic groups**
 different hepatocellular carcinoma risks in, and α -fetoprotein levels, **259**: 136-155
 individual modernity in, **285**: 538-564
- Ethnic identity**, theoretical and methodological problems in study of, **285**: 32-45
- Ethnic mosaic** in southeast Peloponnese, and folk culture of Maniat, **268**: 199-206
- Ethnic preferences** in alcoholism treatment in Hawaii, **273**: 653-658
- Ethnography**
 of Messenia, **268**: 158-167
 of modern greece and Cyprus, **268**: 3-9
 of the Greek islands, **268**: 289-290
 of Thera, **268**: 328-340
 of Tinos, **268**: 314-327
- Ethological theory** of origin of vocal learning, **280**: 386-395
- α , β -Ethylene ketones, α , β -dialkylation of, **295**: 249-253
- Etiology**, infectious, of rheumatoid arthritis, **256**: 25-38
- Euphoriant drug**, neurochemical basis for alcohol as, **273**: 159-166
- Europe**
 alcoholism in, **273**: 24-32
 roots of American psychology in, **291**: 56-65
 sarcoidosis in, **278**: 335-346
 socio-psychological variables in, related to those of Japan and the United States, **285**: 221-226
- Eutrophication** of freshwater lakes, biological and chemical mechanisms in, **250**: 129-135
- Evangelism** and drive towards emancipation in British West Indies, **292**: 123-131
- Evaporation** of black holes, and particle detectors, **302**: 186-190

Evolution

- and lateralization of the brain, **299**: 1-501
- anthropological perspective on, **299**: 424-447
- cosmic, of radio-source populations, **302**: 656-664
- galactic
 - atoms as monitors of, **262**: 2-20
 - cosmologic significance of, **262**: 436-448
- geomorphologic, of lower Shenandoah valley, **288**: 189-193
- of brain, **299**: 23-25, 477-501
 - and development of self-conscious mind, **299**: 161-179
 - and locomotion in gastropod molluscs, **299**: 26-34
- of brain asymmetry, and territoriality, **299**: 213-221
- of consciousness and lateral specialization, **299**: 397-411
- of human communication, role of primates in, **280**: 467-480
- of language, **280**: 58-60, 598-603
 - critical stages in, **280**: 445-455
 - in Late Pleistocene, **280**: 312-325
 - interactive models for, **280**: 660-672
- of language lateralization and cognitive function, **280**: 810-820
- of laryngeal folding, **280**: 650-657
- of massive x-ray binaries, **302**: 47-54
- of speech function, **280**: 456-466
 - and auditory perception, **280**: 708-717
- of star, binary, mass transfer effects in, **302**: 36-46
- of x-ray binaries and their progenitor systems, **302**: 14-35
- Examination, medical, of elite distance runners, **301**: 283-296
- Exchange mechanism, Cl^- - HCO_3^- , in gastric mucosa, **264**: 442-455
- Excitation
 - of gas lasers, relativistic electron beams in, **251**: 590-608
 - of membrane, through voltage-induced aggregation of channel precursors, **264**: 247-264
 - of photoreceptors, ionic mechanisms in, **264**: 314-325
- Excitation-contraction coupling and dielectric properties of muscle membrane, **264**: 278-292
- Exercise
 - adaptive response to, interplay between factors in, **301**: 224-231
 - amino acid metabolism during, **301**: 56-63
 - cardiovascular responses to, muscle receptors in, **301**: 232-242
 - chronic, and personality of adults, **301**: 958-969
 - endurance
 - adaptive responses in muscle fiber to, **301**: 411-423
 - and cytochrome c turnover in skeletal muscle, **301**: 431-439
 - biochemical adaptations to, **301**: 440-450
 - glucose turnover during, **301**: 45-55
 - hyperthermia of, physiologic defenses against, **301**: 98-109
 - mode of, and skin temperature, **301**: 110-127
 - myocardial blood flow and oxygen consumption during, **301**: 213-223
 - prolonged
 - central circulatory function during, **301**: 189-194
 - free fatty acid turnover and availability of substrates in, **301**: 64-71
 - hormonal regulation during, **301**: 72-80
 - intramuscular substrate utilization during, **301**: 30-44
 - regulation of skin circulation during, **301**: 195-212
 - renal function during, **301**: 151-159
 - pulmonary adaptation to, **301**: 243-261
 - sustained, intra- and extracellular fuel supply during, **301**: 81-91
 - submaximal and maximal, aerobic responses of female distance runners to, **301**: 726-733
- Exercise training, effects of
 - on coronary arteriosclerosis, **301**: 495-508
 - on development of fatigue, **301**: 424-430
- Exhaustion syndrome, adrenal, **301**: 910-930
- Exotoxin, immune response to, and T and B lymphocytes in, **249**: 404-412
- Expansion, Hubble, anisotropy in, **302**: 408-422
- Experimental method, limitations of, in hypnosis research, **296**: 60-68
- Experimentation, need for, in cross-cultural research, **285**: 104-118
- Experiments, design and analysis of, for assessment of drug interactions, **281**: 118-135
- Extinction of peccaries, **288**: 538-544
- Extragalactic x-ray sources, **262**: 361-366; **302**: 300-311
- Extraterrestrial origin of $\bar{\nu}_e$ signals, search for, **262**: 219-224
- Extremities, venous disorders of, DMSO for, **243**: 403-407
- "Extroverted" alcoholics, drinking in, **273**: 481-487
- Eye
 - microwave irradiation of, dielectric lens for, **247**: 142-154
 - of rat, application of DMSO to, **243**: 151-154
- Fab conjugates, antihuman, in detection of tissue autoantibodies by immunofluorescence, **254**: 66-68
- Factor 3 activity after surface injury and shear stress, **283**: 138-158
- Factor VIII, **240**: 70-73
 - bovine, isolation, subunit structure and proteolytic modification of, **240**: 43-61
 - human
 - effect of clotting on structure and function of, **240**: 79-83
 - molecular structural studies of, **240**: 8-33

- immunologic methods for measuring, implications of, **240**: 97-108
- in treatment of life-threatening hemorrhage in patients with Factor VIII antibodies, **240**: 362-369
- molecular biology of
 - clinical approach to, **240**: 370-377
 - theoretical approach to, **240**: 378-388
- problems with, **240**: 165-171
- subunits of, **240**: 84-85
- Factor VIII antibodies
 - and immunosuppressive therapy, **240**: 389-399
 - characterization of, **240**: 350-361
- Factor VIII antigen, synthesis of, by cultured human endothelial cells, **240**: 62-69
- Factor VIII concentrate for treatment of classical hemophilia, **240**: 188-190
- Factor VIII inhibitors
 - hemophiliacs with, cyclophosphamide in management of, **240**: 412-418
 - treatment of hemophiliac patients with, **240**: 400-404, 407-411
- Factor IX (*see also* Christmas factor)
 - bovine, properties of, **240**: 34-42
 - problems with, **240**: 172-180
- Factors
 - coagulation
 - at phospholipid surfaces, **283**: 104-110
 - role of surface in activation in, **283**: 88-92
 - Hageman, contact activation of, **283**: 93-103
 - serum protective, antiviral humoral substance as, **284**: 418-430
- Faculae, solar, measuring excess brightness by, **262**: 481-489
- Familial arrangements in mankind, **261**: 227-237
- Familial factors that maintain alcohol abuse, **273**: 497-506
- Familial groupings of slaves on Good Hope plantation, **292**: 242-258
- Familial sarcoidosis
 - possible genetic influence in, **278**: 386-400
 - possible mechanism of inheritance in, **278**: 371-376
- Familial social change in Israeli kibbutz, **285**: 605-611
- Familial violence and societal morphogenesis in cross-cultural perspective, **285**: 717-730
- Family
 - in Athens, and regional variations, **268**: 410-418
 - in plantation society in 18th-century Mexico, **292**: 226-241
 - slave, methodological problems in study of, **292**: 591-596
- Famine, dealing with, **300**: 69-86
- Farmers of Karpofora, reluctant, on fertile land, **268**: 207-221
- Farming in prehistoric Greece, cultural ecological perspective on, **268**: 127-142
- Fatigue
 - development of, effects of exercise-training on, **301**: 424-430
 - saccade, and response to edrophonium for di-
- agnosis of myasthenia gravis, **274**: 631-641
- Fat-modified diet in prevention of atherosclerosis, **300**: 379-382
- Fatty acid turnover in prolonged exercise, **301**: 64-71
- Fatty liver and alcohol, **252**: 63-84
- Fe³⁺, utilization of, by *Cryptocodium cohnii*, **245**: 16-25
- Feces, detection of Salmonellae in, by immunofluorescence, **254**: 350-368
- Fechnerian psychophysics in America, vicissitudes of, **291**: 21-32
- Fecundity (*see also* Fertility)
 - in chicken, effects of electromagnetic fields on, **247**: 391-400
- Federal employees, ischemic heart disease in, related to physical activity, **301**: 627-641
- Federal government (*see* Government)
- Feed, food and energy, **261**: 150-158
- Feedback actions
 - adrenal steroid, on neuroendocrine tissues, **297**: 568-579
 - corticosteroid, **297**: 580-590
- Feeding, infant, and decline of human lactation, **300**: 197-209
- Feeding behavior in pigeon, and tonic and phasic effects, **290**: 331-347
- Female anthropologists, **293**: 25-50
- Female distance runners, aerobic responses of, to exercise, **301**: 726-733
- Feminist perspective on social-science models of contemporary society, **260**: 84-100
- Ferrimyoglobin reactions, thermodynamic probes of, **244**: 35-50
- Ferritin
 - antiserum, antiplacental, for cancer diagnosis, **259**: 446-449
 - serum, radioimmunoassay in, in patients with cancer, **259**: 450-452
- Ferrocene-arene reactions, and hydrogenation of aromatic ligands, **295**: 192-200
- Fertility (*see also* Fecundity)
- Fetal alcohol syndrome
 - cause and frequency of, **273**: 138-139
 - clinical delineation of, **273**: 130-137
 - pilot prospective study at Boston City Hospital, **273**: 118-129
 - psychologic handicaps in children with, **273**: 140-145
- Fetal hemoglobin, human
 - multiple cistrons for, **241**: 70-79
 - significance of, in disease, **241**: 638-652
- Fetal hepatic metabolism in rat, and maternal ethanol consumption, **273**: 175-187
- Fetal IgM, specificity of, **254**: 77-93
- Fetal membranes, progesterone binding and metabolism in, **286**: 304-312
- Fetal pathophysiology of human α -fetoprotein, **259**: 59-73
- Fetal tissue
 - bone marrow and blood immunoglobulin de-

- terminants on, lymphocytes in, **254**: 262-279
- inhibition of growth in, in newborn recipients, **276**: 328-342
- α -Fetoprotein
- and albumin synthesis during cell cycle, **259**: 37-44
- and hepatitis B antigen in hepatocarcinogenesis, **259**: 156-167
- and histologic changes of hepatic tissue in DAB-hepatocarcinogenesis, **259**: 156-167
- biosynthesis of, and growth state of hepatocyte cultures, **259**: 45-58
- from man and mammals, immunologic and chemical correlations between, **259**: 109-118
- homologous, immunogenicity of, **259**: 85-94
- human, fetal pathophysiology of, **259**: 59-73
- increased production of, after CCl_4 intoxication and partial hepatectomy, **259**: 80-84
- in hepatitis and liver cirrhosis, clinical significance of, **259**: 234-238
- in hepatoma and hepatitis, **259**: 259-260
- in immunochemical analysis of isoproteins, **259**: 131-135
- in Nagasaki, epidemiologic study of, **259**: 239-247
- in yolk sac tumor, **259**: 221-233
- levels of, in different ethnic groups, and hepatocellular carcinoma, **259**: 136-155
- liver differentiation and estrogen-binding properties of, **259**: 119-130
- normal biology of, **259**: 7-16
- rat, microheterogeneity of, **259**: 95-108
- serum levels of
- evolution of, in man and rats, **259**: 17-28
- in early stages of hepatocellular carcinoma, **259**: 248-252
- synthesis of
- and Yoshida sarcoma and ascites hepatoma, **259**: 74-79
- by rat ascites hepatoma cells, **259**: 29-36
- in hepatoma cells, immunoelectronmicroscopic study of, **259**: 211-216
- α -Fetoprotein-producing cells
- in experimental liver cancer, **259**: 217-220
- in hepatitis and liver cirrhosis, **259**: 253-258
- Fetus
- clinical effects of pharmacologic agents on, **281**: 74-89
- early human *in utero*, detection of hemoglobins in, **241**: 714-721
- human, adult hemoglobin synthesis in, **241**: 691-698
- mouse, hemoglobin in, **241**: 683-690
- Fiber
- asbestos, exposure to, in hard-rock gold mine, **271**: 345-352
- dietary, action of, **300**: 283-289
- muscle, adaptive responses in, to endurance exercise, **301**: 411-423
- nerve, microtubules in growth and stabilization of, **253**: 535-544
- Fiber bundles and magnetic monopoles and gauge fields, **294**: 86-97
- Fiberoptic liquid crystal probe for absorbed radio-frequency power temperature measurement, **247**: 527-531
- Fiber types of skeletal muscles in sedentary man and endurance runners, **301**: 3-29
- Fibroblasts
- cultured, collagen synthesis in, and ascorbic acid, **258**: 288-306
- human, ascorbic-2-sulfate metabolism by, **258**: 307-313
- low-density lipoprotein in, **275**: 244-257
- prolyl hydroxylase, activated by ascorbic acid, **258**: 278-287
- Fibrous glass production workers, mortality patterns among, **271**: 324-335
- Field fluctuation of ionic solutions, biological significance of, **303**: 38-46
- Fields (*see specific field*)
- Field theory, quantum, in curved space-time, **302**: 114-157
- Fieldwork
- anthropological
- on Cyprus, future, **268**: 355-362
- sociological and geographical, in Cyprus, **268**: 345-354
- multidisciplinary collaboration in, in Australia, **285**: 707-710
- Film
- Kypseli: Women and Men Apart, A Divided Reality*, discussion of, **268**: 382-384
- protein, on chromium, ellipsometric study of, **283**: 77-85
- Fin erosion in demersal fishes, environmental significance of, **298**: 177-189
- Fishermen, sponge, on island of Kalymnos, **268**: 291-307
- Fishes
- demersal, fin erosion in, **298**: 177-189
- diseases in, and chemical pollutants, **298**: 535-546
- estuarine, in polluted habitats of Mississippi, parasites and diseases of, **298**: 427-462
- health of, **245**: 4-15
- hemoglobins in, structure, function and molecular ecology of, **241**: 472-490
- in Bering Sea, diseases in, **298**: 290-304
- in Great Lakes, studies of environmental carcinogenesis in, **298**: 261-269
- marine, neoplasms and other diseases in, **298**: 210-224
- utilization of ascorbic acid in, **258**: 81-102
- Fitness determination in predicting coronary heart disease, **301**: 642-652
- Flagellar axonemes, assembly of chick-brain tubulin onto, **253**: 147-177
- Flagellar microtubules, assembly of, **253**: 178-191
- Flagellar tubulin, synthesis of, during cell differentiation in *Naegleria*, **253**: 318-332

- FL amnion cells, isozyme from, compared with Kasahara isozyme, **259**: 337-346
- Flavonoids, action of, against viruses, **284**: 358-364
- Flea, oriental rat, murine typhus rickettsiae in, **266**: 35-60
- Flint Run Paleoindian complex, and eastern North American prehistory, **288**: 257-263

- Glycogenesis, endometrial, steroid induction of, **286**: 249-259
- Glycogen phosphorylase isozymes in hepatomas, carcinofetal alterations in, **259**: 273-286
- Glycols in regulation of mitotic apparatus, **253**: 362-377
- Glycoside effects on ionic exchange in perfused mammalian heart, **242**: 688-692
- Glycoside enzyme complex, cardiac, nature of, **242**: 577-597
- Goats, hemoglobin switching in, molecular mechanism in, **241**: 566-581
- Gold miners
exposed to asbestiform mineral, mortality among, **271**: 336-344
exposed to asbestos fiber, **271**: 345-352
- Gonadotropic hormones localized with antisera against ovine FSH, LH, LH α , and LH β , **254**: 433-461
- Gonadotropin release, role of progesterone in, **286**: 331-354
- Good Hope plantation, family and kinship groupings of slaves on, **292**: 242-258
- Gougerot-Sjögren syndrome and sarcoidosis, **278**: 401-405
- Government
as partner with science in setting science public policy, **260**: 53-61
British, and occupational health, **271**: 220-227
integrated program of, in prevention of occupational carcinogenesis, **271**: 198-199, 208-213, 214-215
of United States, food regulatory difficulties of, **300**: 406-410
role of, in prevention of occupational cancer in mines and mills, **271**: 216-219
- Grammar, place of, in theory of performance, **263**: 171-177
- Granules
neurosecretory (see Neurosecretory granules)
secretory, hexosamine, calcium and neurophysin in, **248**: 202-217
- Granulocytes
basophil, cell surface IgE on, **254**: 462-475
function of, alterations in, after incubation with L-ascorbic acid, **258**: 329-338
in vitro, effect of electromagnetic radiation on, **247**: 275-281
- Granuloma
eosinophilic, of lung, and external pulmonary granulomatoses, **278**: 612-617
hepatic, problems of interpretation of, **278**: 427-432
induction of, by inoculations of tissue homogenates from patients with inflammatory bowel disease and sarcoidosis, **278**: 560-564
sarcoid
immunologic identification of subpopulations of mononuclear cells in, **278**: 136-146
morphology and distribution of cells of, **278**: 147-160
sarcoid-specific, transmissibility of, **278**: 249-259
- Granulomatosis
external pulmonary, and eosinophilic granuloma of lung, **278**: 612-617
midline and Wegener's, **278**: 618-635
pulmonary sarcoid-like, lung water and capillary permeability in, **278**: 308-320
- Granulomatous diseases of lung, problems in differential diagnosis of, **278**: 528-531
- Granulomatous disorders
in man, challenge of, **278**: 1-2
of lymphoid system, lymphocyte circulation disturbances in, **278**: 19-28
- Granulomatous inflammation
experimentally induced, serum lysozyme and β -glucuronidase in, **278**: 592-598
functional classification of, **278**: 7-18
- Granulomatous lymph nodes, elevation of angiotensin-converting enzyme in, **278**: 498-513
- Gravitation
quantum, problems and prospects of, **262**: 292-295
with strong interactions, gauge unification of, **294**: 12-36
- Gravitational collapse
approach to, **262**: 47-53
understanding of magnetism in, and magnetic collapse, **257**: 189-221
- Gravitational energy loss in scattering problems, **302**: 557-564
- Gravitational fields, particle creation by, **262**: 298
- Gravitational microwave deflection, solar measurement of, **262**: 493

- Gravitational radiation
 and damping and energy loss in binary systems, **302**: 557-565
 black holes with, **302**: 569-604
 Gravitational waves and black holes, **262**: 275-283
 Graviton creation in early universe, **302**: 439-444
 Gravity, Einstein-Cartan theory of, advances in, **262**: 241-245
- Great Lakes
 fishes of, environmental carcinogenesis studies in, **298**: 261-269
 marine mammals in, **288**: 508-537
 Great Lakes Paleoindian at Parkhill site, Ontario, **288**: 349-354
 Great Lakes region, Late Wisconsin glacial retreat in, **288**: 70-89
- Greece
 modern
 dynamics of regional integration in, **268**: 10-15
 "over-education" in, **268**: 419-428
 regional studies and ethnography of, **268**: 3-9
 modernization in, barriers to development of, **268**: 28-42
 prehistoric, farming and foraging in, **268**: 127-142
 regionalism and local community in, **268**: 18-27
 social structure in, **268**: 429-441
 Greek island, social interaction in village on, **268**: 308-313
 Greek islands, ethnography of, **268**: 289-290
 Greek society, modern, relevance of concept of class to, **268**: 395-409
 Greek students, aspects of inequality of educational opportunities among, **268**: 385-394
 Green Revolution, food production and high-frequency irrigation, **300**: 121-128
 Growth in rats and chronic exposure to alcohol, **273**: 205-211
 Grunts of baboons and nonhuman primates, use of formants in, **280**: 673-693
 Guanosine, nucleosides resembling, synthesis and biological activity of, **255**: 166-176
 Gulls, communication behavior of, complexities in, **280**: 413-432
- H**
 Hafnium, organic derivatives of, photochemical studies on, **295**: 103-109
 Hageman factor, human, contact activation of, **283**: 93-103
 Hagfish, Atlantic, hepatomas and other neoplasms in, **298**: 342-355
 Haiti, marronage and revolution in, **292**: 420-438
 Halides, organic, oxidative addition of, to group-VIII transition metal complexes, **295**: 52-58
 Hallucinogens, interactions of
 at clinical level, **281**: 456-486
 with other drugs, **281**: 487-489
 5-Halo-5'-amino-deoxyribonucleosides, antiviral properties of, **284**: 335-341
 Haloethers, comparative metabolism of, **298**: 111-123
 5-Halogenated analogs of deoxycytidine in inhibition of replication of varicella-zoster virus, **284**: 389-395
 Halogenated benzenes, and xenobiotic metabolism and toxicity of other chemicals, **298**: 159-169
 Halogenated nucleoside embryotoxicity, mechanisms of, **255**: 552-558
 Halogenating agent of chloroperoxidase, model for, **244**: 94-106
 Handedness and cognitive ability, **299**: 233-243
 Handicaps, psychologic, in children with fetal alcohol syndrome, **273**: 140-145
 Haptoglobin, biosynthesis of, and growth state of hepatocyte cultures, **259**: 45-58
- Hashish
 acute and chronic inhalation of, and brain electrical activity, **282**: 387-398
 three-day abstinence period from, experimental observations of, **282**: 113-120
- Hashish users
 cognitive, perceptual and motor performance in, effects of cannabis on, **282**: 313-322
 heavy
 medical status of, **282**: 168-172
 social traits of, **282**: 17-23
 incidence of mental illness in, **282**: 58-63
 Hawaii, alcoholism treatment in, ethnic preferences in, **273**: 653-658
- Head and neck, cancer of
 and alcohol, **252**: 374-377
 neuraminidase-treated tumor vaccine and bacillus Calmette-Guérin for, **277**: 339-344
- Head lice, virulence of *Rickettsia prowazeki* for, **266**: 25-34
- Healing response of injured arteries, **283**: 310-316
- Health
 and endurance sports, **301**: 653-655
 in mankind, **261**: 227-237
 occupational, action of British government in, **271**: 220-227
 related to physical activity, epidemiologic studies of, **301**: 703-719
- Health aspects of organic contaminants in reused waste water, **298**: 561-573
- Health care
 continuum of, and nutrition and aging, **300**: 290-297
 delivery of, in hemophilia, **240**: 201-207
- Health implications of water contaminants, **298**: 557-560
- Health parameters in guinea pigs, effects of ascorbic acid on, **258**: 339-354
- Health status of heavy chronic cannabis users, **282**: 148-161, 162-167
- Heart
 cellular responses of, to ethanol, **252**: 250-263

- function of, and cardiac glycosides, and $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 740-741
- metabolic effects of alcohol on, **252**: 243-249
- perused mammalian, glycoside effects on, **242**: 688-692
- Heart cells in tissue culture and action of digoxin, **242**: 703-707
- Heart disease
- alcoholic, **252**: 237-242
 - natural history of, **252**: 264-272
 - coronary
 - deaths anticipated from, in marathon runners, **301**: 620-626
 - in marathon runners, **301**: 593-619
 - predicted by fitness and stress testing, **301**: 642-652
 - related to physical activity, **301**: 561-578 - ischemic, related to physical activity in Federal employees, **301**: 627-641
- Heart $\text{Na}^+ + \text{K}^+$ -ATPase, high-activity, binding and dissociation in, **242**: 577-597
- Heart syndrome, athlete's, **301**: 931-941
- Heat
- tolerance to, of female distance runners, **301**: 777-792
 - training in, potassium deficiency during, **301**: 175-182
- Heating of plasma by relativistic electron rings, **251**: 421-440, 483-493
- Heat stress injury, acute, in runners, metabolic and hemodynamic alterations in, **301**: 262-269
- Heat stroke and hyperthermia in marathon runners, **301**: 128-138
- Heat-work tolerance in distance runners, **301**: 139-150
- Heavy metals, toxicity of, ascorbic acid protection against, **258**: 144-150

- boarding school for, **240**: 226-237
- degenerative joint disease in, **240**: 340-341
- demand on blood resources by, magnitude of problem of, **240**: 155-161
- dental extractions in, use of epsilon-aminocaproic acid in, **240**: 267-276
- hemarthrosis in, **240**: 342-343
- in school, **240**: 238-245
- personal experience with, **240**: 181-187
- reconstructive surgery in, **240**: 291-294, 295-310
- synovectomy in, **240**: 338-339
- treated with Factor VIII inhibitor, **240**: 400-404, 407-411
- cyclophosphamide in management of, **240**: 412-418
- Hemophilic arthropathy and degenerative joint diseases, biochemical and physiologic aspects of, **240**: 285-290
- Hemophilic pseudotumor, characterization of, **240**: 311-315
- Hemoproteins (see Heme proteins)
- Hemorrhage
- life-threatening, in patients with Factor VIII antibodies, use of animal AHG concentrates in, **240**: 362-369

- release of ACTH in response to, neural control of, **297**: 477-497
- HeNe laser in measurement of cell migration, **267**: 152-159
- Heparinized surfaces, comment on, **283**: 404-409
- Hepatotomy, partial, and CCl_4 intoxication, α -fetoprotein production after, **259**: 80-84
- Hepatic cellular metabolism, interference of ethanol in, **252**: 24-50
- Hepatic coma, and action of methanethiol on $\text{Na}^+ + \text{K}^+ \text{ATPase}$, **242**: 573-576
- Hepatic encephalopathy and hyperammonemic coma, **252**: 116-123
- Hepatic glycoferroprotein, clinical significance of, **259**: 417-426
- Hepatic granulomas, problems of interpretation of, **278**: 427-432
- Hepatic iron-storage disease, and alcoholism, **252**: 124-134
- Hepatic metabolism, fetal, in rat, and maternal ethanol consumption, **273**: 175-187
- Hepatic tissue, histologic changes in, in DAB-hepatocarcinogenesis, and α -fetoprotein, **259**: 156-167
- Hepatic transplantation, current policies in, **252**: 145-158
- Hepatitis, alcoholic, **252**: 63-84
and immunologic reactivity, **252**: 106-115
blood-transmitted, **240**: 191-200
 α -fetoprotein in, **259**: 234-238
and hepatitis B antigen in, **259**: 259-260
 α -fetoprotein-producing cells in, **259**: 253-258
viral
acute effect of ribavirin on, **284**: 278-283
in laboratory animals, effects of ribavirin on, **284**: 239-246
- Hepatitis-B antigen
concentration of, from clinical preparations of II, VII, IX, and X concentrates by polyethylene glycol, **240**: 162-164
in hepatitis and hepatoma, **259**: 259-260
in hepatocarcinogenesis, and α -fetoprotein, **259**: 156-167
in Nagasaki, epidemiologic study of, **259**: 239-247
- Hepatitis B virus infection, immunodeficiency to, **259**: 181-195
- Hepatocarcinogenesis, hepatitis B antigen in, and α -fetoprotein, **259**: 156-167
- Hepatocellular carcinoma
genetic susceptibility to, **259**: 181-195
risk of, in several ethnic groups, and α -fetoprotein levels, **259**: 136-155
serum α -fetoprotein in early stages of, **259**: 248-252
- Hepatocutaneous porphyrias, clinical biochemistry of, **244**: 441-471
- Hepatocyte, protein synthesis in, **252**: 51-62
- Hepatocyte cultures, growth state of, and biosynthesis of α -fetoprotein, albumin, hemoexin and haptoglobin, **259**: 45-58
- Hepatoma
ascites, and α -fetoprotein hepatoma, **259**: 74-79
early detection of, using hemagglutination and radioimmunoassay, **259**: 196-210
 α -fetoprotein and hepatitis B antigen in, **259**: 259-260
glycogen phosphorylase isozymes in, carcinofetal alterations in, **259**: 273-286
in Atlantic hagfish, **298**: 342-355
tumor-specific alkaline phosphatase in, **259**: 307-320
- Hepatoma-associated alkaline phosphatase compared with isozyme of FL amnion cells, **259**: 337-346
- Hepatoma cells
 α -fetoprotein synthesis in, immunoelectron-microscopic study of, **259**: 211-216
rat ascites, synthesis of α -fetoprotein by, **259**: 29-36
- Hepatotoxicity of vinyl chloride monomer, **246**: 150-151
- Hercules X-1
average 2-6 KeV pulse shapes of, during January 1972 "on" state, **262**: 385-390
hard x-ray spectrum of, strong cyclotron emission in, **302**: 538-544
optical properties of accretion disk in, **302**: 55-60
revisited, **262**: 312-330
- Hercules X-1 type objects, polarization and pulse shape in, **262**: 391-399
- Heroin and alcohol, choice between, reasons for, **273**: 605-612
- Herpes-like lesions in tumor growth, **277**: 269-287
- Herpes progenitalis, levamisole for, virus-specific immune responses after, **284**: 161-170
- Herpes simplex virus
5-halogenated analogs of deoxycytidine inhibiting replication of, **255**: 359-365
infection with, of guinea-pig skin as model for antiviral chemotherapy, **284**: 624-631
photodynamic inactivation of, **284**: 171-181
type 1, development of resistant strains of, **284**: 233-238
types 1 and 2 thymidine kinase, alternative substrates of, **284**: 594-598
- Herpes virus
activity of 5-methylarabinosylcytosine against, **284**: 342-350
inosinplex for, cell-mediated immunity in patients treated with, **284**: 190-196
relative potencies of compounds against, **284**: 49-59
- Herpesvirus hominis*, type 2, effects of ribavirin on, **284**: 247-253
- Herpesvirus hominis* DNA synthesis, inhibition of, by 9- β -D-arabinofuranosyladenine in cellular and cell-free systems, **284**: 34-48
- Herpesvirus hominis* encephalitis, antiviral agents synergistic with humoral antibodies in, **284**: 321-334

- Hessian fly epidemics, genetic basis of, **287**: 223-229
- Hexosamine in secretory granules, **248**: 202-217
- High-molecular-weight proteins purified from porcine brains, **253**: 107-132
- Himasthla quissetensis*, rediae of, infecting *Nassarius obsoletus*, **266**: 497-512
- Hirundo* archaeological project as interdisciplinary approach to Maine prehistory, **288**: 457-471
- Histochemical changes of motor units in myasthenia, **274**: 6-19
- Histologic changes of hepatic tissue in DAB-hepatocarcinogenesis, and α -fetoprotein, **259**: 156-167
- Histologic preparation methods in preservation of tissue antigens in immunofluorescent antibody technique, **254**: 27-34
- Histologic types of bronchogenic carcinoma among workers in copper-mining and -smelting industries, **271**: 260-268

 - in study of α -fetoprotein synthesis in hepatoma cells, **259**: 211-216
- Immunoenzyme methods
- in diagnosis of human parasitic diseases, **254**: 331
 - in serodiagnosis of *Trichinella spiralis* infection, **254**: 296-303
 - progress in, in virology, **254**: 369-384
- Immunofluorescence
- and related staining techniques, **254**: 1-627
 - applications of, to seroepidemiology of malaria, **254**: 326-330
 - defined
 - in clinical immunopathology, **254**: 551-591
 - Neisseria* infections diagnosed by, **254**: 334-349
 - to study anticollagen sera, **254**: 614-617
 - detecting tissue autoantibodies, antihuman immunoglobulin and antihuman Fab conjugates in, **254**: 66-68
 - in cancer research, **254**: 523-527
 - in detection of antibodies to parasitic agents, **254**: 304-314
 - in detection of Salmonellae in foodstuffs, feces, and water, **254**: 350-368
 - in diagnosis of acute lymphoblastic leukemia, **254**: 618-622
 - indirect, standards in **254**: 69-76
 - in identification of *Neisseria gonorrhoeae*, **254**: 400-406
 - laser excitation in, recovery phenomenon after, **254**: 172-174
 - membrane, in human transplantation biology, **254**: 280-288
- Immunofluorescence antibody technique, preservation of tissue antigens in, **254**: 27-34

- Immunofluorescence methods in serodiagnosis of *Trichinella spiralis* infection, **254**: 296-303
- Immunofluorescence patterns of glomerular deposits and subclasses of IgG in patients with malaria-associated nephropathies, **254**: 332-333
- Immunofluorescence staining
of DNA tumor virus-induced antigens, **254**: 541-550
of human lymphocytes for detection of surface immunoglobulins, **254**: 254-261
poxvirus antigen detected by, **254**: 394
- Immunofluorescence studies
of T-cell differentiation in congenitally athymic mice, **254**: 226-242
quantitative, **254**: 151-157
- Immunofluorescence technique
in determining anti-dsDNA, **254**: 505-515
in identification of *Rickettsia tsutsugamushi* in *Leptotrombidium fletcheri*, **266**: 73-79
- Immunogenicity
by modification of tumor cells, **276**: 45-60
of homologous α -fetoprotein, chemical modulation of, **259**: 85-94
of modified tumor cells in syngeneic hosts, **276**: 61-74
of tumor antigens, **276**: 26-44
of tumors alkylated with cyclohexyl-, benzyl-, or 2,4-dinitrophenylmethacrylate, **277**: 412-427
- Immunogen in leukemia, neuraminidase-treated tumor cells as, **277**: 313-331
- "Immunogenic" RNA, leukemic mice treated with, protective immunity in, **277**: 708-715
- Immunoglobulin beads, fluorescent copolymerized, laser excitation of, **254**: 151-157
- Immunoglobulin classes,
in human lymphoid cells, **254**: 243-253
membrane and immunoglobulin, in human lymphoid cells, **254**: 243-253
- Immunoglobulin determinants on bone marrow and blood lymphocytes in children and fetal tissue, **254**: 262-279
- Immunoglobulin levels in lepromatous leprosy, and alpha-1-antitrypsin, **278**: 125-128
- Immunoglobulin responses after rubella infection, **254**: 385-393
- Immunoglobulins (*see also* Ig)
antihuman, in detection of tissue autoantibodies by immunofluorescence, **254**: 66-68
in skin of bullous dermatoses detected by super-sandwich technique, **254**: 223-225
surface, detected by immunofluorescent staining of human lymphocytes, **254**: 254-261
T-cell, in cell cooperation, T-cell suppression and antigenic competition, **249**: 424-437
- Immunohistochemical methods in study of neurosecretory neurons, **248**: 134-152
- Immunohistochemical processing, preparation of tissues and cells for, **254**: 21-26
- Immunohistochemistry
binding properties in, and rhodamine conjugates, **254**: 35-54
in study of monoamine cell systems, **254**: 407-432
- Immunohistoperoxidase reactions in agarose bead model system, **254**: 212-222
- Immunologic activation of endogenous oncogenic viruses, **276**: 529-535
- Immunologic arterial injury in atherogenesis, **275**: 210-227
- Immunologic aspects of experimental myasthenia gravis, **274**: 337-353
- Immunologic correlation between α -fetoproteins from man and mammals, **259**: 109-118
- Immunologic identification of subpopulations of mononuclear cells in sarcoid granulomas, **278**: 136-146
- Immunologic methods for measuring antihemophilic factor (Factor VIII), implications of, **240**: 97-108
- Immunologic reactivity
and alcoholic hepatitis, **252**: 106-115
in cells, stimulatory effect of methanol extraction residue on, **276**: 536-549
regulation of, in sarcoidosis, **278**: 117-124
- Immunologic studies
cellular, "signal theory" in, **249**: 27-33
in sarcoidosis, **278**: 47-51
using Kveim tests, **278**: 711-716
of antibodies to acetylcholine receptors, **274**: 354-376
of carcinofetal enzymes, **259**: 287-297
of chronic ulcerative colitis and Crohn's disease, **278**: 586-591
of DNA, use of *Crithidia luciliae* in, **254**: 505-515
- Immunomodulation model, inosiplex as, for treatment of viral disease, **284**: 128-138
- Immunopathology
clinical, defined immunofluorescence in, **254**: 551-591
in study of carcinoembryonic antigen and cancer specificity, **259**: 412-416
- Immunoperoxidase localization of alpha-bungarotoxin in myasthenia, **274**: 20-30
- Immunoperoxidase technique in studies of neurophysin-secreting pathways in brain, **248**: 92-111
- Immunopharmacology data applicable to cancer immunotherapy, **267**: 477-484
- Immunopotentiating action, antiviral agents with, levamisole and inosiplex as, **284**: 139-152
- Immunopotentiators for cancer therapy, design of phase I trials of, **277**: 252-259
- Immunoproteins in patients with sarcoidosis, monocyte receptor activity for, **278**: 190-200

- Immunoreactive neurophysin-like material in human target organs and pineal gland, **248**: 157-171
- Immunosuppressant, progesterone as, **286**: 384-397
- Immunosuppression
by Friend leukemia virus, genetic resistance to, **276**: 217-228
induced by different classes of plasmacytomas, **276**: 479-487
reversal of, induced by murine leukemia viruses, **276**: 431-441
- Immunosuppressive action of ribavirin using rabbit skin allograft model, **284**: 230-232
- Immunosuppressive α globulin from bovine thymus and serum, **249**: 236-247
- Immunosuppressive factors, tumor-associated, **276**: 417-430
- Immunosuppressive nucleoside analogs, Ara-C and derivatives as, **255**: 366-371
- Immunosuppressive procedures for myasthenia gravis, **274**: 659-676
- Immunosuppressive therapy and Factor VIII antibodies, **240**: 389-399
- Immunotherapy
adjuvant, in bronchogenic carcinoma, **277**: 345-354
adoptive
and passive, by parabiosis, for syngeneic mouse and rat tumors, **277**: 505-515
using thoracic duct lymphocytes, **277**: 7-19
bacillus Calmette-Guérin contact, of local and metastatic deposits of rat tumors, **277**: 124-134
- cancer
history and prospects of, **277**: 1-6
immunopharmacology data applicable to, **277**: 467-484
in man, current status of, **277**: 722-740
international conference on, **277**: 1-741
modifying tumor cells, **276**: 45-60
with bacillus Calmette-Guérin in Japan, **277**: 160-186
with cell wall skeleton of *Mycobacterium bovis*-bacillus Calmette-Guérin, **277**: 209-227
with immune RNA, **277**: 592-608
with nonspecific immunostimulants, **277**: 94-123
- of canine lymphosarcoma, tumor vaccines for, **277**: 305-312
- of chronic myelocytic leukemia, effects of vaccination schedules on, **277**: 367-383
- of experimental cancer as guide to treatment in man, **276**: 550-556
- of malignant melanoma, with irradiated tumor cells, oral bacillus Calmette-Guérin, and levamisole, **277**: 355-366
- of osteosarcoma patients with virus-modified tumor cells, **277**: 396-411
- surgical adjuvant, for melanoma, bacillus Calmette-Guérin as, **277**: 187-194
- tumor
human, **277**: 332-338
bacillus Calmette-Guérin in, **277**: 135-159
phytohemagglutinin-activated lymphocytes for, **277**: 45-51
in animals
current status of, **277**: 716-721
with antitumor antibodies conjugated to diphtheria toxin or ricin, **277**: 690-699
murine
virally induced, **276**: 557-564
with immune RNA, **277**: 575-591
with nonspecific immunostimulants, **277**: 60-93
with neuraminidase-treated tumor vaccine and bacillus Calmette-Guérin for head and neck cancer, **277**: 339-344
with nonviable microbial components, **277**: 228-238
- Impairment
linguistic vs. cognitive, in child, **263**: 59-69
psychiatric, and alcoholism, **273**: 467-480
- Impedance, electrical, of excitable membranes, **303**: 298-305
- Imports, food, to British West Indies, **292**: 581-590
- Index to *Annals of the New York Academy of Sciences*, **289**: 3-581
- India
crop epidemics in, and genetic vulnerability, **287**: 72-85
services and resources for mentally retarded in, compared to those of U.S., **285**: 698-706
- Indians (see also specific tribe)
Kuikuru, of central Brazil, shamanism and witchcraft among, **293**: 215-228
long-term marijuana users among, psycho-clinical effects on, **282**: 85-94
Panare, symbolic aspects of musical instruments of, **293**: 206-214
- Industrial exposure control, experience in, of PC and PVC, **246**: 306-310
- Industrial monitoring, cytogenetic approach to, **269**: 4-11
- Industrial organic chemicals through utilization of synthesis gas, **295**: 239-248
- Industrial wastes and Hudson River estuary, **250**: 169-177
- Industry
American, and improvement of American nutrition, **300**: 391-396
copper-mining and -smelting, bronchogenic carcinoma in workers in, **271**: 260-268
fibrous glass, mortality in workers in, **271**: 324-335
lead, cancer mortality patterns in, **271**: 250-259
steel, cancer mortality in, **271**: 228-238
textile, oral and pharyngeal cancer in workers in, **271**: 301-307

- wood and pulp, neoplasms in workers in, **271**: 294-300
- Inebriate, public, alcoholism services for, **273**: 403-408
- Infant-mother exchanges as epigenesis of conversational interaction, **263**: 89-100
- Infants
and study of fetal alcohol syndrome at Boston City Hospital, **273**: 118-122
brain of, pre-language and functional asymmetry of, **299**: 370-379
feeding of, and decline of human lactation, **300**: 197-209
human
lateral differentiation in, **299**: 309-318
speech perception in, **280**: 694-707
- Infection
acute vs. persistent, in cell cultures, in evaluation of antiviral compounds, **284**: 599-603
arbovirus
cellular resistance to, **266**: 197-203
of vertebrate and insect cell cultures, **266**: 241-250
Baculovirus, in estuarine and marine shrimp, **266**: 528-536
genetic studies of susceptibility to, in *Biomphalaria glabrata*, **266**: 394-410
helminth, immunodiagnosis of, **254**: 119-136
hepatitis B virus, immunodeficiency to, **259**: 181-195
herpes virus
inosiplex for, **284**: 190-196
of guinea-pig skin, as model for antiviral chemotherapy, **284**: 624-631
influenza
aerosol therapy with rimantadine and ribavirin for, **284**: 264-271
effect of interferon on, **284**: 667-675
small airways dysfunction in, action of amantadine on, **284**: 106-117
inherited, in epidemiology of Diptera-borne disease, **266**: 115-124
leukemia virus, and antibody formation and cellular immunity, **276**: 411-416
Neisseria, diagnosed by defined immunofluorescence, **254**: 334-349
picornavirus, equestron as Achilles' heel for chemotherapy of, **284**: 638-649
rhinovirus, inosiplex in, **284**: 153-160
rubella, immunoglobulin responses after, **254**: 385-393
Sindbis virus, of *Aedes albopictus* cell cultures, **266**: 214-231
susceptibility to, in patients with Laennec's cirrhosis, **252**: 348-352
transovarial, of spotted-fever rickettsiae in ticks, **266**: 61-72
Trichinella spiralis, serodiagnosis of, **254**: 296-303
- viral
effect of cyclic nucleotides on, **284**: 375-388
multiple, of cells in invertebrates, **266**: 232-240
tissue injury in, **256**: 65-72
Infectious etiology of rheumatoid arthritis, **256**: 25-38
Infertility (see Sterility)
Inflammation
chronic, and macrophage neutral proteinases, **278**: 176-189
granulomatous
functional classification of, **278**: 7-18
serum lysozyme and β -glucuronidase in, **278**: 592-598
Inflammatory bowel disease
lymphocytotoxic and RNA antibodies in, **278**: 574-585
T and B lymphocytes and cutaneous anergy in, **278**: 565-573
tissue homogenates from patients with, in induction of granulomas, **278**: 560-564
Inflammatory cells, role of, in destruction of synovial tissues, **256**: 288
Inflammatory tissue, rheumatoid, plasma cells in, **256**: 88-95
Influenza
clinical evaluation of ribavirin for, **284**: 272-277
effect of interferon on, **284**: 667-675
potencies of compounds against, **284**: 254-263
Influenza A virus infection, small airways dysfunction in, action of amantadine on, **284**: 106-117
Influenza infections in animals, aerosol therapy with rimantadine and ribavirin for, **284**: 264-271
Influenza RNA transcriptase, inhibitors of, **284**: 613-623
Influenza virus
inhibition of, by triphenylmethane compounds, **284**: 632-637
in tissue culture, efficacy of ribavirin against, **255**: 366-371
Information
public, priorities in, **261**: 238-241
scientific and technical, society's need for, **261**: 126-136
Information processing
in analysis of brain architecture and mechanisms underlying language, **280**: 240-256
internal, covert oral behavior in, **270**: 57-89
Information scanning and recording, laser beam in, **267**: 384-410
Infrared optokinetic nystagmography, edrophonium, in diagnosis of myasthenia gravis, **274**: 642-651
Inhalation of benzpyrene, and cancer, **271**: 116-124
Inheritance
Mendelian modes of, and origins of asymmetry, **299**: 283-305

- possible mechanism of, in familial sarcoidosis, **278**: 371-376
- Inherited vasculopathy, attempts to delay, **275**: 348-362
- Inhibitors
- Factor VIII
- hemophiliacs with, cyclophosphamide in treatment of, **240**: 412-418
- in treatment of hemophiliacs, **240**: 400-404
- metabolic, in regulation of mitotic apparatus, **253**: 362-377
- Injury
- arterial
- healing responses of, **283**: 310-316
- immunologic, in atherogenesis, **275**: 210-227
- tissue lipid after, **275**: 180-198
- from running, biomechanical approach to, **301**: 888-899
- heat stress, in runners, hemodynamic and metabolic alterations in, **301**: 262-269
- hepatic vinyl-chloride-induced, after cessation of exposure, **246**: 70-77
- microvascular, in early rheumatoid arthritis, **256**: 39-64
- surface, platelet function after, **283**: 138-158
- tissue (*see also* Tissue injury)
- effect of complement depletion on, **256**: 426-440
- to left brain, early, and lateralization of cerebral speech, **299**: 355-369
- Inorganic chemistry, structural, of palmierite series $Ba_{3-x}Pb_2V_2O_{10}$ and its application to catalysis, **272**: 45-60
- Inorganic components in water, measurement of, **298**: 31-46
- Inosinplex
- as antiviral agent with immunopotentiating action, **284**: 139-152
- as immunomodulation model for treatment of viral disease, **284**: 128-138
- for herpes virus infection, cell-mediated immunity in patients treated with, **284**: 190-196
- in rhinovirus infection, **284**: 153-160
- Insects
- central nervous system of, development of, **299**: 59-71
- defense of rice against, **287**: 287-295
- helical-wall-free prokaryotes in, **266**: 260-275
- Mollicutes and Rickettsia-like plant disease agents in, **266**: 276-292
- symbiosis and attenuation in, **266**: 166-172
- tonic sensory input in, **290**: 114-123
- vector, pathogenic effects of plant diseases on, **266**: 259
- vertical transmission of microorganisms in, **266**: 162-165
- Instantons, monopoles, and strings, **294**: 74-79
- Institutional mental care, 19th-century American, **291**: 74-82
- Institutional services for mentally retarded in India and U.S., **285**: 698-706
- Institutions
- academic, and national science policy, **260**: 76-83
- and science public policy, **260**: 5-127
- public and private, interaction between, in policymaking, **260**: 41-52
- Instructional strategies among students, **285**: 451-475
- Instruments, musical, of Panare Indians, symbolic aspects of, **293**: 206-214
- Insufficiency, pancreatic, and alcoholism, **252**: 200-207
- Insulin release, phasic pattern of, microtubules in, **253**: 630-652
- Intangible, mastery of the, through language, **263**: 44-58
- Integration
- and assimilation of Negro slaves in Mexico, **292**: 446-454
- numerical, of exact Einstein equations, **262**: 141-144
- regional, and modern Greece, **268**: 10-15
- Intellectual abilities, effect of chronic cannabis use on, **282**: 307-312
- Intellectual studies of Costa Rican marijuana users, **282**: 266-306
- Intelligence
- mechanisms of, and preconditions for language, **280**: 544-561
- primate, ontogeny of, **280**: 173-211
- Interaction
- agonist-antagonist, and development of tolerance and dependence, **281**: 244-251
- alcohol-membrane, in brain, reversibility of, **273**: 295-302
- conversational, mother-infant exchanges in, **263**: 89-100
- drug (*see also* Drug interactions or specific drug)
- pharmacokinetic approaches to study of, **281**: 24-39
- ion-membrane, as structural forces, **264**: 161-174
- lipid-lipid and lipid-protein, in membranes, **264**: 124-141
- lipid-protein, in biomembranes, **264**: 142-160
- progesterone and glucocorticoid, with receptor in breast cancer cells, **286**: 101-115
- protein-lipoprotein, in man, **275**: 145-152
- strong, gravitation with, gauge unification of, **294**: 12-36
- weak
- contribution of β decay to understanding of, **294**: 37-51
- current problems in, **294**: 58-68
- future of, **294**: 69-73
- questions and answers on, **294**: 3-11
- Interfaces
- artificial, evaluation of, **283**: 542-549
- blood, cell-lined, nonwoven microfiber scaffolds at, **283**: 419-437
- hydrogel, blood and blood components interacting at, **283**: 372-382

- organization of blood components near, **283**: 17-36
- plasma proteins reacting with formed elements of blood at, **283**: 65-76
- Interferon, **284**: 666
- human
- antigenic, physicochemical, and biologic characterization of, **284**: 703-710
- de novo* cell-free synthesis of, **284**: 697-702
- mechanism of action of, **284**: 711-716
- production of, in white mouse, by DMSO, **243**: 308-310
- Interferon inducers
- acceleration of scrapie in mice by, **284**: 676-681
- effect of, on influenza virus infection, **284**: 667-675
- Intergalactic medium, radio galaxies interacting with, **302**: 669-680
- International Agency for Research on Cancer, program of, to evaluate carcinogenic risk of chemicals, **271**: 396-409
- International Union of Biological Sciences, invertebrate pathology in, **266**: 537-540
- Interpersonal relations among cultures, and subjective culture, **285**: 418-434
- Interstellar clouds, encounters with, **302**: 665-668
- Interstitial, lung, and Langerhans' cells, **278**: 599-611
- Intestinal absorption, effects of ethanol on, **252**: 228-234
- Intestinal function in chronic alcoholism, **252**: 215-227
- Intestinal Peyer's patch lymphoid cells, characteristics of, **278**: 539-545
- Intestinal sugar transport, and isolated plasma membrane studies, **264**: 414-427
- Intoxication
- changing perceptions of self and spouse during, **273**: 497-506
- postalcohol, and tetrahydroisoquinoline alkaloids, **273**: 234-246
- Intracranial self-stimulation, and tonic properties of orosensation, **290**: 158-179
- Intracytoplasmic immunoglobulin classes in human lymphoid cells, **254**: 243-253
- Intradermal test, Makari, in diagnosis of cancer, **276**: 97-105
- Intra-erythrocytic crystalloid bodies in cats compared with hemoglobinopathies in man, **241**: 589-593
- Intraocular findings in ocular sarcoidosis, **278**: 445-454
- Intratumoral chemotherapy inducing tumor immunity, **276**: 565-572
- Intrauterine development of rat, effects of electromagnetic radiation on, **247**: 352-366
- Intravascular magnetic suspension of device to assess hemocompatibility, **283**: 524-535
- "Introverted" alcoholics, drinking in, **273**: 481-487
- Invertebrates
- cell infections of, by viruses, **266**: 232-240
- nervous system in, and lateralization, **299**: 72-73
- noninsect, pathobiology of, **266**: 332-333
- of the Hudson River estuary, **250**: 137-143
- porphyrins in, **244**: 662-673
- Invertebrate pathology in International Union of Biological Sciences, **266**: 537-540
- Invertebrate vectors of disease, pathobiology of, **266**: 1-540
- Investigations, labor-management participation in, of chronic disease states, **269**: 43-45
- 5-Iodo-2'-deoxyuridine, antiviral activity of, and development of resistant strains of type 1 herpes simplex virus, **284**: 233-238
- Ion acceleration, collective
- experimental studies of, **251**: 514-535
- in relativistic electron beam deuterated polyethylene target interaction, **251**: 238-272
- theoretical models for, **251**: 536-549
- via two-stream instability, **251**: 582-589
- Ion beams, intense, and thermonuclear microexplosions, **251**: 679-689
- Ion conductance in nerve, specific chemical groups controlling, **264**: 293-303
- Ion-conductance-inducing membrane materials, lipid bilayer membrane as assay for, **264**: 483-485
- Ion exchange in mammalian heart, glycoside effects on, **242**: 688-692
- Ion fluctuation causing dielectric dispersion of polyelectrolytes, **303**: 107-120
- Ion gating structures in nerve membranes, currents associated with, **264**: 265-277
- Ion guns, spherical electrostatic confinement system using, **251**: 179-189
- Ionization, high-density, with intense linear focus discharge, **251**: 112-125
- Ion mechanisms in excitation of photoreceptors, **264**: 314-325
- Ion-membrane interactions as structural forces, **264**: 161-174
- Ion movements and kinetics in squid axon, **303**: 355-379, 399-423
- Ionophores
- biological applications of, **264**: 373-386
- divalent cation, derived from beef-heart mitochondria, **264**: 98-111
- isolation of, from ion transport system, **264**: 83-97
- role of, in energy coupling, **264**: 61-82
- sodium-dependent, isolated from $\text{Na}^+ + \text{K}^+$ -ATPase preparations, **242**: 389-405
- Ion permeability
- bilayer, function of lipid in, **264**: 2-16
- mediated by nactin- and valinomycin-type carriers with some methylation, **264**: 34-60
- Ion rings, high-energy, for plasma confinement, **251**: 472-482
- Ion solutions, field fluctuations of, biological significance of, **303**: 38-46
- Iontophoretic application of antiviral chemotherapeutic agents, **284**: 604-612
- Ion transport
- and the effects of an antiserum to $\text{Na}^+ +$

- K^+ -ATPase, **242**: 357-371
 in lipid bilayer membranes, electric characteristics of, **303**: 266-280
 isolation of ionophores from, **264**: 83-97
 Ion transport systems, resolution and reconstitution of, **264**: 17-33
Ir genes and antigen recognition, **249**: 541-547
 Iron-carbonyl complexes, reactivity of monolefinic ligands in, **295**: 141-150
 Iron carbonyls in organic synthesis, **295**: 225-238
 Iron nutrition, **300**: 221-227
 Iron-storage disease, hepatic, role of alcoholism in, **252**: 124-134
 Irradiated tumor cells in immunotherapy of malignant melanoma, **277**: 355-366
 Irradiation
 microwave, of eye, with dielectric lens, **247**: 142-154
 of bovine serum albumin with crossed-beam exposure-detection system, **247**: 312-322
 Irrigation, high-frequency, and Green Revolution food production, **300**: 121-128
 Ischemic heart disease related to physical activity in Federal employees, **301**: 627-641
 Island, Greek, social interaction in village on, **268**: 308-313
 Islands, Greek, ethnography of, **268**: 289-290 **259**: 273-286
 Isoferritins, carcinofoetal human, **259**: 427-434
 Isolation of bovine Factor VIII, **240**: 43-61
 Isomers, porphyrin, number of biologically possible, **244**: 327-333
 Isonicotinic acid hydrazide inhibiting Rous sarcoma virus, **284**: 525-532
 Isoprinosine in rhinovirus infection, **284**: 153-160
 Isoproteins, immunochemical analysis of, by α -fetoprotein, **259**: 131-135
 Isothiocyanate, rhodamine, quantitation in labeling of, **254**: 55-64
 Isotope separation, laser, **267**: 61-70, 81-92
 at Lawrence Livermore Laboratory, **267**: 71-80
 Isotope studies of porphyrin and heme metabolism, **241**: 360-379
 Isozyme patterns of amino acid transaminase during cell differentiation and carcinogenesis, **259**: 347-354
 Isozymes
 glycogen phosphorylase, in hepatomas, carcino-fetal alterations in, **259**: 273-286
 Kasahara, compared with isozyme from FL amnion cells, **259**: 337-346
 L-leucine-sensitive alkaline phosphatase, from cancer tissue, **259**: 325-336
 Israel
 Jewish and Druze children in, person perception and social interaction of, **285**: 338-354
 kibbutz in, familistic social change on, **285**: 605-611
 oat crown rust resistance in, **287**: 357-366
 Jamaica
 cannabis in, and the amotivational syndrome, **282**: 24-32
 marronage in, origins of, **292**: 389-419
 slave revolt in, in 1831-32, **292**: 41-62
 January 1972 "on" state, pulse shapes of Hercules X-1 during, **262**: 385-390
 Japan
 agriculture in, pest and disease epidemics in, **287**: 35-44
 cancer immunotherapy in, with bacillus Calmette-Guérin, **277**: 160-186
 lung cancer in metal workers in, **271**: 269-272
 modern, psychological importance of ritualized gift exchange in, **293**: 98-113
 socio-psychological variables in, related to those of U.S. and Europe, **285**: 221-226
 Japanese ornamental hybrid carp, ovarian neoplasms in, **298**: 330-341
 Japanese quail embryo, exposed to 2.45-GHz microwave radiation, **247**: 377-390
 Japanese workers exposed to PVC, bone lesions in, **246**: 78-79
 Jitter phenomenon in patients with myasthenia gravis, single-muscle-fiber-recording of, **274**: 189-202
 Jogging class, physiologic profile of, **301**: 550-560
 Joints
 connective tissues of, neutrophil lysosomal proteases in degradation of, **256**: 402-408
 degenerate disease of, **240**: 340-341
 and hemophilic arthropathy, **240**: 285-290
 disease of, lymphocytes in propagation of, **256**: 150-168
 reconstructive surgery of, new horizons in, **240**: 291-294
 K^+ -activated phosphatase, relationship of, to $Na^+ + K^+$ -ATPase,
 Kalymnos, island of sponge fishermen, **268**: 291-307
 Karpofores, reluctant farmers of, on fertile land, **268**: 207-221
 Karyotypes of species, subspecies, and hybrids of *Lemur*, **293**: 125-159
 Kasahara isozyme compared with isozyme from FL amnion cells, **259**: 337-346
 K-cell activity in peripheral blood of sarcoidosis patients, **278**: 52-68
 Kemp II experiment, progress report on, **251**: 367-369
 Ketones, α , β -ethylenic, α , β -dialkylation of, **295**: 249-253
 Keystone virus, ecology of, **266**: 144-151
 Khmer peasant village, residence patterns in, **293**: 51-68
 Kibbutz, Israeli, familistic social change on, **285**: 605-611
 Kidney (see also Renal entries)
 $Na^+ + K^+$ -ATPase in, reconstitution of active transport by, **264**: 387-397

- Kinesic behavior, maternal, and cognitive development in child, **285**: 389-407
- Kinetic components of ion permeability mediated by nactin- and valinomycin-type carriers with some methylation, **264**: 34-60
- Kinetic observations on red-cell sugar transport sites, **264**: 398-413
- Kinetics
 associated with postnatal development and Na^+ -ATPase of mammalian erythrocyte membranes, **242**: 305-316
 ion, in squid axon, **303**: 355-379, 399-423
 of colony-farming units, and the thymus, **249**: 468-476
 of monocyte receptor activity for immunoproteins in patients with sarcoidosis, **278**: 190-200
 of mononuclear phagocytes, **278**: 161-175
 of $\text{Na}^+ + \text{K}^+$ pump in goat red blood cells, **242**: 343-356
 of phosphorylated intermediates in reaction of $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 92-105
 of protein-ligand binding reaction, **303**: 47-56
- Kingdoms, traditional, in southeast Asia, and galactic polity, **293**: 69-97
- Kinship groupings of slaves on Good Hope plantation, **292**: 242-258
- KMS Industries/KMS Fusion, Inc., laser fusion at, **267**: 111-116
- Knives, thermal, compared with carbon dioxide lasers in excision of burns, **267**: 254-262
- Knowledge
 basic, priorities in, **261**: 238-241
 educational, legitimacy of, **285**: 282-296
 spread of, and development of electronic technology, **261**: 242
- Kotonkan virus of rabies serogroup in cell cultures, **266**: 241-250
- Kuikuru Indians of central Brazil, shamanism and witchcraft among, **293**: 215-228
- Kveim histology trial, international, **278**: 687-699
- Kveim preparations, reactivities to, of leukocytes from sarcoids and normals, **278**: 700-710
- Kveim-Siltzbach test material, Edinburgh spleen as, **278**: 670-680
- Kveim suspension
 Dutch, in men and guinea pigs, **278**: 717-721
 satisfactory, qualities and behavior of, **278**: 665-669
- Kveim test
 analysis of results of, using Colindale (K 12) materials, **278**: 681-686
 in immunologic studies of sarcoidosis, **278**: 711-716
- Kypseli: *Women and Men Apart, A Divided Reality*, a discussion of the film, **268**: 382-384
- Labeling, rhodamine isothiocyanate, quantitation in, **254**: 55-64
- Labor
 free, and slavery in Puerto Rican sugar economy, **292**: 553-563
 slaves as supply of, in 17th-century British Caribbean, **292**: 72-83
- Laboratory
 and cosmic plasma physics, relations between, **257**: 179-188
 viral diagnostic, as adjunct to use of antiviral drugs, **284**: 122-127
- Laboratory approaches to identification of carcinogens, **271**: 29-38
- Laboratory studies of chloroethers, summary of, **271**: 81-90
- Labor-management participation in long-term investigation of chronic disease states, **269**: 43-45
- Labrador
 coast of, population movement and culture change on, **288**: 481-497
 Strait of Belle Isle, early cultures on, **288**: 472-480
- Lac carrier protein, binding of β -galactosides to, **264**: 350-357
- LaCrosse virus, transovarial transmission of, in *Aedes triseriatus*, **266**: 135-143
- Lactation, human, decline of, **300**: 197-209
- Laennec's cirrhosis (*see also* Cirrhosis)
 and increased susceptibility to infection, **252**: 348-352
- Lake George region, Archaic of, **288**: 431-438
- Lakes, freshwater, eutrophication of, **250**: 129-135
- Lamprey, brain of, in comparative perspective, **299**: 97-145
- Land
 constraints, and energy resources in food production, **300**: 26-32
 fertile, of Karpofora, reluctant farmers of, **268**: 207-221
- Landau orbital ferromagnetism (LOFER)
 mechanism for generation of intense magnetic fields, **257**: 82-84
- Landscape in Fourni valley, impact of olive-growing on, **268**: 143-157
- Langerhan's cells and lung interstitium, **278**: 599-611
- Language
 and acquisition of language-type skills in chimpanzee, **270**: 90-123
 and skilled activity, **280**: 150-166
 and speech, origins and evolution of, **280**: 1-914
 architecture and mechanisms of brain underlying, **280**: 240-256
 changes in, **280**: 61-72
 children's, syntax and semantics of, **280**: 227-237
 development of
 as purposive behavior, **280**: 212-226
 atypical, and psychopathology, **263**: 140-155
 in children, **280**: 120-126

- dissociations of, in aphasia, **280**: 868-884
distinguished from thought, issues that arise from, **263**: 76-83
evolution of
 and chimpanzees, **280**: 598-603
 critical stages in, **280**: 445-455
 in Late Pleistocene, **280**: 313-325
 interactive models for, **280**: 660-672
first, acquisition of, **280**: 257-261
human, and primate communication, **280**: 539-541
induction, evolution and accountability concerning, **280**: 58-60
in mastering the intangible, **263**: 44-58
in sociobiological frame, **280**: 798-809
natural
 logical diversity of, **280**: 73-91
 uniqueness of, **280**: 33-41
nature of, **280**: 46-57
 and frame semantics, **280**: 20-32
 in profoundly deaf children, **263**: 70-75
neural organization and fossil record, **280**: 367-369
neurobiology of, **280**: 900-912
of organism, **280**: 456-466
ontology and phylogeny of, **280**: 396-412
origins of
 and child language, **280**: 170-172
 and historical linguistics, **280**: 97-103
 and sign language projects, **280**: 589-591
 and toolmaking and hunting, **280**: 266-274
 gestural theory of, **280**: 482-504
 Paleolithic symbolic evidence for, **280**: 289-311
 paleoneurological evidence for, **280**: 330-348
 theory of, since the Renaissance, **280**: 4-13
paleoneurology of, **280**: 370-382
preconditions for, and mechanisms of intelligence, **280**: 544-561
problems of, in cross-cultural research, **285**: 141-150
role of
 in developmental psycholinguistics, **263**: 7-11
 in memory disorders of brain-damaged patients, **280**: 857-867
sign
 and language origins, **280**: 589-591
 autonomy in, **280**: 505-513
 iconic and abstract, **280**: 514-538
 study of, in chimpanzee, **280**: 579-588
 visually based, perception and production in, **263**: 225-235
Language acquisition, critical period for, **263**: 211-224
Language capabilities, development of, archaeological indicators of, **280**: 275-288
Language function, localization of, **280**: 843
 and anatomic variations in cortex, **280**: 834-843
Language-impaired child, linguistics vs. cognition in, **263**: 59-69
Language lateralization, evolution of, **280**: 810-820
Language-type skills, mastery of, by chimpanzee, **280**: 562-578
Larvae, schistosome, and their molluscan hosts, **266**: 480-496
Laryngeal carcinoma and smoking, and occupational exposure to asbestos, **271**: 308-310
Laryngeal folding, evolution of, **280**: 650-657
Laser beam in information scanning and recording, **267**: 384-410
Laser excitation
 of fluorescent copolymerized immunoglobulin beads, **254**: 151-157
 in immunofluorescence, recovery phenomenon after, **254**: 172-174
Laser flow microphotometry for analysis and sorting of mammalian cells, **267**: 176-190
Laser fusion
 and separation, **267**: 61-70
 at KMSI/KMSE, **267**: 111-116
 overview of, **267**: 117-125
Laser fusion program at Lawrence Livermore Laboratory, **267**: 93-110
Laser fusion research at Battelle Memorial Institute, **267**: 126-134
Laser isotope separation, **267**: 81-92
 program for, at Lawrence Livermore Laboratory, **267**: 71-80
Laser light, optical computing with, **267**: 430-447
Laser microirradiation studies, current, **267**: 160-175
Laser photochemistry of quinones under aerobic conditions, **267**: 201-215
Laser-produced plasma, confinement of, by radio-frequency electromagnetic fields, **251**: 381-393
Laser research program at Los Alamos Scientific Laboratory, safety considerations of, **267**: 135-151
Lasers
 argon, acridine orange photoactivation by, causing tumor destruction, **267**: 191-200
 atmospheric transmission of, safety aspects of, **267**: 366-372
 at wavelengths of 3000 Å and below, new developments in, **267**: 16-29
 carbon dioxide
 in communications, **267**: 329-341
 in excision of burns, and other thermal knives, **267**: 254-262
 gas, excitation of, relativistic electron beams in, **251**: 590-608
 HeNe, measuring cell migration, **267**: 152-159
 in communications, **267**: 329-341
 for improved medical care, **267**: 359-365
 Nd:YAG technology status of, **267**: 342-358
 in current (1975) cancer program, **267**: 324-328
 in home videodisc system, **267**: 477-481
 in ophthalmology, current status of, **267**: 230-246
 reflective optic systems for, **251**: 346-357
 third conference on, **267**: 1-481
 x-ray, guidelines for research in, at Naval Research Laboratory, **267**: 3-15

- Laser scanning of radiographs, **267**: 469-476
 Laser spectroscopy, nonlinear, **267**: 51-60
 Laser surgery
 current, **267**: 247-253
 in otolaryngology, **267**: 263-294
 Late glacial environments in western New York, **288**: 223-233
 Late Pleistocene, evolution of language in, **280**: 312-325
 Late Pleistocene vegetations and environments in Middle Atlantic region, **288**: 206-217
 Late Quaternary environment
 and man in western New York, **288**: 297-315
 in northeastern coastal North America, **288**: 90-92
 Late Quaternary paleoenvironmental reconstruction in Long Island, **288**: 545-570
 Late Quaternary paleoenvironmental record of northeastern America, **288**: 16-34
 Late Quaternary paleogeographic changes in Middle Atlantic coastal environment, **288**: 35-69
 Lateral differentiation in human infant, **299**: 309-318
 Laterality
 cognitive-state theory based on, **296**: 274-283
 in marsupial *Trichosurus vulpecula* (brush-tailed possum), **299**: 197-212
 in rodent, adaptive significance of, **299**: 180-185
 Lateralization
 and invertebrate nervous system, **299**: 72-73
 developmental factors in, **299**: 281-282
 language, evolution of, **280**: 810-820
 of brain, **299**: 477-501
 anthropological perspective on, **299**: 424-447
 functional, **299**: 273-280
 in man, **299**: 412-414
 of cerebral speech and early injury to the left brain, **299**: 355-369
 of higher cortical functions, **299**: 459-473
 symmetrical, of function in auditory system of cat, **299**: 255-263
 visuocultural influences on, **299**: 474-476
 Lateralized temporal-limbic dysfunction and psychopathology, **280**: 777-795
 Lateral specialization and psychiatric issues, **299**: 397-411
 Late Wisconsin glacial retreat in Great Lakes region, **288**: 70-89
 Latex-ingesting cells, peripheral blood, in myasthenia gravis patients, **274**: 411-420
 Latin America
 alcoholism in, **273**: 9-23
 food production in, **300**: 112-120
 Lawrence Livermore Laboratory
 laser fusion program at, **267**: 93-110
 laser isotope separation program at, **267**: 71-80
 Laws
 and genetic control, public-policy questions concerning, **265**: 170-177
 of physics, "neutron" stars with, **302**: 471-481
 public interest, and scientists in courtroom, **260**: 111-113
 slave, in Danish Virgin Islands, **292**: 174-186
 Lead industry, cancer mortality patterns in, **271**: 250-259
 Learning, vocal, ethological theory of origin of, **280**: 386-395
 Legal approaches to environmental control, **250**: 182-185
 Leghemoglobin, **244**: 28-34
 Legume root nodule, nitrogen-fixing, role of hemoglobin in, **244**: 28-34
 Lemur, karyotypes of species, subspecies, and hybrids of, **293**: 125-159
 Lemur *catta*, distribution of, **293**: 170-184
 Lemur *fulvus*, distribution of, **293**: 170-184
 Lemuriformes, chromosomes of, **293**: 125-159
 Lemurs, Malagasy, distribution of, **293**: 160-169, 170-184
 Lennard-Jones fluid, metastable states in, **279**: 36-42
 Lens
 cell elongation in, and microtubules, **253**: 333-347
 dielectric, for microwave irradiation of eye, **247**: 142-154
 of rabbit
 ascorbic acid changes in, after microwave radiation, **247**: 175-181
 microwave radiation inducing changes in, **247**: 166-174
 Leprosy, lepromatous, serum alpha-1-antitrypsin and immunoglobulin levels in, **278**: 125-128
 Leptotrombidium fletcheri, Rickettsia tsutsugamushi identified in, with immunofluorescence techniques, **266**: 73-79
 Leptotrombidium mites, transovarial transmission of *R. tsutsugamushi* in, **266**: 80-90
 Lesions
 precursor, as indicators of occupational cancer risk, **271**: 444-447
 tissue, of tiger salamanders, and sewage effluents, **298**: 270-279
 L-Leucine-sensitive alkaline phosphatase isozyme from cancer tissue, **259**: 325-336
 Leukemia
 AAFC for, chemical properties of, **255**: 59-70
 acute, marrow transplantation for, **277**: 52-59
 lymphoblastic, immunofluorescence in diagnosis of, **254**: 618-622
 associated with benzene exposure, **271**: 143-151
 children in remission from, immunization of, with "living" mixed leukoblast vaccine, **277**: 384-395
 chronic myelocytic, immunotherapy of, **277**: 367-383
 immunogen in, neuraminidase-treated tumor cells as, **277**: 313-331

- L1210
 antitumor effects of ribavirin on, **284**: 585-590
 in mouse, **284**: 585-590
 lymphocytic, effect of hemolytic streptococci on, **277**: 299-301
 murine
 effect of *Staphylococcus aureus* on, **276**: 513-519
 methotrexate-thymidine in treatment of, **255**: 261-265
 preparation of rabbit antisera with "directed" specificities for, **277**: 647-669
 syngeneic adoptive chemoimmunotherapy of, **276**: 573-583
 mutant L2C, and depletion of Ia alloantigens, **276**: 381-385
- Leukemic blasts, human, antigen expression and cell surface properties of, **276**: 146-164
- Leukemic cells
 and resistance to cytosine arabinoside, **255**: 247-251
 murine virus-induced
 DMSO in stimulation of erythroid differentiation and hemoglobin synthesis in, **243**: 155-163
 hemoglobin biosynthesis in, **241**: 582-588
 thymus-derived, differentiation of, **249**: 484-491
- Leukemic lymphocytes, mitogenic responsiveness of, and DMSO, **243**: 73-80
- Leukemic mice treated with specific "immunogenic" RNA, protective immunity in, **277**: 708-715
- Leukemic virus
 effect of infections with, on antibody formation and cellular immunity, **276**: 411-416
 Friend, genetic resistance to immune suppression by, **276**: 217-228
 marine, in reversal of immunosuppression, **276**: 431-441
 Rauscher, inhibited by anthrocycline compounds, **284**: 566-575
- Leukemogenesis, viral, influence of immune stimulators on, **276**: 502-512
- Leukemogenic susceptibility, effects of tumor virus on, **276**: 442-454
- Leukoblast vaccine, "living" mixed, in immunization of children in remission from acute leukemia, **277**: 384-395
- Leukocyte chemotaxis
 in human disease, abnormalities of, **256**: 386-401
 physiologic and pharmacologic alterations of, **256**: 60-209
- Leukocyte cultures, T-cell factor produced in, stimulation of B immunocytes by, **249**: 264-277
- Leukocyte migration in patients with renal carcinoma, **276**: 260-271
- Leukocytes
 adhesion of, to luminal surface of blood vessels, **283**: 179-207
 connective-tissue-degrading enzymes of, **256**: 233-253
 from sarcoids and normals, comparative reactivities of, to differential Kveim preparations, **278**: 700-710
 phagocytizing, mobilization of lysosomes in, **253**: 738-749
 polymorphonuclear
 lysosomal enzyme release from, cyclic nucleotide in, **256**: 222-232
 subcellular localization of neutral proteases in, **256**: 263-265
 procoagulant activity of, **283**: 208-217
 Leukocyte transfer for cancer in man, **277**: 516-521
- Levamisole
 as antiviral agent with immunopotentiating action, **284**: 139-152
 double-blind trial of, in resectable lung cancer, **277**: 260-268
 for cancer therapy, design of trials for, **277**: 252-259
 for herpes progenitalis, virus-specific immune responses after, **284**: 161-170
 in immunotherapy of malignant melanoma, **277**: 355-366
- Lewis blood group antigens and carcinoembryonic antigen, **259**: 389-403
- Lice, head, virulence of *Rickettsia prowazeki* for, **266**: 25-34
- Life, quality of, social indicators of, **261**: 15-19
- Life expectancy related to physical activity, **301**: 561-578
- Ligands
 aromatic, hydrogenated during ferrocene-arene reactions, **295**: 192-200
 mono-olefinic, and reactivity in iron-carbonyl complexes, **295**: 141-150
- Light
 astrophysical effects of magnetic fields on, **257**: 222-226
 continuum, from supernovae, **302**: 81-89
 laser, optical computing with, **267**: 430-447
- Light microscopy
 in studies of neurophysin-secreting pathways in brain, **248**: 92-111
 of host-parasite interface, **266**: 497-512
 optical, curves of and masses of x-ray binaries, **262**: 376-378
 optical variations in, of Cyg X-2, periodicity in, **302**: 403-407
 tonic and phasic effects of, in entrainment of circadian rhythms, **290**: 51-59
 vacuum ultraviolet, nonlinear generation of, in atomic vapors, **267**: 30-50
- Limb, regeneration of, in newt, effect of DMSO on, **243**: 257-268
- Limbic influences on human speech, **280**: 761-771
- Limbic system, tonic environmental influences on, **290**: 396-420
- Limbic-temporal dysfunction, lateralized, and psychopathology, **280**: 777-795

- Linear focus discharge, intense, in high-density ionization, **251**: 112-125
- Linguistic coding and internal information processing, covert oral behavior in, **270**: 57-89
- Linguistic competence in aphasia, **263**: 263-277
- Linguistic impairment in child, **263**: 59-69
- Linguistics
- Cartesian, **291**: 287-305
 - historical, and origin of language, **280**: 97-103
 - mathematical, and development of reasoning in child, **280**: 120-126
 - recent, and speech acts, **263**: 27-38
- Lipid
- function of, in bilayer ion permeability, **264**: 2-16
 - metabolism of, by endothelial cells in culture, **275**: 104-113
 - tissue, after injury to artery, **275**: 180-198
- Lipid bilayer in nonaqueous media, electric properties of, **303**: 295-297
- Lipid bilayer membrane
- as assay for ion-conductance-inducing membrane materials, **264**: 483-485
 - ion transport in, electric characteristics of, **303**: 266-280
 - lymphocytes and hemocyanin interacting with, **264**: 476-482
- Lipid-lipid interactions in model systems and membranes, **264**: 124-141
- Lipid membranes, black, channels along, **303**: 281-291
- Lipid metabolism
- effect of progestins on, **286**: 434-445
 - in marathon runners, **301**: 942-948
- Lipid phase transitions and $\text{Na}^+ + \text{K}^+$ -ATPase and protein conformational changes, **242**: 69-76
- Lipid profiles in elite distance runners, **301**: 346-360
- Lipolytic properties of neurophysin proteins, **248**: 324-335
- Lipoprotein interactions
- in biomembranes, **264**: 142-160
 - in man, **275**: 145-152
- Lipoproteins
- in aqueous solution, dielectric properties of, **303**: 142-155
 - low-density, in human fibroblasts, **275**: 244-257
 - plasma
 - and apolipoproteins, **275**: 169-179
 - in male and female runners, **301**: 748-763
 - low-density, interacting with arterial wall components, **275**: 153-168
 - soluble acidic, in neurosecretory granules, **248**: 218-234
 - triglyceride-rich, in atherogenesis, **275**: 138-144
- Lipoprotein uptake and degradation by arterial smooth muscle cells in tissue culture, **275**: 199-203
- Lipoprotein-X test in sarcoidosis patients with liver involvement, **278**: 439-444
- β Lipotropin, neuropeptides related to, behavioral effects of, **297**: 263-274
- β -Lipotropin precursor model, **297**: 84-107
- Lipotropins, structure-function relationships in, **297**: 63-83
- Liquid chromatographic analysis of ascorbate, **258**: 70-71
- Liquids
- molecular, glass transition and secondary relaxations in, **279**: 117-140
 - polymer, configurational statistical thermodynamics of, **279**: 2-14
- Lithium
- effects of, on alcohol preference and withdrawal, **273**: 371-377
 - interactions of, with amphetamine and cocaine, **281**: 441-455
- Lithium niobate, optical storage in, **267**: 373-383
- Liver (see also Hepatic entries)
- alterations in, in workers exposed to vinyl chloride, **246**: 172-194
 - angiosarcoma of
 - in VC-PVC production workers in Sweden, **246**: 249-250
 - pathology of, **246**: 268-277
 - in VC workers in the U.S., **246**: 231-236
 - cirrhosis of
 - clinical significance of α -fetoprotein in, **259**: 234-238
 - α -fetoprotein-producing cells in, **259**: 253-258
 - hemagglutination and radioimmunoassay in study of, **259**: 196-210
 - damage to, in PC production workers, **246**: 278-285
 - disposition of chemical carcinogens in, effect of DMSO on, **243**: 185-193
 - environment of function of, **244**: 603-623
 - experimental cancer of, α -fetoprotein-producing cells in, **259**: 217-220
 - fatty, and alcohol, **252**: 63-84
 - progesterone binding in, **286**: 355-368
 - rat, ethanol-induced dopamine metabolism in, **273**: 219-226
- Liver cells
- in rodents, effect of thermal and radio-frequency exposure on, **247**: 282-291
 - smooth muscle contractile protein antigens in, **254**: 489-504
- Liver differentiation and α -fetoprotein, **259**: 119-130
- Liver disease
- alcoholic, liver transplantation in patients with, **252**: 145-158
 - and alcohol and malnutrition, **252**: 22-23
 - and alcoholism and hypoglycemia, **273**: 338-342
 - in alcoholics, treatment of, **252**: 135-144
 - in PVC production workers, **246**: 88-94
 - unusual splenomegaly, in PVC production workers, **246**: 95-134
- Liver function tests and lipoprotein-X test in sarcoidosis patients with liver involvement, **278**: 439-444

- Liver injury, vinyl-chloride-induced, after cessation of exposure, **246**: 70-77
- Liver metabolism in experimental alcoholism, sodium pump regulating, **242**: 560-572
- Lobes, temporal, anatomic asymmetry of, **299**: 328-354
- Localization of language function, and anatomic variations in cortex, **280**: 834-843
- Locomotion in gastropod molluscs and brain evolution, **299**: 26-34
- Logic, and mathematical linguistics and development of reasoning in children, **280**: 120-126
- Longevity
and endurance sports, **301**: 653-655
and importance of physical activity, **301**: 671-702
- Long Island
Archaic on, **288**: 400-410
northwestern, late Quaternary reconstruction in, **288**: 545-570
- Looper, alfalfa, nuclear polyhedrosis virus in, **266**: 302-326
- Los Alamos Scientific Laboratory, safety considerations for laser program at, **267**: 135-151
- Lotze, the self, and American psychology, **291**: 168-177
- Louse, gut of, modification of antityphus antibodies through, **266**: 6-24
- Luminal surface of blood vessels, adhesions of leukocytes, erythrocytes, and noncellular material to, **283**: 179-207
- Lung
eosinophilic granuloma of, and external pulmonary granulomatoses, **278**: 612-617
flexible-bronchoscope biopsy of, in intrathoracic sarcoidosis, **278**: 522-527
granulomatous diseases of, differential diagnosis of, **278**: 528-531
- Lung cancer
immunotherapy of, **277**: 436-466
in metal workers in Japan, **271**: 269-272
in prospective surveillance of asbestos insulation workers, **271**: 448-456
resectable, trial of levamisole in, **277**: 260-268
- Lung interstitium, and Langerhans' cells, **278**: 599-611
- Lung water and capillary permeability in pulmonary sarcoid-like granulomatosis, **278**: 308-320
- Lupus pernio related to sarcoidosis of upper respiratory tract, **278**: 416-426
- Lutein interacting with chlorophyll dimers, **244**: 320-326
- Luteinizing hormone antisera against, localization of gonadotropic hormones with, **254**: 433-461
- Lymph nodes, granulomatous, elevation of angiotensin-converting enzyme in, **278**: 498-513
- Lymphocyte circulation and mobilization, disturbances of, in granulomatous disorders of lymphoid system, **278**: 19-28
- Lymphocyte cultures, thymocytes in, thymosin-induced differentiation in, **249**: 145-153
- Lymphocyte differentiation from precursor cells, **249**: 531-540
- Lymphocyte function
cyclic nucleotides in, **256**: 352-364
impairment of, in concanavalin-A-treated Friend-virus-infected mice, **276**: 466-478
in myasthenia gravis, **274**: 402-410
regulated by suppressor T cells, **256**: 365-374
- Lymphocyte membranes of athymic mice examined by scanning electron microscopy, **249**: 154-165
- Lymphocyte proteins, thymus-derived cell-mediated cytotoxicity to, **249**: 47-53
- Lymphocyte receptor mobility modulated by concanavalin A and colchicine, **253**: 455-469
- Lymphocytes
and hemocyanin interacting with lipid bilayer membranes, **264**: 476-482
bone marrow and blood, immunoglobulin determinants on, in children and on fetal tissue, **254**: 262-279
effect of microwaves on, **247**: 232-242
immunofluorescent staining of, for detection of surface immunoglobulins, **254**: 254-261
incorporation of analog purine nucleosides into, **255**: 412-434
in propagation of joint disease, **256**: 150-168
in uptake and reduction of dehydroascorbate, **258**: 238-242
leukemic and normal, altered by DMSO, **243**: 73-80
peripheral blood, in sarcoidosis, **278**: 101-107
phytohemagglutinin-activated autochthonous, for immunotherapy of human neoplasms, **277**: 45-51
role of, in destruction of bone and collagen, **256**: 132-140
sarcoid, B- and T-cell quantitation in, **278**: 69-79
sensitized against tumor cells, **276**: 165-175
suppressor, in myasthenia gravis, **274**: 527-535
T, effects of x-irradiation on, **256**: 342-351
T and B
and cutaneous anergy in inflammatory bowel disease, **278**: 565-573
and immune response to exotoxin and antigens of *Vibrio Cholerae*, **249**: 404-412
chemotactic lymphokine production by, **256**: 375-385
thoracic duct, adoptive immunotherapy using, **277**: 7-19
thymus-derived, cytolytic action of, and connective tissue, **256**: 141-149
tumor-infiltrating, **276**: 207-216
- Lymphocyte-stimulating hormone, isolation and quantification of, and related serum basic proteins, **249**: 166-176

- Lymphocyte-stimulating substance isolated from thymus extracts, **249**: 220-235
- Lymphocytic leukemia, effect of hemolytic streptococci on, **277**: 299-301
- Lymphocytotoxic antibodies in inflammatory bowel disease, **278**: 574-585
- Lymphoid cell lines, supernatants from, injected into metastatic cutaneous tumors, **276**: 584-591
- Lymphoid cells
human, membrane and intracytoplasmic immunoglobulin classes in, **254**: 243-253
intestinal Peyer's patch, **278**: 539-545
- Lymphoid system, granulomatous disorders of, lymphocyte circulation disturbances in, **278**: 19-28
- Lymphokines
chemotactic production of, by T and B lymphocytes, corticosteroid inhibition of, **256**: 375-385
in rheumatoid synovitis, **256**: 117-131
tumor-inhibiting, from tuberculous mice, **276**: 369-372
- Lymphosarcoma, immunotherapy of, tumor vaccines for, **277**: 305-312
- Lyonization in hemophilia, as cause of error in direct detection of heterozygous carriers, **240**: 141-146
- Lysosomal enzymes
microtubule-dependent release of, effects of cAMP and cGMP on, **253**: 750-762
release of, from polymorphonuclear leukocytes, modulation of, **256**: 222-232
- Lysosomal membrane, effect of DMSO on, **243**: 54-59
- Lysosomal proteases, human neutrophil, degrading joint connective tissue, **256**: 402-408
- Lysosomes
in vascular disease, **275**: 238-243
mobilization of, in phagocytizing human leukocytes, and microtubules, **253**: 738-749
- Lysozyme, serum, in experimentally induced granulomatous inflammation, **278**: 592-598
- α_2 -Macroglobulin and α_1 -antitrypsin interacting with neutrophil collagenase and elastase, **256**: 409-419
- Macromolecules
charged linear, dielectric properties of, **303**: 74-87
neurophysin-like, heterogeneous binding sites in, **248**: 480-493
- Macrophage-mediated cytotoxicity, potential role of, in rheumatoid arthritis, **256**: 275-287
- Macrophage migration inhibition test, beryllium, **278**: 204-211
- Macrophage neutral proteinases, and chronic inflammation, **278**: 176-189
- Macrophage reactivity in skin window of sarcoidosis patients, **278**: 201-203
- Macrophages
activated, biochemical characteristics of, **256**: 266-274
activation of
for antitumor immunity, **276**: 520-528
in treatment of neoplastic disease, **277**: 20-44
mediating tumor cell cytotoxicity, **276**: 134-145
role of, in destruction of bone and collagen, **256**: 132-140
significance of, in tumors, **276**: 124-133
- Macrorheology in atherogenesis, **275**: 10-27
- Madagascar, lemurs of, **293**: 160-169, 170-184
- Madeira and sugar-cane cultivation and slavery, **292**: 536-552
- Magnetic collapse, understanding of, and gravitational collapse, **257**: 189-221

immunotherapy of, with irradiated tumor
cells, oral bacillus Calmette-Guérin, and
levamisole, **277:** 355-366
stage II, bacillus Calmette-Guérin as surgical
adjuvant therapy for, **277:** 187-194
- Melanoma cells, malignant, surface antigens on,**
detected by IF method, **254:** 528-540
- Melanotropic properties of neuropeptide proteins,**
248: 324-335
- β -Melanotropins, peptides related to, **297:** 49-62
- Membrane-alcohol interaction in brain,**
reversibility of, **273:** 295-302
- Membrane-associated immunoglobulin determi-**
nants on bone marrow and blood
lymphocytes, **254:** 262-279
- Membrane ATP and organization of red cell**
Na:K pump, **242:** 459-460
- Membrane capacity, voltage-dependent, of squid**
giant axons, **303:** 306-321
- Membrane diffusing capacity in pulmonary**
sarcoidosis, **278:** 284-291
- Membrane excitation through voltage-induced**
aggregation of channel precursors, **264:**
247-264

- Membrane immunofluorescence in human transplantation biology, **254**: 280-288
- Membrane immunoglobulin classes in human lymphoid cells, **254**: 243-253
- Membrane-ion interactions as structural forces, **264**: 161-174
- Membrane noise, research into, **303**: 382-388, 389-398
- Membrane phenomena, slow, and "ionic" firing of *Aplysia* neuron, **290**: 103-113
- Membrane potential
effects of, on sodium and potassium fluxes in squid axon, **242**: 406-434
measured in mitochondria, and epr studies, **264**: 112-123
- Membrane processes, and "sandwich" complexation in cyclopeptides, **264**: 221-243
- Membranes (*see also specific membrane*)
biologic, electromagnetic fields interacting with, **247**: 117-124
black lipid, channels along, **303**: 281-291
cell, effects of cannabinoids and CNS depressants on, **281**: 151-161
circulating basement, circulating antibodies to, **254**: 600-602
erythrocyte (*see* Erythrocyte membranes)
excitable, electrical impedance of, **303**: 298-305
fetal, progesterone binding and metabolism in, **286**: 304-312
lipid bilayer
as assay for ion-conductance-inducing membrane materials, **264**: 483-485
ion transport in, electric characteristics of, **303**: 266-280
lymphocytes and hemocyanin interacting with, **264**: 476-482
lipid-lipid and lipid-protein interactions in, **264**: 124-141
lysosomal, effect of DMSO on, **243**: 54-59
microsomal, from gastric oxyntic cells, K^+ -stimulated ATPase system of, **242**: 255-267
muscle, dielectric properties of, and excitation-contraction coupling, **264**: 273-292
nerve, ionic gating structures in, **264**: 265-277
noise analysis and channel properties in, **303**: 382-388
planar bilayer, physical chemistry of, **303**: 243-265
plasma, studies of, and intestinal sugar transport, **264**: 414-327
- Membrane transport
and binding proteins, **264**: 358-372
of ascorbic acid, **258**: 243-252
- Membrane vesicles, isolated bacterial, active transport in, **264**: 350-357
- Memories, optical mass, **267**: 411-416
- Memory
disorders of, in brain-damaged patients, role of language in, **280**: 857-867
in culture, studies of, **285**: 297-307
- Men, elderly, alcoholism in, **273**: 558-571
- Mendelian modes of inheritance and origins of asymmetry, **299**: 283-305
- Menstrual cycle
effects of alcohol during, **273**: 576-587
varying stages of, protein composition of endometrium during, **286**: 233-248
- Mental care, institutional, in 19th-century America, **291**: 74-82
- Mental development, genetic inferences about, from data in twins, **299**: 306-308
- Mental disorder, from speculation to empiricism in study of, **291**: 104-135
- Mental disorders
diagnosis of, U.S.-U.K. project on, **285**: 676-686
- Mental health
and Benjamin Rush, **291**: 94-103
as unwanted variable in cross-cultural research, **285**: 712-716
in America, and Isaac Ray, **291**: 83-93
- Mental illness in hashish users, incidence of, **282**: 58-63
- Mental retardation
DMSO in, **243**: 449-459
in India and U.S., services and resources for persons with, **285**: 698-706
- 5-Mercapto-substituted pyrimidines, polynucleotides containing, **255**: 532-543
- Mero-receptor formation from oviduct progesterone receptor, **286**: 81-86
- Messenger RNA
globin
nucleotide sequences of, **241**: 290-309
of mouse spleen erythroblasts, **241**: 170-182
use of globin cDNA as hybridization probe for, **241**: 280-289
in rabbit uterus, progesterone induction of, **286**: 260-272
mouse α - and β -globin, polyadenylic acid in, **241**: 156-169
nonpolysomal, **241**: 183-190
progesterone-dependent, **286**: 125-134
- Messengers, interrelated intracellular, cAMP and calcium as, **253**: 789-796
- Messenia, archaeology and ethnography in, **268**: 158-167
- Mesothelioma in prospective surveillance of asbestos insulation workers, **271**: 448-456
- Metabolic activities of human neurophysins, **248**: 304-317
- Metabolic adjustments to marathon running in coronary patients, **301**: 466-483
- Metabolic alterations in acute heat stress injury in runners, **301**: 262-269
- Metabolic disposition of adenine arabinoside, **284**: 9-20
- Metabolic effects of alcohol
on heart, **252**: 243-249
on pancreas, **252**: 183-186
- Metabolic influences in experimental thrombosis, **275**: 28-46

- Metabolic inhibitors in regulation of mitotic apparatus, **253**: 362-377
- Metabolic potentials of skeletal muscles in sedentary man and endurance runners, **301**: 3-29
- Metabolic regulation seen by effects of microwave and black-light frequencies, **247**: 327-351
- Metabolic stability, increased, of 9- β -D-arabino-furanosyladenine 5'-monophosphate, **284**: 30-33
- Metabolism
- adrenocortical reserve, of contraceptive agent, and frequent marijuana use, **282**: 173-179
 - amino acid, in exercise, **301**: 56-63
 - aromatic hydrocarbon, in marine organisms, **298**: 482-496
 - ascorbic acid, **258**: 5-6
 - and ascorbate sulfate, **258**: 48-69
 - in man and subhuman primate **258**: 72-80
 - and organochlorine pesticides, **258**: 132-143
 - changes in, in guinea-pig offspring after maternal high intake, **258**: 401-409
 - during colds, **258**: 529-539
 - relationships of protein and mineral intake to, and related hormones, **258**: 382-400
 - ascorbic-2-sulfate, by human fibroblasts, **258**: 307-313
 - carbohydrate and lipid, in marathon runners, **301**: 942-948
 - catecholamine, influence of ethanol on, **273**: 263-279
 - cellular, interference of ethanol in, **252**: 11-20
 - cholesterol and bile acid, ascorbic acid in, **258**: 410-421
 - cholesteryl ester, in atherosclerotic arterial tissue, **275**: 228-237
 - collagen, function of ascorbic acid in, **258**: 264-277
 - comparative, of haloethers, **298**: 111-123
 - DMSO, after topical and parenteral application, **243**: 139-150
 - dopamine, ethanol-induced alterations of, in rat liver, **273**: 219-226
 - fetal hepatic in rat, and maternal ethanol consumption, **273**: 175-187
 - folate, hematologic abnormalities involving, in alcoholics, **252**: 316-327
 - glucose and lipid, effect of progestins on, **286**: 434-445
 - heme, and porphyrin, isotope studies of, **241**: 360-379
 - hepatic cellular, interference of ethanol in, **252**: 24-50
 - lipid, by endothelial cells in culture, **275**: 104-113
 - microsomal drug, effects of ascorbic acid on, **258**: 119-131
 - porphyrin and heme, red, white and blue eggs as models of, **244**: 570-590
 - progesterone, in fetal membranes, **286**: 304-312
 - purine nucleotide, effect of nucleoside analogs on, **255**: 489-500
 - ribavirin, and mechanism of action, **284**: 211-229
 - serotonin, and ethanol and body temperature, **273**: 247-255
 - vessel wall, in relation to atherosclerosis, **275**: 302-310
 - water, and chronic alcohol ingestion, **273**: 342-350
 - xenobiotic
 - and halogenated benzenes, **298**: 159-169
 - in marine animals, **298**: 505-521
- Metabolites
- ascorbic acid, distribution of, **258**: 103-118
 - DMSO, biological effects of, **243**: 104-109
 - mutagenic, of carcinogens, detected in urine by *Salmonella*/microsome test, **269**: 21-25
- Metal-arene complexes in organic synthesis, **295**: 36-51
- Metal carbonyls in alkynes and carbon-carbon triple bond dichotomy, **295**: 135-140
- Metalloporphyrins XXIII, unusual, and tumor localizers, **244**: 674-684
- Metals
- heavy, toxicity of, ascorbic acid protection against, **258**: 144-150
 - workers exposed to, cancer mortality patterns in, **271**: 243-249
- Metal vapors, organic chemistry of, **295**: 82-102
- Metal workers and lung cancer in Japan, **271**: 269-272
- Metastable states in Lennard-Jones fluid, **279**: 36-42
- Metastatic cutaneous tumors, effects of injection of supernatants from lymphoid cells lines on, **276**: 584-591
- Metathesis, olefin, and organic synthesis, **295**: 271-282
- Methadone
- and alcohol, **273**: 624-628
 - drug interactions with, **281**: 350-370
 - in treatment of monkeys, amphetamine-elicited dyskinesias after, **281**: 336-349
- Methana, agricultural practices of, ecological basis of, **268**: 236-250
- Methanethiol acting on Na⁺ + K⁺-ATPase, implications of, for hepatic coma, **242**: 573-576
- Methanol, carbonylation of, to acetic acid, **295**: 79-82
- Methanol extraction residue
- in chemioimmunotherapy of syngeneic mouse mammary carcinoma, **277**: 195-208
 - stimulatory effect of, on immunologically reactive cells, **276**: 536-549
- Methisazone in pediatric vaccinia complications, **284**: 118-121
- Methodological issues in cross-cultural psychology, **285**: 215-216

- Methodological problems
in drug interactions, **281**: 106-117
in study of slave family, **292**: 591-596
- Methodology
for risk assessment in occupational carcinogenesis, **271**: 393-395, 413-417
in clinical and experimental hypnosis, **296**: 69-85
- Methods, statistical extrapolation, for estimating cancer risks from animal data, **271**: 418-420
- Methotrexate-thymidine treatment of murine leukemia, **255**: 261-265
- 5-Methylarabinosylcytosine, cell-dependent anti-herpesviral activity of, **284**: 342-350
- Methylated nucleoside synthesis, inhibition of, **255**: 567-575
- Methylation, nactin- and valinomycin-type carriers having, and ion permeability, **264**: 34-60
- Methylcholanthrene sarcoma system, augmentation of tumor immunity in, **277**: 533-540
- 5-Methylcytidine synthesis, L-ethionine-dependent inhibition of, on tRNA level, **255**: 564-566
- N-Methyl isatin betathiosemicarbazone in contact inactivation of DNA and RNA virus, **284**: 533-543
- 9-Methylstreptimidone, effect of, on influenza virus infection, **284**: 667-675
- Metrics
Schwarzchild, field quantization in, **262**: 284-288
type-D, **262**: 246-252
- Mexico
clinical experience with ribavirin in, **284**: 278-283
18th-century, plantation society in, **292**: 226-241
integration and assimilation of Negro slaves in, **292**: 446-454
- Microbial activity, effects of, on aquatic pollutants, **298**: 104-110
- Microbial components, nonviable, immunotherapy with, **277**: 228-238
- Microexplosions, thermonuclear, with intense ion beams, **251**: 679-689
- Microfiber scaffolds, cell-lined, nonwoven, at blood interface, **283**: 419-437
- Microfluorometric evaluation of conjugate specificity, DASS system in, **254**: 94-107
- Microfluorometric immunoassays with antigens bound to Sepharose beads, **254**: 137-151
- Microheterogeneity of rat α -fetoprotein, **259**: 95-108
- Microirradiation studies, laser, **267**: 160-175
- Microorganisms
inhibition of, by pyrimidine nucleosides, **255**: 559-563
Rickettsia-like, transovarial transmission of, in mosquitoes, **266**: 152-161
vertical transmission of, in insects, **266**: 162-165
- Micropaleontological data, calibration of, in climatic terms, **288**: 93-118
- Microphotometry, laser flow, for analysis and sorting of mammalian cells, **267**: 176-190
- Micropollutants, organic, extraction and identification of, **298**: 20-30
- Microreology in atherogenesis, **275**: 10-27
- Microscope
immunoelectron, localizing IgA and α chain in mammary gland of rabbit, **254**: 190-202
light, in studies of neurophysin-secreting pathways in brain, **248**: 92-111
light and electron, of host-parasite interface, **266**: 497-512
scanning electron, to examine lymphocyte membranes of athymic mice, **249**: 154-165
- Microscopic study of motions of individual particles in blood, **283**: 241-255
- Microsporidian parasite of *Biomphalaria glabrata*, **266**: 513-527
- Microsomal ATPase, effect of electromagnetic fields on, **247**: 292-300
- Microsomal drug metabolism, effects of ascorbic acid on, **258**: 119-131
- Microtubule alterations, axonemal, in mussels, **253**: 192-212
- Microtubule assembly
biochemical studies of, **253**: 133-146
characterization of, **253**: 107-132
role of intermediates in, **253**: 78-89
role of nucleotides in, **253**: 573-576
role of rings in, **253**: 90-106
role of tubulin nucleotide reactions in, **253**: 562-572
- Microtubule-dependent movement of pigment granules in teleost chromatophores, **253**: 692-701
- Microtubule-dependent release of lysosomal enzymes, effects of cAMP and cGMP on, **253**: 750-762
- Microtubule protein
and cAMP-dependent protein kinase activity, **253**: 598-610
calf-brain, structural stability of, **253**: 284-291
in brain, phosphorylation of, **253**: 577-597
- Microtubule protein pools in early development, **253**: 304-317
- Microtubule research in perspective, **253**: 7-13
- Microtubules
and adrenal medulla, **253**: 653-669
and amphibian melanocyte, **253**: 685-691
and cAMP, calcium and secretion, **253**: 771-779
and cell elongation in lens, **253**: 333-347
and fluidity of cell surface, **253**: 445-454
and inhibition of axoplasmic transport by colchicine, podophyllotoxin, and vinblastine, **253**: 517-527
and mobilization of lysosomes in phagocytizing human leukocytes, **253**: 738-749
and movement of melanin granules in dermal melanocytes in frog, **253**: 702-710

- and thyroid hormone mobilization, **253**: 763-770
- as drug receptors, **253**: 213-231
- cold-labile and -stable, in mitotic spindle of mammalian cells, **253**: 428-439
- cytoplasmic
- and movement of pigment granules in cutaneous melanocytes of *Rana pipiens*, **253**: 711-722
 - biology of, **253**: 5-848
- flagellar, assembly of, **253**: 178-191
- form and arrangement of, **253**: 14-26
- in phasic pattern of insulin release, **253**: 630-652
- in replication cycles of animal viruses, **253**: 440-444
- involvement of, in action of vasopressin, **253**: 723-737
- participating in axonal transport, **253**: 472-506
- role of, in growth of nerve fibers, **253**: 535-544
- spindle, and chromosome movement, **252**: 383-406
- structure and assembly of, **253**: 60-77
- substructural analysis of, and polymorphic forms, **253**: 27-50
- x-ray patterns from, **253**: 53-59
- Microwave deflection, solar gravitational, measurement of, **262**: 493
- Microwave dose-response relationships on behavioral tasks, **247**: 410-416
- Microwave energy, distribution measurements of, in proximity to man, **247**: 473-480
- Microwave field, pulsed, synchronization of cortical neurons by, **247**: 82-86
- Microwave frequencies showing genetic continuity and metabolic regulation, **247**: 327-351
- Microwave irradiation of eye, dielectric lens for, **247**: 142-154
- Microwave ocular effects, single-exposure, **247**: 125-134
- Microwave power density, pyroelectric probe for measuring, **247**: 510-526
- Microwave production with intense relativistic electron beams, **251**: 441-457
- Microwave radiation
- and ascorbic acid changes in rabbit lens, **247**: 175-181
 - effects of
 - on behavior, **247**: 408-409
 - on embryo cell systems, **247**: 401-407
 - on enzymes, **247**: 301-304
 - inducing changes in rabbit lens, **247**: 166-174
 - interacting with fully ionized hydrogen plasma, **251**: 30-73
 - low-level
 - and behavioral baselines, **247**: 425-432
 - and spontaneous motor activities, **247**: 417-424
 - pulsed, behavioral effects of, **247**: 440-453
 - 2.45-GHz, Japanese quail embryo exposed to, **247**: 377-390
- Microwaves
- effects of
 - on blood-forming system, **247**: 232-242
 - on cell function and virus replication, **247**: 263-274
 - on granulocytes *in vitro*, **247**: 275-281
 - on nervous system, **247**: 109-116
 - on rat liver mitochondria, **247**: 251-262
 - exposure to, biochemical and neuroendocrine aspects of, **247**: 21-45
 - field measurements, absorbed dose, and biologic dosimetry of, **247**: 499-509
 - high-frequency, interacting with plasma, **251**: 74-93
 - in alteration of nervous system structure, **247**: 87-108
 - inducing acoustic effects in mammalian auditory systems, **247**: 194-218
 - in treatment of acute staphylococcal infections in rabbits, **247**: 305-311
 - low-intensity, and isolated neurons, **247**: 46-62
 - ocular effects of, on hypothermic rabbits, **247**: 155-165
- Middle Atlantic bight, late Quaternary paleogeographic changes in, **288**: 35-69
- Middle Atlantic region, Late Pleistocene vegetation in, **288**: 206-217
- Midline granulomatosis, **278**: 618-635
- Migration
- and development in the Serres basin, **268**: 59-70
 - cell, measured with HeNe laser, **267**: 152-159
- Migration inhibition with viral and tumor antigens in transplantable mammary tumor systems, **276**: 358-368
- Mildew, powdery, population genetics of epidemics of, **287**: 151-163
- Mills, occupational cancer in, Federal role in prevention of, **271**: 216-219
- Mind, self-conscious, and evolution of brain, **299**: 161-179
- Minerals
- asbestiform, gold miners exposed to, mortality among, **271**: 336-344
 - fortification of foods with, **300**: 151-160
 - intake of, and metabolism of L-ascorbic acid, **258**: 382-400
- Miners
- copper, bronchogenic carcinoma in, **271**: 260-268
 - gold
 - exposed to asbestiform mineral, mortality among, **271**: 336-344
 - exposed to asbestos fiber, **271**: 345-352
 - uranium
 - early indices of cancer risk in, **271**: 377-383
 - respiratory disease mortality in, **271**: 280-293
- Mines, occupational cancer in, Federal role in prevention of, **271**: 216-219
- Minimycin formation by *Streptomyces hygroscopicus*, **255**: 390-401
- Mississippi, polluted habitats of, diseases of estuarine fishes of, **298**: 427-462
- Mist, cutting-oil, cancer in workers exposed to, **271**: 94-101

Mites

- Leptotrombidium*, transovarial transmission of *R. tsutsugamushi* in, **266**: 80-90
 trombiculid, acquisition of *R. tsutsugamushi* by, during feeding process, **266**: 91-114

Mitochondria

- beef-heart, divalent cation ionophores derived from, **264**: 98-111
 membrane potentials measured in, and epr studies, **264**: 112-123
 rat liver, effect of microwaves on, **247**: 251-262
 Mitochondrial oxidative phosphorylation, effects of electromagnetic fields on, **247**: 292-300

- Mitogenic activity of polyadenylic-polyuridylic acid complexes, **249**: 370-379

- Mitogens and T-cell heterogeneity, **249**: 43-46

- Mitosis, mechanism of, **253**: 407-427

Mitotic apparatus

- of sea urchin isolated with glycerol-dimethyl sulfoxide, **253**: 378-382
 regulation of, by glycols and metabolic inhibitors, **253**: 362-377

- Mitotic spindle of mammalian cells, cold-labile and cold-stable microtubules in, **253**: 428-439

- MLC, serotyping for, **254**: 289-295

Model

- flip-flop, of $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 203-219
 heterotropic relaxation, for $\text{Na}^+ + \text{K}^+$ -ATPase, and Na^+ , K^+ , and nucleotide interactions, **242**: 268-279

- Modernity, individual, in different ethnic and religious groups, **285**: 539-564

- Modernization in Greece, barriers to, **268**: 28-42

- Modernization-relevant values in native and rural populations in traditional and modern environment, **285**: 582-592

- Mokola virus of rabies serogroup in cell cultures, **266**: 241-250

- Molecular approaches to inhibit oncogenesis by RNA tumor viruses, **284**: 444-462

- Molecular aspects of tactoid formation in man and animals, **241**: 623-637

Molecular biology

- of Factor VIII
 clinical approach to, **240**: 370-377
 theoretical approach to, **240**: 378-388
 of phenobarbital actions and interactions, **281**: 372-383

- Molecular forms of ACTH, **297**: 27-48

- Molecular genetics, regulation of research on, **265**: 178-192

- Molecular liquids and crystals, glass transition and secondary relaxations in, **279**: 117-140

Molecular mechanism

- of antiviral activity of trifluorothymidine, **255**: 317-325
 of carriers and channels, **264**: 203-220
 of 5-fluorodeoxyuridine, **255**: 326-331
 potential, of thalassemias and related disorders, **241**: 132-141

- Molecular orbital theory of chlorophyll, **244**: 204-213

- Molecular origin of relaxations in polymers, **279**: 104-116

- Molecular properties of acetylcholine receptor, **264**: 183-202

- Molecular species exposed to 100-MHz radio-frequency fields, Raman spectroscopy of, **247**: 323-326

- Molecular structural studies of human Factor VIII, **240**: 8-33

Molecules

- ^{13}C relaxation in, nondipolar contributions to, **248**: 458-462

- small, modulating hemoglobin function, **241**: 545-548

- Molecule technology, recombinant DNA, issues posed by, **265**: 59-81

Molluscites

- and Rickettsia-like plant disease agents in insects, **266**: 276-292

- in insects, **266**: 276-292

- Molluscan hosts and schistosome larvae, **266**: 480-496

- Molluscan phagocytes, morphology of, **266**: 343-379

- Mollusc-parasite interactions, **266**: 445

Molluscs

- bivalve, neoplastic disease in, **298**: 356-373
 estuarine, neoplasms in, **298**: 225-233
 gastropod, locomotion of, and brain evolution, **299**: 26-34

- Molybdenum complexes, η^4 -diene and η^3 -allyl, **295**: 186-191

- Momentum transfer in accreting black holes, **262**: 113-122

- Monetary order, world, **261**: 62-72

- Mongoloid children, retardation in, DMSO therapy in, **243**: 421-431

- Monitoring, industrial, cytogenetic approach to, **269**: 4-11

Monkeys

- cerebral dominance in, **280**: 732-744
 hemispheric specialization in, **299**: 222-232
 multiple hemoglobin α -chain loci in, **241**: 39-60
 rhesus, speech perception in, **280**: 694-707
 Monoamine cell systems, immunohistochemistry in study of, **254**: 407-432

Monochloroethene

- acute experimental toxicity of, **246**: 154-158
 experimental chronic poisoning with, **246**: 159-163

- Monoclonal character of atherosclerotic plaques, **275**: 96-100

- Monocyte receptor activity for immunoproteins in patients with sarcoidosis, **278**: 190-200

Monoglycosides (see also Glycosides)

- cardiac, and $\text{Na}^+ + \text{K}^+$ -ATPase, association and dissociation rates of, **242**: 598-616

- Mononuclear cells, immunologic identification of subpopulations of, in sarcoid granulomas, **278**: 136-146

- Mononuclear phagocytes, kinetics of, **278**: 161-175
- Mono-olefinic ligands, reactivity of, in iron-carbonyl complexes, **295**: 141-150
- Monopoles
magnetic, and fiber bundles and gauge fields, **294**: 86-97
strings and instantons, **294**: 74-79
- Morphine
dependence on, responsivity to naloxone during, **281**: 252-261
for pain, **296**: 175-193
- Morphine-like activity of β -endorphin from pituitary, **297**: 158-166
- Morphine-like substances, recent developments in, **297**: 84-107
- Morphogenesis
of nuclear polyhedrosis virus of alfalfa looper, **266**: 302-326
societal, and intra-familial violence, **285**: 717-730
- Morphologic aspects of experimental myasthenia gravis, **274**: 337-353
- Morphologic cerebral asymmetries of modern man, fossil man, and nonhuman primate, **280**: 349-366
- Morphologic changes of motor units in myasthenia, **274**: 6-19
- Morphologic evidence for participation of microtubules in axonal transport, **253**: 472-506
- Morphologic review of microtubules, **253**: 14-26
- Morphologic studies of microwave effects on nervous system, **247**: 109-116
- Morphology
body, and capacity for hypnosis, **296**: 105-118
of cells of sarcoid granuloma, **278**: 147-160
of molluscan phagocytes, **266**: 343-379
of tumor cells, effect of DMSO and dimethylformamide on, **243**: 164-171
- Mortality
cancer
among cadmium workers, **271**: 273-279
among rubber workers, epidemiologic study of, **271**: 125-137
among workers exposed to cutting-oil mist, **271**: 94-101
associated with exposure to metals, **271**: 243-249
in lead industry, **271**: 250-259
in steel industry, **271**: 228-238
from respiratory disease among uranium miners, **271**: 280-293
in fibrous glass production workers, **271**: 324-335
in gold miners exposed to asbestiform mineral, **271**: 336-344
in vinyl chloride-polyvinyl chloride production workers, **246**: 225-230
related to physical activity, epidemiologic studies of, **301**: 703-719
- Mosquitoes, Rickettsia-like microorganisms transovarially transmitted in, **266**: 152-161
- Mössbauer absorption and emission spectroscopy, and hemeproteins, **244**: 142-162
- Mother-child dyad, vocalizing in unison and alternation in, **263**: 89-100
- Mother-infant exchanges as epigenesis of conversational interaction, **263**: 89-100
- Motivating functions of stimulus in animal behavior, **290**: 60-71
- Motivation and sensory affect, **290**: 18-34
- Motor activity, spontaneous, affected by low-level microwave radiation, **247**: 417-424
- Motor apparatus, supporting, diseases of, DMSO for, **243**: 497-499
- Motor end plate
in myasthenia gravis and experimental autoimmune myasthenia gravis, **274**: 60-79
of normal and pathologic muscle, acetylcholine receptor at, **274**: 85-107
- Motor nerve ending, axonal transport to and from, **274**: 31-45
- Motor performance in hashish users, effects of cannabis on, **282**: 313-322
- Motor sequencing skills, manual asymmetry in, **299**: 319-327
- Motor system, abdominal, of hermit crab, origins of asymmetry in, **299**: 43-58
- Motor units, morphologic and histochemical changes of, in myasthenia, **274**: 6-19
- Mouse
fetal, ontogeny of erythropoiesis in, **241**: 113-118
fetal hemoglobin in, **241**: 683-690
genetics of hemoglobins in, **241**: 25-38
spleen erythroblasts of, globin mRNA of, **241**: 170-182
- Movement, purposive, after somatosensory deafferentation in monkeys, **290**: 348-365
- mRNA (see Messenger RNA)
- Mucosa, gastric, Cl^- - HCO_3^- -exchange in, **264**: 442-455
- Murray, Henry A., **291**: 321-322
- Muscle fiber, adaptive responses in, to endurance exercise, **301**: 411-423
- Muscle fiber composition in elite distance runners, **301**: 323-327
- Muscle fiber recording in myasthenia gravis patients with jitter phenomenon, **274**: 189-202
- Muscle fiber ultrastructure and acetylcholine blockade of neuromuscular junction, **274**: 46-59
- Muscle membrane, dielectric properties of, and excitation-contraction coupling, **264**: 278-292
- Muscle pathology in alcoholism, **273**: 351-359
- Muscle receptors in cardiovascular response to exercise, **301**: 232-242
- Muscles
innervated and chronically denervated, effect of myasthenic serum factors on, **274**: 475-492

- normal and pathologic, acetylcholine receptor at motor end plates of, **274**: 85-107
- skeletal
- cytochrome *c* turnover in, effects of endurance exercise on, **301**: 431-439
 - fiber types and metabolic potentials of, **301**: 3-29
 - smooth, contractile and relaxing proteins of, **275**: 78-86
- Musical instruments of Panare Indians, symbolic aspects of, **293**: 206-214
- Mutagenesis screening
- Drosophila* for, **269**: 34-36
 - role of cytogenetics in, **269**: 12-15
- Mutagenic effects of products of ozonation reactions in water, **298**: 124-140
- Mutagenic metabolites of carcinogens detected in urine with *Salmonella*/microsome test, **269**: 21-25
- Mutagenic risks in communities with polyvinyl chloride production facilities, **271**: 49-57
- Mutagens
- detected by DNA repair, **269**: 37-42
 - detected in blood and urine, **269**: 16-20
 - environmental carcinogens as, method for detecting, **271**: 5-13
 - environmental chemical, detected by *Drosophila*, **269**: 26-33
- Mutation
- and carrier recognition in genetics and hemophilia, **240**: 121-131
 - in plant cell culture, induction and selection of, **287**: 385-
 - induced, in natural genetic variability, **287**: 367-384
- Mya arenaria*
- from oil-impacted sites, neoplasms in, **298**: 409-426
 - New England populations of, neoplasms in, **298**: 522-534
- Myasthenia gravis, **274**: 1-
- alternate-day prednisone in, **274**: 596-607
 - and acetylcholine receptor, **274**: 116-129
 - as receptor disorder, **274**: 226-234
 - autoimmune
 - biochemical and immunochemical aspects of, **274**: 254-274
 - cellular and humoral responses in, **274**: 283-299 - experimental
 - cellular and humoral responses in, **274**: 283-299
 - end-plate potentials in, **274**: 300-318
 - motor end plate in, **274**: 60-79
 - neuropsychologic and pharmacologic aspects of, **274**: 275-282 - α -bungarotoxin in, immunoperoxidase localization of, **274**: 20-30
 - corticosteroids and anticholinesterases for, **274**: 623-630
 - corticotropin and corticosteroids in, **274**: 577-595
 - diagnosis of
 - by nerve stimulation, **274**: 174-188
 - by saccade fatigue and response to edrophonium, **274**: 631-641 - edrophonium optokinetic nystagmography in diagnosis of, **274**: 642-651
 - electrical testing in diagnosis of, **274**: 203-222
 - evidence for immunodeficiency type in, **274**: 382-389
 - experimental, immunologic, electrophysiologic and morphologic aspects of, **274**: 337-353
 - gallium scans in, **274**: 536-554
 - HL-A and LD antigens in, **274**: 451-460
 - HL-A antigen markers in, **274**: 440-450
 - immunosuppressive procedures for, **274**: 659-676
 - in patients with thymoma, and HL-A antigens and autoantibody production, **274**: 468-474
 - jitter phenomenon in, single-muscle fiber-recording of, **274**: 189-202
 - long-term therapy with prednisone and thymectomy for, **274**: 608-622
 - lymphocyte function in, **274**: 402-410
 - morphologic and histochemical changes of motor units in, **274**: 6-19
 - motor end plate in, **274**: 60-79
 - neuromuscular block in, **274**: 143-173
 - immune factors in, **274**: 493-515
 - ocular, oral corticosteroids in treatment of, **274**: 652-658
 - role of immunologic deficiency in, **274**: 461-467
 - serum acetylcholine-receptor antibodies in, **274**: 235-243
 - suppressor lymphocytes in, and thymectomy, **274**: 527-535
 - T- and B-cell activity in peripheral blood of patients with, **274**: 411-420, 421-433
 - thymectomy in, pathologic and electrophysiologic correlations with, **274**: 555-573
- Myasthenic serum, binding of acetylcholine receptors to alpha bungarotoxin after exposure to, **274**: 244-253
- Myasthenic serum factors, effect of, on innervated and denervated muscles, **274**: 475-492
- Mycobacterial fractions, mode of action of, in antitumor immunity, **276**: 536-549
- Mycobacterium bovis*, cell wall skeleton of, cancer immunotherapy with, **277**: 209-227
- Myeloblastosis virus DNA polymerases, avian, inhibited by anthrocycline compounds, **284**: 566-575
- Myelocytic leukemia, immunotherapy of, effects of vaccination schedules on, **277**: 367-383
- Myers-Briggs type indicators in psychologic test of marathon runners, **301**: 1010-1019
- Myocardial blood flow during exercise, **301**: 213-223
- Myocardial infarction, depression after, and distance running, **301**: 1029-1038

- Myocardial $\text{Na}^+ + \text{K}^+$ -ATPase, solubilized, **242**: 53-68
- Myocardial sarcoidosis, fatal, clinicopathologic studies of, **278**: 455-469
- Myocardium, mammalian, pharmacologic effects of DMSO on, **243**: 110-121
- Myoglobin
manganese-substituted, **242**: 174-186
structure of, in primates and tree-shrew, **241**: 380-391
- Myoglobinuria in marathon runners, and carbohydrate and lipid metabolism, **301**: 942-948
- Myopathy, alcoholic, phosphate depletion in, **252**: 274-286
- Mysoline in management of sedative-withdrawal seizures, **273**: 378-380
- Myth
in Peruvian Andes, **293**: 246-274
of slave-breeding in Barbuda, **292**: 510-535
- Myxine glutinosa*, hepatomas and other neoplasms in, **298**: 342-355
- Nactin-type lectins with some methylation in mediation of ion permeability, **264**: 34-60
- Naegleria*, cell differentiation in, flagellar tubulin synthesis during, **253**: 318-332
- Nagasaki (Japan), α -fetoprotein and hepatitis B antigen in, epidemiologic studies of, **259**: 239-247
- $\text{Na}^+ + \text{K}^+$ -ATP (see Sodium, potassium-adenosine triphosphate)
- $\text{Na}^+ + \text{K}^+$ -ATPase (see Sodium, potassium-adenosine triphosphatase)
- Nalaxone, responsiveness to, during morphine dependence, **281**: 252-261
- 2-Naphthylamine and benzidine and voluntary substitution of technological alternatives, **271**: 170-175
- Narcotic agonists and antagonists, psychoactive drugs interacting with, **281**: 321-330
- Narcotic analgesics and antagonists, pharmacologic factors altering, **281**: 262-272
- Narcotic antagonists
disposition of, **281**: 273-287
interactions of, **281**: 288-296
with narcotics in primates, **281**: 331-335
narcotics, and ethanol, interactions of, during acute, chronic, and withdrawal states, **281**: 297-310
- Narcotics
analgesic and respiratory actions of, and biogenic amines, **273**: 256-262
disposition of, **281**: 273-287
interacting with narcotic antagonists in primates, **281**: 331-335
narcotic antagonists, and ethanol, interactions of, during acute, chronic and withdrawal states, **281**: 297-310
- Nassarius obsoletus* infected with rediae of *Himasthla quissetensis*, **266**: 497-512
- National Cancer Institute, role of
in national cancer program on environmental carcinogens, **298**: 593-594
in prevention of occupational cancer, **271**: 208-213
- National drug abuse data base, maturing, and polydrug abuse, **281**: 311-320
- National Institute of Alcohol Abuse and Alcoholism, Laboratory of Alcohol Research in, **273**: 79-80
- National Institute of Occupational Safety and Health, policy of, on occupational carcinogenesis, guidelines for, **271**: 200-207
- Natriuresis
and inhibition of renal $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 501-518
and neurophysins, **248**: 317-323
- Natriuretic peptides from posterior pituitary, and neurophysin binding, **248**: 336-344
- Natural languages
logical diversity of, **280**: 73-91
uniqueness of, hypothesis about, **280**: 33-41
- Nature
of liquid water, **302**: 10-19
woman's, and man's culture, **293**: 15-24
- Navajo children, respiratory illness in, vitamin C for, **258**: 513-522
- Naval Research Laboratory, guidelines for x-ray laser research at, **267**: 3-15
- N^6 -dimethyladenosine synthesis, L-ethionine-dependent inhibition of, on tRNA level, **255**: 564-566
- Neanderthal flower burial in Shanidar cave, **293**: 114-124
- Neck, cancer of
and alcohol, **252**: 374-377
neuraminidase-treated tumor vaccine and bacillus Calmette-Guérin for, **277**: 339-344
- Neisseria gonorrhoeae*, identification of, by immunofluorescence, **254**: 400-406
- Neisseria* infections diagnosed by defined immunofluorescence, **254**: 334-349
- Neonate, clinical effects of pharmacologic agents on, **281**: 74-89
- Neoplasms (see also specific tumors and Tumors)
cutaneous, effects of nucleoside analogs on, **255**: 216-224
immunotherapy of, phytohemagglutinin-activated lymphocytes for, **277**: 45-51
in aquatic animals, **298**: 305-315
in aquatic pulmonate snail, **266**: 411-425
in Atlantic hagfish, **298**: 342-355
in estuarine mollusks, **298**: 225-233
in marine animals related to environment, **298**: 374-388
in marine fishes and water waste discharge, **298**: 210-224

- in New England populations of soft-shell clams, **298**: 522-534
- in rainbow trout related to environment, **298**: 389-408
- in soft-shell clams from oil-impacted sites, **298**: 409-426
- in workers in wood and pulp industry, **271**: 294-300
- ovarian, in ornamental hybrid carp of Japan, **298**: 330-341
- rat immunobiology of, **276**: 3-10
- risk of
- and household contact with asbestos, **271**: 311-323
 - in workers exposed to vinyl chloride, **271**: 40-48
- virally induced murine, immunotherapy for, **276**: 557-564
- Neoplastic disease
- in bivalve molluscs from Oregon estuaries, **298**: 356-373
 - nucleoside analogs in treatment of, **255**: 266-268
 - treatment of, recognition factors and macrophage activation in, **277**: 20-44
- Neoplastic effects of exposure to vinyl chloride-polyvinylchloride, **246**: 251-257
- Nephron, rat, function of $\text{Na}^+ + \text{K}^+$ -ATPase in, **242**: 489-500
- Nephropathies, malaria-associated, and glomerular deposits and IgG subclasses, **254**: 332-333
- Nerve ending, motor, axonal transport to and from, **274**: 31-45
- Nerve fibers, growth and stabilization of, and microtubules, **253**: 535-544
- Nerve membrane, ionic gating structures in, **264**: 265-277
- Nerve pathology in alcoholism, **273**: 351-359
- Nerves (*see also specific nerve*)
- adrenergic and cholinergic, intra-axonal transport of neurotransmitters in, **253**: 507-516
 - ionic conductance in, specific chemical groups controlling, **264**: 293-303
- Nerve stimulation in diagnosis of myasthenia gravis, **274**: 174-188
- Nervous system (*see also Central nervous system*)
- effects of electromagnetic radiation on, **246**: 15-20
 - effects of microwave on, morphologic and electroencephalographic studies of, **247**: 109-116
 - microwaves altering, **247**: 87-108
 - of invertebrate, and lateralization, **299**: 72-73
 - tissues of, immunohistochemistry in study of, **254**: 407-432
- Neural control of ACTH release in response to hemorrhage, **297**: 477-497
- Neural factors in atherogenesis, experimental studies of, **275**: 117-130
- Neural function and behavior, relationship between, **247**: 433-439
- Neural mechanisms in interactive models for evolution of language, **280**: 660-672
- Neural organization, language, and fossil record, **280**: 367-369
- Neural pathways in ACTH regulation, **297**: 455-476
- Neural regulation
- of adrenal size, **297**: 393-394
 - of compensatory adrenal growth, **297**: 373-392
- Neuraminidase-treated tumor cells as immunogen in leukemia, **277**: 313-331
- Neuraminidase-treated tumor vaccine in therapy for head and neck cancer, **277**: 339-344
- Neurite development
- and effects of derivatives of cAMP, colchicine and colcemid, **253**: 545-561
 - in vitro*, effect of DMSO on, **243**: 279-296
- Neuroanatomy, concept of symmetry in, **299**: 186-196
- Neurobiological correlates of cocaine, amphetamine and lithium interactions, **281**: 441-455

- Neurochemical basis for alcohol as euphoriant, **273**: 159-166
- Neuroendocrine tissues, adrenal steroid feedback on, **297**: 568-579
- Neurohypophyseal function, radioimmunoassays of neurophysins for, **248**: 281-303
- Neurohypophyseal hormones
- binding to neurophysins of, **248**: 423-441
 - bovine, interacting with neurophysin, **248**: 463-479
- Neurohypophyseal proteins, axonal transport and turnover of, **248**: 46-63
- Neurology, comparative, of vocalization and speech, **280**: 745-757
- Neuromuscular block in myasthenia gravis, **274**: 143-173
- cellular and humoral immune factors in, **274**: 493-515
- Neuromuscular junction, acetylcholine blockade of, **274**: 46-59
- immunologically induced defect in, **274**: 319-336
- Neuromuscular transmission, pre- and postjunctional mechanisms in, **274**: 3-5
- Neuron (*see also specific neuron*)
- Aplysia*, "tonic" firing of, **290**: 103-113
 - central catecholamine, arousal functions of, **270**: 45-56
 - cortical, synchronization of, by pulsed microwave field, **247**: 82-86
 - excitability of, effect of DMSO on, in *Aplysia* ganglion cells, **243**: 337-357
 - interaction of marijuana with other drugs in, **281**: 190-197
 - isolated, effects of low-intensity microwaves on, **247**: 46-62

- neurosecretory, in hypothalamus and median eminence in animals, **248**: 134-152
possible sites in, for interactions of drugs of abuse, **281**: 11-23
- Neuropeptides related to ACTH, MSH, and β LPH, behavioral effects of, **297**: 263-274
- Neurophysin binding and natriuretic peptides from posterior pituitary, **248**: 336-344
- Neurophysin-hormone binding, **248**: 494-512
- Neurophysin-like macromolecules, heterogeneous binding sites in, **248**: 480-493
- Neurophysin-like material, immunoreactive, in human target organs and pineal gland, **248**: 157-171
- Neurophysin-like proteins from bovine pineal gland, **248**: 172-183
- Neurophysin I, bovine, structural studies of, **248**: 408-422
- Neurophysin proteins
historical aspects of, **248**: 6-14
in tumors associated with inappropriate ADH secretion, **248**: 153-156
isolation of, new results in, **248**: 384-396
lipolytic and melanotropic properties of, **248**: 324-335
purification of, advances in, **248**: 365-377
radioimmunoassay of, to demonstrate independent secretion, **248**: 246-256
transport and release of, and phosphorylation of neurosecretory granules, **248**: 80-91
transport and turnover of, **248**: 15-35
- Neurophysins, **248**: 5-512
analyzed by slab gradient gel electrophoresis, **248**: 378-383
and natriuresis, **248**: 317-323
and soluble acidic lipoproteins in neurosecretory granules, **248**: 218-234
binding to hormones, equilibrium dialysis studies of, **248**: 451-457
bovine, interacting with neurohypophyseal hormones, **248**: 463-479
human, metabolic activities of, **248**: 202-217
interacting with polypeptide ligands, **248**: 442-450
isolated from bovine neurosecretory granules, some properties of, **248**: 235-245
neurohypophyseal hormones and analogs binding to, **248**: 423-441
of guinea pig, isolation, development and biosynthesis of, **248**: 36-45
primary structure and evolution of, **248**: 397-407
quantified by gel electrophoresis in rat with diabetes insipidus, **248**: 345-364
radioimmunoassay of, to understand neurohypophyseal function, **248**: 281-303
release and clearance of, **248**: 272-280
storage and transport of, in hypothalamo-neurohypophyseal system, **248**: 112-133
synthesized by mouse hypothalamic cells, **248**: 64-79
- Neurophysins I and II
from bovine pituitary lobe, **248**: 172-183
radioimmunoassay of, in human plasma, **248**: 257-271

genetic interdependence of, in crop epidemics, **287**: 97-106
in crop disease, interactions between, **287**: 124-150
microsporidian, of *Biomphalaria glabrata*, **266**: 513-527
of estuarine fishes in polluted habitats of Mississippi, **298**: 427-462
- Parasitic agents, antibodies to, detected by immunofluorescence, **254**: 304-314
- Parasitic diseases, immunoenzyme methods in diagnosis of, **254**: 331
- Parents, alcoholic, behavior disorders in children of, **273**: 507-517
- Parkhill site, Ontario, Great Lakes Paleoindian at, **288**: 349-354
- Particle creation by gravitational fields, **262**: 298
- Particle detectors and black hole evaporation, **302**: 186-190
- Particle field analysis, airborne holography techniques for, **267**: 448-459
- Particle horizons of red shifts in Friedmann universes, **262**: 470-471
- Particles
elementary, magnetic susceptibilities of, **257**: 56-71
in blood
capture and retention of, fluid dynamic factors affecting, **283**: 270-279
individual, microscopic study of motions of, **283**: 241-255
virus-like, in early rheumatoid arthritis, **256**: 39-64
- Pastoral adaptive strategies in southern Argolid, **268**: 275-285
- Pathobiology of noninsect invertebrates, **266**: 332-333
- Pathogenic effects of plant disease agents on vector insects, **266**: 259
- Pathogenic rickettsiae and their arthropods, **266**: 3-5
- Pathogens, plant, and selection pressures, **287**: 207-222
- Pathologic conditions in *Biomphalaria glabrata*, genetic studies of, **266**: 394-410
- Pathology
invertebrate, in International Union of Biological Sciences, **266**: 537-540
of alcoholism seen at autopsy, **273**: 385-387
of muscle and nerve in alcoholism, **273**: 351-359

- Pathophysiologic role for alcohol dehydrogenase, retinol in, 273: 317-327
- Pathophysiology
 fetal, of human α -fetoprotein, 259: 59-73
 of thalassemias, 241: 274-279
- Pathosystems, plant, 287: 238-242
- Patient-therapist relationship in hypnotherapy, 296: 238-249
- Patterning
 in Piedmont Archaic, 288: 375-391
 of behavior and tonic hypothesis, 290: 370-395
- Peasant incorporation on Cyprus in last century, 268: 363-378
- Peccaries, extinction of, 288: 538-544
- Pedestrian races, six-day, 301: 853-857
- Pediatric practices, genetic medicine in, 265: 134-140
- Pediatric vaccinia, complications of, methisazone in, 284: 118-121
- Pedological record at Paleoindian sites in Northeast, 288: 234-244
- Peloponnesus
 northwestern corner of (Mavrikion), 268: 222-235
 premodern, under Venetian rule (1685-1715), 268: 92-108
 southeast ethnic mosaic in, and folk culture of Maniat, 268: 199-206
- Penicillamine treatment of rheumatoid arthritis, 256: 330-337
- Peptides
 natriuretic, from posterior pituitary gland, and neurophysin binding, 248: 336-344
 novel, of brain and hypophysial origin, 297: 131-157
 opioid, in brain and pituitary, 297: 108-114
 plant antiviral, inhibiting poliovirus replication, 284: 431-440
 related to corticotropins and β -melanotropins, 297: 49-62
 related to β -endorphin, biologic activity of, 297: 115-130
 vasoactive intestinal, and adrenal cAMP and steroid synthesis, 297: 314-328
- Peptidyl tRNA in the reticulocyte, 241: 310-321
- Perception
 auditory, and speech evolution, 280: 708-717
 cross-modal, in apes, 280: 143-149
 in cross-cultural research, 285: 505-513
 in hashish users, effects of cannabis on, 282: 313-322
 in visually based language, 263: 225-235
 person, of Jewish and Druze kindergarten children, 285: 338-354
 self, of female distance runners, 301: 808-815
 speech, in human infant and rhesus monkey, 280: 694-707
- Perceptual processes and hypnosis, 296: 274-283
- Performance
 and competence, some comments on, 263: 201-204
 relationship of, to competence, 263: 197-200
 theory of, place of grammar in, 263: 171-177
- Periodicity in optical light variations of Cyg X-2, 302: 403-407
- Peritoneoscopy showing unusual splenomegaly liver disease in PVC production workers, 246: 95-134

- Permeable surfaces, 283: 410-418
- Peroovskite-type oxides, oxidation and reduction over, defect chemistry and catalysis in, 272: 3-21
- Peroxidase intermediates, chemistry of, 244: 80-93
- Peroxidase-labeled antibody method, 254: 203-211
- Perseverative-chaining model, and referent communication in schizophrenia, 270: 124-140
- Personality
 and culture revisited, 285: 119-130
 of adults, effect of chronic exercise on, 301: 958-969
- Personality studies of Costa Rican marijuana users, 282: 266-306
- Personological system, indispensables for making of, 291: 323-331
- Peruvian Andes, disaster, social structure and myth in, 293: 246-274
- Peruvian coast, prehistoric architecture on, state bureaucracies reflected in, 293: 229-245
- Pest epidemics in Japan, 287: 35-44
- Pesticides, organochlorine, and ascorbic acid metabolism, 258: 132-143
- Pests, insect, defense of rice against, 287: 287-295
- Peyer's patch lymphoid cells, intestinal, 278: 539-545
- Peyote ritual, alcoholics in, observations of, 273: 518-524
- Phagocytes
 molluscan, morphology of, 266: 343-379
 mononuclear, kinetics of, 278: 161-175
- Phantom heads, contrast of dose distribution in, due to aperture and plane wave sources, 247: 454-472
- Phantoms immersed in radio-frequency fields, measurements of power absorption by, 247: 494-498
- Pharmacokinetic approaches to study of drug interactions, 281: 24-39
- Pharmacologic agents
 clinical effects of, on pregnancy, fetus, and neonate, 281: 74-89
 interactions of
 with marijuana, 281: 212-218
 with Δ^9 -tetrahydrocannabinol, 281: 198-211
- Pharmacologic alterations of rat leukocyte chemotaxis, 256: 190-209
- Pharmacologic aspects
 of ascorbic acid, 258: 355-376
 of experimental autoimmune myasthenia gravis, 274: 275-282

- Pharmacologic effects of DMSO on mammalian myocardium, **243**: 110-121
- Pharmacologic factors altering narcotic analgesics and antagonists, **281**: 262-272
- Pharmacologic properties of microtubule protein, **253**: 213-231
- Pharmacologic studies of nucleoside analogs, **255**: 252-260
- Pharmacology
of dimethyl sulfoxide, **243**: 7-19
of new thiopurine nucleoside derivative, **255**: 481-488
- Pharyngeal cancer in textile workers, **271**: 301-307
- Phasic effects
and genital desensitization and mating behavior in male cats, **290**: 299-313
and trigeminal deafferentation and feeding behavior in pigeon, **290**: 331-347
of light in entrainment of circadian rhythms, **290**: 51-59
- Pheidippides, development of marathon from time of, **301**: 820-852
- Phenobarbital actions and interactions, molecular biology of, **281**: 372-383
- Phenotype, constructing potentialities of, **290**: 220-225
- Philosophic considerations on human genetic control, **265**: 118-126
- Phlebotomine sandflies, transovarial transmission of viruses by, **266**: 125-134
- Phlogistic factors, complement-dependent, in rheumatoid synovial fluids, **256**: 169-176
- Phosphatase activities of erythrocyte membranes, effects of Ca^{2+} on, **242**: 317-323
- Phosphate depletion in alcoholic myopathy, **252**: 274-286
- Phosphates, organic, and hemoglobin structure-function relationships in the cat, **421**: 524-537
- Phosphodiesterase, cAMP, and regression of experimental atherosclerosis, **275**: 311-320
- Phosphoenzyme complexes of $\text{Na}^+ + \text{K}^+$ -ATPase in the eel electric organ, **242**: 106-119
- Phosphoenzyme conformations of $\text{Na}^+ + \text{K}^+$ -ATPase, studies of, **242**: 120-132
- Phospholipid surfaces, blood coagulation factors at, **283**: 104-110
- Phospholipid vesicles, incorporation of acetylcholine receptor from *Torpedo californica* in, **264**: 175-182
- Phosphonoacetic acid, antiviral potential of, **284**: 310-320
- Phosphorylated intermediates in reaction of $\text{Na}^+ + \text{K}^+$ -ATPase, kinetics of, **242**: 92-105
- Phosphorylation
of microtubular protein in brain, **253**: 577-597
of neurosecretory granules by cAMP-stimulated protein kinase, **248**: 80-91
of purified tubulin, **253**: 611-629
sodium-dependent, and cytidine triphosphate, **242**: 139-148
- Photoactivation, acridine orange, by argon laser, in tumor destruction, **267**: 191-200
- Photochemical reactions of bilirubin IX- α , **244**: 553-569
- Photochemical studies on organic derivatives of titanium, zirconium, and hafnium, **295**: 103-109
- Photochemistry, laser, of quinones under aerobic conditions, **267**: 201-215
- Photodynamic inactivation of herpes simplex virus, **284**: 171-181
- Photodynamic sensitizers, porphyrins as, **244**: 496-509
- Photoreceptors, excitation of, ionic mechanisms in, **264**: 314-325
- Photosynthesis
and endor experiments on chlorophyll and bacteriochlorophyll, **244**: 239-259
and porphyrin excited state redox reactions, **244**: 214-238
- Photosynthetic bacteria, characterization of phototrap in, **244**: 297-319
- Phylogenesis of anatomic asymmetry in temporal lobes, **299**: 328-354
- Phylogeny
and ontogeny of language, **280**: 396-412
of human vocal tract, **280**: 612-630
- Physical activity
epidemiologic studies of, **301**: 519-549
importance of, for longevity, **301**: 671-702
related to aging, health, and mortality, epidemiologic studies of, **301**: 703-719
related to coronary heart disease and life expectancy, **301**: 561-578
related to ischemic heart disease in Federal Employees, **301**: 627-641
- Physical aging in amorphous glassy polymers, **279**: 78-85
- Physical assessment of chronic cannabis users, **282**: 162-167
- Physical chemistry of planar bilayer membranes, **303**: 243-265
- Physical training, and pulmonary adaptation to exercise, **301**: 243-261
- Physicochemical characterization of human interferons, **284**: 703-710
- Physics
laws of, "neutron" stars within, **302**: 471-481
of accretion and astronomy of x-ray sources, **302**: 229-243
of radio galaxies, **302**: 637-655
plasma, cosmic and laboratory, relations between, **257**: 179-188
- Physiologic aspects
of degenerative joint diseases and hemophilic arthropathy, **240**: 285-290
of positional orientation in decapod crustacea, **299**: 35-42
- Physiologic consequences of biochemical adaptations to endurance exercise, **301**: 440-450
- Physiologic defenses against hyperthermia of exercise, **301**: 98-109

- Physiologic distribution of AAFC, **255**: 213-215
 Physiologic profile of jogging class, **301**: 550-560
 Physiologic responses to ethanol among Tarahumara Indians, **273**: 151-158
 Physique of female distance runner, **301**: 764-776
 Phytohemagglutinin-activated autochthonous lymphocytes for immunotherapy of human neoplasms, **277**: 45-51
 Phytoliths as paleoecological indicators, **288**: 194-205
 Π complexes to solvated metals to metal clusters, **295**: 83-102
 Piaget's theory
 and cross-cultural cognitive development, **285**: 332-337
 scientific impact of, in United States, **291**: 342-349
 Picornavirus infections, chemotherapy for, equestrian as Achilles' heel for, **284**: 638-649
 Piedmont Archaic, patterning in, **288**: 375-391
 Pig brain, $\text{Na}^+ + \text{K}^+$ -ATPase from, purification and properties of, **242**: 24-35
 Pigeon
 affective behavior in, modulated by olfactory system, **290**: 314-330
 trigeminal deafferentation and feeding behavior in, **290**: 331-347
 Pigment granules
 in cutaneous melanocytes in *Rana pipiens*, and cytoplasmic microtubules, **253**: 711-722
 microtubule-dependent movement of, in teleost chromatophores, **253**: 692-701
 Pineal gland
 bovine, neurophysin-like proteins from, **248**: 172-183
 immunoreactive neurophysin-like material in, **248**: 157-171
 Pituitocytes in hypothalamopituitary system of rat, action of colchicine on, **253**: 670-684
 Pituitary-adrenal dysfunction, plasma ACTH radioimmunoassay in, **297**: 205-219
 Pituitary functions in rat, effect of DMSO on, **243**: 325-336
 Pituitary gland
 β -endorphin from, isolation and synthesis of, **297**: 158-166
 opioid peptides in, **297**: 108-114
 posterior, natriuretic peptides from, and neurophysin binding, **248**: 336-344
 rat
 ACTH-containing cells in, **297**: 183-200
 cells of origin of ACTH in, **297**: 201-204
 Pituitary lobe, bovine, neurophysins I and II from, **248**: 172-183
 Placebo for pain, **296**: 175-193
 Placental alkaline phosphatase in cancer cells, **259**: 261-272
 Planar bilayer membranes, physical chemistry of, **303**: 243-265
 Plane wave sources, contrast of dose distribution in phantom heads due to, **247**: 454-472
 Plant antiviral peptide inhibiting poliovirus replication, **284**: 431-440
 Plantation, Good Hope, family and kinship groupings of slaves on, **292**: 242-258
 Plantation slavery in Catharina Sophia, Surinam, **292**: 161-173, 205-225
 Plantation society
 in 18th-century Mexico, the family in, **292**: 226-241
 of St. Kitts, from slavery to unfreedom in, **292**: 379-388
 Plantation systems, development of, **292**: 63-71
 Plant cell culture, mutation in, induction of, **287**: 385-400
 Plant chlorophylls, nature of, and associated proteins, **244**: 281-296
 Plant disease agents
 pathogenic effects of, on vector insects, **266**: 259
 Rickettsia-like, in insects, **266**: 276-292
 Plant diseases lacking genetic resistance of host crops, biological control of, **287**: 45-56
 Planter, formation of identity of, **292**: 35-40
 Plant pathogens and selection pressures, **287**: 207-222
 Plant pathosystems, **287**: 238-242
 Plants, ascorbic acid in, biosynthesis of, **258**: 7-23
 Plant viruses, aphid-transmitted, vector specificity for, **266**: 293-301
 Plaques, atherosclerotic, monoclonal character of, **275**: 96-100
 Plasma
 dense, heated by intense relativistic beams, **251**: 483-493
 high-density, production and confinement of, **251**: 2-29
 human, radioimmunoassay of neurophysins I and II in, **248**: 257-271
 hydrogen interaction of intense microwaves with, **251**: 30-73
 interacting with high-frequency microwaves, **251**: 74-93
 laser-produced, confined by radiofrequency electromagnetic fields, **251**: 381-393
 monochromatic electron cyclotron wave in, excitation of, **251**: 312-321
 radiofrequency-confined, properties of, **251**: 394-406
 radiofrequency confinement of, computer simulation of, **251**: 94-111
 relativistic electron beams in, relaxation of, **251**: 458-471
 wire, high-energy/density-exploded, **251**: 632-648
 Plasma ACTH
 assay of, **297**: 220-241
 in adrenalectomized rats, **297**: 498-508
 circadian periodicity of, **297**: 561-567
 Plasma ACTH radioimmunoassays in diagnosis of pituitary-adrenal dysfunction, **297**: 205-219
 Plasma aldosterone concentration and adrenocorticotropin, **297**: 361-369

- Plasma cells, self-associating IgG rheumatoid factor as major response of, **256**: 88-95
- Plasma confinement
by electromagnetic ring, **251**: 550-567
by megagauss magnetic fields, **251**: 649-667
electrostatic
and electromagnetic, **251**: 1-711
computer simulation of, **251**: 370-380
high-energy electron and ion rings for, **251**: 472-482
in electrostatically stoppered spindle-cusp magnetic field, **251**: 367-369
- Plasmacytomas, different classes of, immunosuppression induced by, **276**: 479-487
- Plasma heating by relativistic electron beams, applications of, to controlled fusion, **251**: 421-440
- Plasma horizons, few examples of, **262**: 133-140
- Plasma inhibitors of human neutrophil chemotaxis, **256**: 210-221
- Plasma lipoproteins
and apolipoproteins, **275**: 169-179
distributions of, in male and female runners, **301**: 748-763
low-density, interacting with arterial wall components, **275**: 153-168
- Plasma membrane studies, and intestinal sugar transport, **264**: 414-427
- Plasma physics, cosmic and laboratory, relations between, **257**: 179-188
- Plasma proteins
absorption of, **283**: 37-49
and conformation of, **283**: 50-64
colchicine blocking secretion of, **253**: 780-788
reacting with formed elements of blood at interfaces, **283**: 65-76
- Plasma protein studies on alcoholics vs. non-alcoholics, **273**: 167-174
- Plasma traps, high-temperature, electrostatic and electromagnetic, **251**: 152-178
- Platelet adhesion, aggregation and release, surface-induced, **283**: 114-127
- Platelet defect in alcoholism, **252**: 328-341
- Platelet deposition on subendothelium, and blood shear rate, **283**: 284-292
- Platelet function
abnormalities of, identification and classification of, **283**: 293-309
after surface injury and shear stress, **283**: 138-158
- Platelet kinetic evaluation of prosthetic material, **283**: 317-329
- Platelet membrane reaction with protein phosphorylation reaction, **283**: 159-174
- Platelet retention test and platelet reactions near surfaces, **283**: 128-137
- Platelets
absorbed layers of, inhomogeneities in, **283**: 256-269
activation and contraction of, contractile proteins in, **282**: 218-236
contractile and relaxing proteins of, **275**: 78-86
incorporation of analog purine nucleosides into, **255**: 412-434
interaction of, with subendothelium, **283**: 293-309
preservation of, DMSO as cryoprotective agent for, **243**: 306-307
role of, in atherogenesis, **275**: 321-329
- Pleistocene
Late, evolution of language in, **280**: 313-325
stages of cultural elaboration in, **280**: 275-288
Pneumocystis carinii, effect of DMSO on, **243**: 278
Podophyllotoxin in inhibition of axoplasmic transport, **253**: 517-527
- Poisoning
experimental chronic, with vinyl chloride, **246**: 159-163
vinyl chloride, clinical manifestations in, **246**: 53-69
- Poisson equation for biomolecules of arbitrary shape, polarizability density, and charge distribution, **303**: 22-37
- Polarimetry, x-ray, of binary sources, **262**: 367-375
- Polarizability density, arbitrary biomolecules of, Poisson equation for, **303**: 22-37
- Polarization
and pulse shape in Her X-1 type objects, **262**: 391-399
of cosmic x-ray sources, **302**: 312-328
of vacuum in static limit for strong magnetic fields, **257**: 95-107
- Policy
national science
and role of academic institutions, **260**: 76-83
search for, **260**: 32-40
NIOSH, for occupational carcinogenesis, **271**: 200-207
on food and nutrition, domestic and international, **300**: 92-95
public, and interaction of public and private institutions, **260**: 41-52
science public
and foundations, **260**: 62-75
role of American Chemical Society in, **260**: 101-110
science and government as partners in, **260**: 53-61
selection of, for world public order, working criteria for, **261**: 58-61
- Poliovirus replication, inhibition of, by plant antiviral peptide, **284**: 431-440
- Political factors in development of American psychology, **291**: 222-232
- Political uses of genetics in United States, **265**: 46-58
- Politics
British radical, impact of slavery on, **292**: 343-355
musical, and symbolic aspects of instruments of Panare Indians, **293**: 206-214

- Polity**
and psychiatry, Soviet Union as case of, **285**: 687-697
galactic, and traditional kingdoms in southeast Asia, **293**: 69-97
- Pollutants** (see also Contaminants)
aquatic (see Aquatic pollutants; see also Micro-pollutants; Water)
carcinogenic, in water, global distribution of, **298**: 80-89
chemical
interacting with virus in crustacean, **298**: 497-504
related to diseases in fish, **298**: 535-546
environmental, assessment and mechanism of, **298**: 141-158
- Polluted habitats of Mississippi, diseases in estuarine fishes of**, **298**: 427-462
- Pollution**
and power and porphyrins, **244**: 685-694
impact of, on Hudson River estuary, **250**: 137-143
problems of, in New York City metropolitan area, **250**: 178-181
- Polyacrylamide gel electrophoresis** (see also Electrophoresis)
to quantify neurophysins in rat with diabetes insipidus, **248**: 345-364
- Poly (adenosine diphosphate ribose) synthase activity of *Xenopus laevis* germinal vesicle stimulated by progesterone**, **286**: 398-407
- Polyadenylic acid in mouse α - and β -globin mRNAs**, **241**: 156-169
- Polyadenylic-polyuridylic acid complexes, mitogenic activity of**, **249**: 370-379
- Poly (A) • poly (U), influence of, on immune response in cancer patients**, **277**: 288-297
- Polyclonal origin of atherosclerosis induced by dietary cholesterol**, **275**: 336-347
- Polyelectrolytes, dielectric dispersion of, due to ion fluctuation**, **303**: 107-120
- Polyethylene glycol in detection of hepatitis-B antigens in antihemophilic factor concentrates**, **240**: 162-164
- Polyethylene targets, deuterated in neutron production**, **251**: 273-292
interacting with relativistic electron beam, collective ion acceleration in, **251**: 238-272
- Polyhedrosis virus, nuclear of alfalfa looper**, **266**: 302-326
of *Autographa californica*, and vertebrate viper cell line, **266**: 327-331
- Polymer-attached homogeneous catalysts, organic synthesis with**, **295**: 15-35
- Polymerases**
avian myeloblastosis virus DNA, inhibited by anthrocycline compounds, **284**: 566-575
cellular nucleic acid, inhibited by antitumor drugs, **284**: 508-524
viral DNA, inhibition of, **255**: 532-543
- Polymerization of purified tubulin**, **253**: 611-629
- Polymer liquids, configurational statistical thermodynamics of**, **279**: 2-14
- Polymers**
amorphous glassy, physical aging in, **279**: 78-85
amorphous state in, structure of, **279**: 223-233
glassy, mechanically enhanced aging of, **279**: 94-99
pressure-induced densification of, hole theory to estimate, **279**: 88-93
relaxation in, molecular origins of, **279**: 104-116
- Polymer surfaces, hydrophobic, interacting with blood**, **283**: 356-371
- Polymer viscosity, remarks on**, **279**: 43-44
- Polymorphonuclear leukocyte elastase and cathepsin G mediating degradation of cartilage proteoglycan**, **256**: 254-262
- Polymorphonuclear leukocytes**
lysosomal enzyme release from, cyclic nucleotides in, **256**: 222-232
subcellular localization of neutral proteases in, **256**: 263-265
- Polynucleotide mimics in viral RNA, antiviral activity of**, **284**: 682-696
- Polynucleotides containing 5-mercapto-substituted pyrimidines**, **255**: 532-543
- Polypeptide ligands interacting with neurophysins**, **248**: 442-450
- Polypeptide mediator inducing synovial cell activation**, **256**: 304-317
- Polypeptides, dielectric absorption of**, **303**: 123-141
- Polypeptide thymic fraction stimulating antibody formation**, **249**: 380-386
- Polysaccharides, substituted, dielectric absorption of**, **303**: 123-141
- Polysomes, hemoglobin chain-synthesizing, immunological purification and characterization of**, **241**: 204-222
- Polyuridylic-polyadenylic acid complexes, mitogenic activity of**, **249**: 370-379
- Polyvinyl chloride** (see also Vinyl chloride)
industrial control of exposure to, **246**: 306-310
Japanese workers exposed to, bone lesions in, **246**: 78-79
particles of, hematogenous dissemination of, **246**: 164-171
production facilities for, communities with, oncogenic and mutagenic risks in, **271**: 49-57
toxicology of, bibliography on, **246**: 322-337
workers exposed to
angiosarcoma of liver in, pathology of, **246**: 268-277
blood screening tests and illness history of, **246**: 80-87
changes in pulmonary function in, **246**: 42-52
clinical management of, **246**: 313-319
further results in, **246**: 18-21
hepatic angiosarcoma in, **246**: 249-250
liver disease in, **246**: 88-94, 278-285

- mortality in, **246**: 225-230
 prevalence of disease in, **246**: 22-41
 unusual splenomegalic liver disease in, **246**: 95-134
- Ponzo illusion among Baganda of Uganda, **285**: 408-417
- Population genetics and hemophilia, implications of mutation and carrier recognition in, **240**: 121-131
- Population movement on Labrador coast, **288**: 481-497
- Populations
 and subsistence as first world priority, **261**: 147-149
 at risk, nutritional needs of, **300**: 419-427
 human, new dimensions in, **261**: 175-182
 impact of, on Hudson River estuary, **250**: 137-143
 interaction of, with food and nutrition, **300**: 5-16
 radio-source, cosmic evolution of, **302**: 656-664
 slave, during slave registration period in the Caribbean, **292**: 145-160
- Porphyria
 comparative aspects of, **244**: 481-495
 hepatocutaneous, clinical biochemistry of, **244**: 441-471
 in man and animals, comparative aspects of, **241**: 347-359
- Porphyrin-binding proteins in serum, **244**: 624-650
- Porphyrin biosynthesis
 drug-induced, **244**: 472-480
 later stages of, **244**: 591-602
- Porphyrin derivatives and biochemistry of human hepatocutaneous porphyrias, **244**: 441-471
- Porphyrin excited state redox reactions and photosynthesis, **244**: 214-238
- Porphyrin isomers, number of biologically possible, **244**: 327-333
- Porphyrin metabolism, red, white and blue eggs as models of, **244**: 570-590
- Porphyryns
 and heme metabolism, isotopic studies of, **241**: 360-379
 and power and pollution, **244**: 685-694
 and related structures, biological role of, **244**: v-694
 and tumor localizers, **244**: 674-684
 as photodynamic sensitizers, **244**: 496-508
 in invertebrates, **244**: 662-673
- Porphyrin synthesis, particular approaches to, **244**: 348-355
- Possum, brush-tailed, laterality in, **299**: 197-212
- Postcoronary marathon runners, **301**: 455-465
- Posthypnotic amnesia, **296**: 284-301
- Posthypnotic persistence of uncanceled hypnotic suggestion, **296**: 264-273
- Post-thymic cells, humoral thymic factors influencing, **249**: 89-105
- Potassium
 changes of, in red cell, related to digoxin and hypokalemia, **242**: 693-703
 effects of, on partial reactions of highly purified $\text{Na}^+ \text{K}^+ \text{ATPase}$, **242**: 235-245
 regulatory effects of, on $\text{Na}^+ + \text{K}^+ \text{ATPase}$, **242**: 220-234
- Potassium deficiency during training in heat, **301**: 175-182
- Potassium fluxes in squid axons, effects of membrane potential on, **242**: 406-434
- Potassium-sodium affinity, effect of ATP on, **242**: 168-164
- Potentials, end-plate, in experimental autoimmune myasthenia gravis, **274**: 300-318
- Pott, Percivall, occupational carcinogenesis since, **271**: 1-4
- Powdery mildew epidemics, population genetics of, **287**: 151-163
- Power
 and porphyrins and pollution, **244**: 685-694
 marital, cross-cultural measurement and definition of, **285**: 646-652
- Power absorption by human phantoms immersed in radio-frequency fields, **247**: 494-498
- Power motivation training as therapy for alcoholism, **273**: 525-532
- Power plants
 and Hudson River estuary, **250**: 169-177
 CTR general relativistic, new approaches to, **251**: 623-631
- Poxvirus antigen, detected by immunofluorescence staining, **254**: 394
- Poxviruses differentiated by IF staining, **254**: 394
- Prairies, Canadian southwest, indications of Wisconsin man in, **288**: 119-136
- Precursor cells, lymphocyte differentiation from, **249**: 531-540
- Precursor lesions as indicators of occupational cancer risk, **271**: 444-447
- Predictive value of carcinogenesis bioassays, **271**: 431-443
- Prednisone
 alternate-day dosage of, in myasthenia gravis, **274**: 596-607
 long-term, followed by thymectomy in myasthenia gravis, **274**: 608-622
- Pregnancy
 alcohol consumption during, as reported to obstetrician vs. interviewer, **273**: 588-592
 and ascorbic acid, **258**: 465-482
 effects of pharmacologic agents on, **281**: 74-89
 maintenance of, and progesterone, **286**: 384-397
- Prenatal nutrition, **300**: 188-196
- Prevention of occupational cancer in mines and mills, role of government in, **271**: 216-219
- Primates
 communication in, and human language, **280**: 539-541

- narcotic-narcotic antagonist interaction in, **281**: 331-335
- nonhuman
- morphologic cerebral asymmetries of, **280**: 349-366
 - use of formants in grunts of, **280**: 673-693
 - ontogeny of intelligence of, **280**: 173-211
 - role of, in evolution of human communication, **280**: 467-480
 - structure of myoglobin in, **241**: 380-391
 - tonic retinal influences in, **290**: 139-151
- Primidone in management of sedative-withdrawal seizures, **273**: 378-380
- Priorities, setting of, in use of genetic technologies, **265**: 22-45
- Private institutions interacting with public ones in policymaking, **260**: 41-52
- Probe
- fiberoptic liquid crystal, for absorbed radio-frequency power temperature measurement, **247**: 527-531
 - miniature broad-band electric field, **247**: 481-493
 - pyroelectric, for measuring microwave power density, **247**: 510-526
- Problem drinker, identification and treatment of, by abstinence vs. responsible drinking, **273**: 488-491
- Problem-solving approach to first-language acquisition, **280**: 257-261
- Processes
- holistic vs. analytic, and cerebral asymmetries, **263**: 251-262
 - membrane, and "sandwich" complexation in cyclopeptides, **264**: 221-243
- Procoagulant activity of leukocytes, **283**: 208-217
- Production facilities, polyvinyl chloride, communities with, oncogenic and mutagenic risks in, **271**: 49-57
- Production in visually based language, **263**: 225-235
- Professional help, use of, by members of Alcoholics Anonymous, **273**: 436-441
- Progesterone
- "acceptors" for, in avian oviduct, **286**: 43-63
 - and glucocorticoid interaction with receptor in breast cancer cells, **286**: 101-115
 - and induction of oocytic maturation and differentiation, **286**: 408-420
 - and maintenance of pregnancy, **286**: 384-397
 - biochemical actions of, **286**: 1-449
 - effects of
 - on adrenergic mechanisms of genital tract, **286**: 287-303
 - on ovalbumin synthesis, in withdrawn oviduct, **286**: 116-124
 - in breast cancer, **286**: 90-100
 - in local treatment of endometrium, **286**: 226-232
 - in male reproductive system, **286**: 313-320
 - in replenishment of estrogen receptor, **286**: 161-179
 - in sexual behavior and gonadotropin release, **286**: 331-354
 - research on, **286**: 446-449
 - stimulating poly (adenosine diphosphate ribose) synthase activity in *Xenopus laevis* germinal vesicle, **286**: 398-407
- Progesterone analogs, glucocorticoid activity of, **286**: 355-368
- Progesterone binding
- and metabolism, in fetal membranes, **286**: 304-312
 - to serum proteins, **286**: 10-28
- Progesterone-dependent mRNA, **286**: 125-134
- Progesterone induction of mRNA and protein synthesis in rabbit uterus, **286**: 260-272
- Progesterone receptors
- binding of ATP to, **286**: 29-42
 - formation of, estrogen action in, **286**: 210-225
 - from chick oviduct, **286**: 64-80
 - hormonal control of, **286**: 199-209
 - in experimental estrogen-induced renal tumor, **286**: 369-383
 - in female genital tract, **286**: 180-189
 - in transcription, **286**: 147-160
 - oviduct, mero-receptor formation from, **286**: 81-86
- Progestins
- androgenic, synandrogenic and antiandrogenic actions of, **286**: 321-330
 - biochemical actions of, **286**: 1-449
 - effect of, on glucose and lipid metabolism, **286**: 434-445
 - in male reproductive system, **286**: 313-320
 - research into, genesis of, **286**: 1-9
- Prognosis in cancer, **276**: 386-406
- Programming activity of brain, embryonic determination of, **299**: 306-308
- Prokaryotes, helical-wall-free, in insects, **266**: 260-275
- Prolyl hydroxylase in fibroblasts, activated by ascorbic acid, **258**: 278-287
- Properdin system, activation of, in rheumatoid arthritis, **256**: 96-104
- Prospective surveillance of asbestos insulation workers, lung cancer and mesothelioma in, **271**: 448-456
- Prostaglandins
- and syngeneic tumor cells as escape mechanism from immune surveillance, **276**: 455-465
 - in rheumatic diseases, **256**: 318-329
- Prosthetic devices, carbon in, **283**: 383-395
- Prosthetic material, platelet kinetic evaluation of, **283**: 317-329
- Prosthetic surfaces, *in vivo* evaluation of, **283**: 536-541
- Proteases
- elastolytic, synthetic site-directed inhibitors of, **256**: 420-425

- neutral, subcellular localization of, in polymorphonuclear leukocytes, **256**: 263-265
- neutrophil lysosomal, degrading joint connective tissue, **256**: 402-408
- Protein antigens, smooth muscle contractile, in liver and epithelial cells, **254**: 489-504
- Proteinases, macrophage neutral, and chronic inflammation, **278**: 176-189
- Protein composition of endometrium during stages of menstrual cycle, **286**: 233-248
- Protein conformational changes, and effect of lipid phase transitions on $\text{Na}^+ \text{K}^+$ -ATPase, **242**: 69-76
- Protein deficits in developing countries, **300**: 176-187
- Protein film on chromium, ellipsometric study of, **283**: 77-85
- Protein intake and metabolism of L-ASCORBIC ACID, **258**: 382-400
- Protein kinase
- cAMP-dependent, and microtubule protein, **253**: 598-610
 - cAMP-independent, crystallization of, **283**: 159-174
 - cAMP-stimulated, in phosphorylation of neurosecretory granules, **248**: 80-91
 - of purified tubulin, **253**: 611-629
 - phosphorylation reaction, platelet, with platelet membrane and cytoplasmic enzymes, **283**: 159-174
- Protein-ligand binding reaction, kinetics of, **303**: 47-56
- Protein-lipid interactions
- in biomembranes, **264**: 142-160
 - in model systems and membranes, **264**: 124-141
- Protein-lipoprotein interactions in man, **275**: 145-152
- Proteins
- animal, role of, **300**: 148-150
 - associated with plant chlorophylls, **244**: 281-296
 - binding, and membrane transport, **264**: 358-372
 - blood, inhomogeneities in absorbed layers of, **283**: 256-269
 - contractile
 - and relaxing, of smooth muscle and platelets, **275**: 78-86
 - in platelet activation and contraction, **283**: 218-236
 - copper, related to ascorbate oxidase, **258**: 209-220
 - high-molecular-weight, purification of, from porcine brain, **253**: 107-132
 - hydration of, and intermolecular potential for water, **303**: 2-9
 - identified with sulfhydryl reagents, **242**: 246-254
 - in fluid of reproductive tract, hormonal control of, **286**: 273-286
 - Lac carrier, binding of β -galactosides to, **264**: 350-357
 - microtubule (*see also* Microtubules; Microtubule proteins; Tubulin)
 - in brain, phosphorylation of, **253**: 577-597
 - pharmacologic properties of, **253**: 213-231
 - neurohypophyseal (*see* Neurohypophyseal proteins)
 - neurophysin (*see* Neurophysin proteins)
 - neurophysin-like, from bovine pineal gland, **248**: 172-183
 - plasma
 - adsorption of, **283**: 37-49
 - and conformation of, **283**: 50-64
 - colchicine blocking secretion of, **253**: 780-788
 - reacting with formed elements of blood at interfaces, **283**: 65-76
 - porphyrin-binding, in serum, **244**: 624-650
 - serum
 - and isolation of lymphocyte-stimulating hormone, **249**: 166-176
 - progesterone binding to, **286**: 10-28
 - sources of, research into, **300**: 129-147
 - subunit, effects of DMSO on, **243**: 38-53
- Protein synthesis
- by membrane-bound reticulocyte ribosomes, **241**: 191-203
 - in hepatocyte, **252**: 51-62
 - in rabbit uterus, and progesterone, **286**: 260-272
- Proteoglycan, articular cartilage, degradation of, **256**: 254-262
- Proteolytic modification of bovine Factor VIII, **240**: 43-61
- Protolanguages, study of, aiding in glossogenic research, **280**: 104-116
- Protolinguistics, **280**: 104-116
- Pseudotumor, hemophilic, characterization of, **240**: 311-315
- Psychiatric disease, ACTH and cortisol secretion in, **297**: 621-627
- Psychiatric disturbance, role of cannabis in, **282**: 64-71
- Psychiatric impairment and alcoholism, **273**: 467-480
- Psychiatric issues and lateral specialization, **299**: 397-411
- Psychiatric observations of marijuana users, **282**: 72-84
- Psychiatrist looks at scientists looking at science, **265**: 112-117
- Psychiatry and polity, Soviet Union as case of, **285**: 687-697
- Psychoactive drugs
- interaction of, with narcotic agonists and antagonists, **281**: 321-330
 - in treatment of alcoholics, **252**: 385-395
- Psycholinguist, 18th-century American, William Thornton, **291**: 264-276
- Psycholinguistics

- some notes from Merlin's diary on, **288**: 181-188
- use and abuse of, **288**: 167-173
- Radiofrequency-confined plasmas, properties of, **251**: 394-406
- Radiofrequency confinement of plasma, computer simulation of, **251**: 94-111
- Radiofrequency electromagnetic fields, confinement of laser-produced plasma by, **251**: 381-393
- Radiofrequency energy, polarization and frequency of, and whole-animal absorption, **247**: 532-538
- Radiofrequency exposure, effects of, on trace metal content of blood plasma and liver cells, **247**: 282-291
- Radiofrequency fields
- 100-MHz, Raman spectroscopy of molecular species exposed to, **247**: 323-326
- phantoms absorbed in, measurements of power absorption by, **247**: 494-498
- Radio galaxies
- and quasars, **262**: 449-466
- interaction of, with intergalactic medium, **302**: 669-680
- physics of, **302**: 637-655
- Radiographs, laser scanning of, **267**: 469-476
- Radioimmunoassay
- in study of liver cirrhosis and hepatoma, **259**: 196-210
- of human neurohypophysins to understand neurophysal function, **248**: 281-303
- of neurophysin proteins to demonstrate independent secretion, **248**: 246-256
- of neurophysins I and II in human plasma, **248**: 257-271
- of serum ferritin in patients with cancer, **259**: 450-452
- plasma ACTH, in diagnosis of pituitary-adrenal dysfunction, **297**: 205-219
- Radioimmunodiffusion tests, high-sensitivity, for tumor-associated antigens, **276**: 75-90
- Radioisotope footpad, tumors studies by, and paralysis of antitumor cellular immune response, **276**: 254-259
- Radioisotopes produced by collective effect acceleration, **251**: 217-233
- Radiolabeled DMSO sprayed on foliage, accumulation of sulfur in, **243**: 237
- Radionuclides, antibodies as carriers of, in cancer, **277**: 671-689

- Radioprotective properties of DMSO in cellular systems, **243**: 246-256
- Radio-source populations, cosmic evolution of, **302**: 656-664
- Radio wavelengths, small-scale structure of quasars and galactic nuclei at, **262**: 428-435
- Rainbow trout, neoplasms in, and environment, **298**: 389-408
- Raman spectroscopy of molecular species during exposure to 100-MHz radio-frequency fields, **247**: 323-326
- Rat flea, oriental, murine typhus rickettsiae in, **266**: 35-60
- Rats, hemoglobin structure in, **241**: 434-435
- Rauscher leukemia virus, inhibition of, by anthro-cycline compounds, **284**: 566-575
- Ray, Isaac and mental hygiene in America, **291**: 83-93
- Reaction, platelet, near surfaces, and platelet retention test, **283**: 128-137
- Reaction center chlorophylls, **244**: 260-280
- Reasoning, development of, in children, **280**: 120-126
- Recent primitive brain forms, **299**: 87-96
- Receptors (*see also specific receptor*)
 acetylcholine
 and myasthenia gravis, **274**: 116-129
 antibodies to, in rabbits, **274**: 354-376
 at motor end plates of muscle, **274**: 85-107
 binding alpha-bungarotoxin after exposure to myasthenic serum, **274**: 244-253
 from *Electrophorus* and *Torpedo*, **274**: 108-115
 from *Torpedo californica*, **264**: 175-182
 molecular and functional properties of, **264**: 183-202
 serum antibodies to, in myasthenia gravis, **274**: 235-243
 ACTH, **297**: 295-313
 cholinergic, desensitization of, **274**: 130-139
 cytophilic antibody, antibody-induced inhibition of, **276**: 229-242
 disorder of, myasthenia gravis as, **274**: 226-234
 drug, microtubules as, **253**: 213-231
 estradiol, in endometrium, **286**: 190-198
 estrogen, replenished by progesterone, **286**: 161-179
 estrogen and progesterone, in female genital tract, **286**: 180-189
 in breast cancer, **286**: 87-89
 in breast cancer cells, progesterone and glucocorticoid interaction with, **286**: 101-115
 monocyte, for immunoproteins in patients with sarcoidosis, **278**: 190-200
 muscle, in cardiovascular response to exercise, **301**: 232-242
 progesterone
 binding of ATP to, **286**: 29-42
 estrogen action in formation of, **286**: 210-225
 from chick oviduct, **286**: 64-80
 hormonal control of, **286**: 199-209
 in experimental estrogen-induced renal tumor, **286**: 369-383
 in transcription, **286**: 147-160
 mero-receptor formation from oviduct, **286**: 81-86
 viral, and role in tissue and host specificity, **266**: 255-258
 Recognition factors in treatment of neoplastic disease, **277**: 20-44
 Recombinant DNA molecule technology, issues posed by, **265**: 59-81
 Reconstruction of biliary duct, reappraisal of, **252**: 145-158
 Reconstructive surgery in hemophiliacs, **240**: 291-294, 295-310
 Recording
 of information, laser beam in, **267**: 384-410
 of nonphotographic image, **267**: 460-468
 single-muscle-fiber, in myasthenia gravis patients with jitter phenomenon, **274**: 189-202
 Records
 fossil, language, and neural organization, **280**: 367-369
 hospital admission, to identify occupational groups at risk of cancer, **271**: 384-387
 Recovery phenomenon after laser excitation in immunofluorescence, **254**: 172-174
 Red blood cells, (*see also Erythrocytes*)
 diphosphoglycerate-adenosine triphosphate levels in, **241**: 513-523
 environment of function of, **244**: 603-623
 glycolytic control in, *in vivo*, and DPG-ATP levels, **241**: 513-523
 goat, kinetics of Na⁺ + K⁺ pump in, **242**: 343-356
 hemoglobin function of, 2,3-diphosphoglycerate mediating, **241**: 498-512
 sheep, early cellular events in response of mice to, **249**: 362-369
 sodium and potassium changes in, and treatment with digoxin, **242**: 693-703
 sodium-potassium pump in, and membrane ATP, **242**: 459-460
 sodium pump in, and mechanism of active transport, **242**: 445-458
 sugar-transport sites in, functional organization of, **264**: 398-413
 uncoupled efflux of sodium ions from, and Na-dependent ATPase activity, **242**: 461-470
 Red Cross program for hemophilia, **240**: 208-212
 Rediae of *Himastha quissetensis* infecting *Nassarius obsoletus*, **266**: 497-512
 Redox and ATP in acid secretion, **264**: 456-475
 Red shifts
 and quasars, **262**: 422-427
 particle horizons and time-dependence of, in Friedmann universe, **262**: 470-471
 Referent communication in schizophrenia, and

- perseverative-chaining model, **270**: 124-140
- Reflective optic systems for lasers, **251**: 346-357
- Regeneration of forelimb of newt, effect of DMSO on, **243**: 257-268
- Region, Wernicke's, location of, **280**: 834-843
- Regional distribution among Greek students, **268**: 385-394
- Regional enteritis, and ascorbic acid deficiency, **258**: 483-490
- Regional intergration and modern Greece, **268**: 10-15
- Regionalism and local community in Greece, **268**: 18-27
- Regional variations in the family in Athens, **268**: 410-418
- Rehabilitation unit, alcohol, staff attitude change after development of, **273**: 427-432
- Reiter sonicate in absorbed fluorescent treponemal antibody test, **254**: 395-399
- Rejection, autochthonous tumor, cell-mediated immunity in, **276**: 188-206
- Relativistic astrophysics, Seventh Texas Symposium on, **262**: 1-500
- Relativistic electron beams
high-current, focused up to high densities, **251**: 668-678
in excitation of gas lasers, **251**: 590-608
in plasma, relaxation of, **251**: 458-471
intense
heating of dense plasma by, **251**: 483-493
microwave production with, **251**: 441-457
plasma heating by, and controlled fusion, **251**: 421-440
production and focusing of, and application to controlled fusion, **251**: 609-622
- Relativistic non-neutral *E*-layers, equilibrium and synchrotron emission properties of, **251**: 407-420
- Relativistic power plants, controlled thermonuclear research, new approaches to, **251**: 623-631
- Relaxation
dielectric, of biomolecules, real-time measurement of, **303**: 47-56
in polymers, molecular origin of, **279**: 104-116
of relativistic electron beams in plasma, **251**: 458-471
secondary, and glass transition in molecular liquids and crystals, **279**: 117-140
structural, in vitreous materials, **279**: 15-35
- Release
after surface injury and shear stress, **283**: 138-158
platelet, surface-induced, **283**: 114-127
- Religious forms and secular functions in prehistoric Peruvian architecture, **293**: 229-245
- Religious groups, individual modernity in, **285**: 538-564
- Renaissance, language-origins theory since, **280**: 4-13
- Renal carcinoma, leukocyte migration in patients with, **276**: 260-271
- Renal function
during prolonged exercise, **301**: 151-159
role of $\text{Na}^+ + \text{K}^+$ -ATPase in, **242**: 519-526
- Renal $\text{Na}^+ + \text{K}^+$ -ATPase, inhibition of, and natriuresis, **242**: 501-518
- Renal tumor, experimental estrogen-induced, progesterone receptor in, **286**: 369-383
- Repair, DNA, to detect mutagens and carcinogens, **269**: 37-42
- Replication cycles of animal viruses, microtubules in, **253**: 440-444
- Reproduction, sensory control of, in female rodents, **290**: 72-97
- Reproductive system, male, progesterone and progestins in, **286**: 313-320
- Reproductive tract, hormonal control of fluid proteins within, **286**: 273-286
- Research
alcoholism
at Center of Alcohol Studies, **273**: 81-86
at Drug Addiction Research Foundation of Ontario, **273**: 87-97
at New York State Psychiatric Institute in 20th century, **291**: 104-135
at Oklahoma Center for Alcohol and Drug-related Studies, research plans of, **273**: 103-109
at the Research Institute on Alcoholism, **273**: 98-102
at University of North Carolina at Chapel Hill Center for Alcohol Studies, **273**: 110-114
behavioral science, on alcohol abuse and alcoholism, **273**: 555-557
biomaterials, future directions in, **283**: 332-355
biomedical, aquatic animals in, **245**: 38-56
cancer, immunofluorescence in, **254**: 523-527
cross-cultural (see also Cross-cultural research)
acceptance and rejection of, **285**: 185-202
cognitive, developmental theories applied to, **285**: 366-373
relation of, to profession, **285**: 217-218
special aspects of, **285**: 355-362
direction of, in biologic electromagnetic radiation, **247**: 539-545
future anthropological, on Cyprus, **268**: 355-362
glossogonic, study of protolanguages as aid in, **280**: 104-116
in Greece, future strategies for, **268**: 444-465
into hypnosis, **296**: 14-33
and evaluation of coercive power, **296**: 86-89
and limitations of experimental method, **269**: 60-68
into slavery
archival sources for, in Netherlands, **292**: 501-509
tools and resources for, **292**: 564
laser
at Battelle, **267**: 126-134

- at Los Alamos Scientific Laboratory, safety considerations of, **267**: 135-151
- membrane noise, problems in, **303**: 389-398
- microtubules, perspective on, **253**: 7-13
- molecular genetic, regulation of, **265**: 178-192
- on progesterone, **286**: 446-449
- on progestins, **286**: 1-9
- on sources of protein for man, **300**: 129-147
- recent, linked with new theory of groupings and conservations based on commutability, **291**: 350-371
- x-ray laser, guidelines for, at Naval Research Laboratory, **267**: 3-15

distance
overuse syndrome in, **301**: 877-880
work-heat tolerance in, **301**: 139-150
elite distance
biomechanical comparison of, **301**: 328-345
blood chemistry and lipid profiles in, **301**: 346-360
body composition of, **301**: 361-370
cardiorespiratory aspects of working capacity of, **301**: 310-322
medical and electrocardiographic examination of, **301**: 283-296
muscle fiber composition and enzyme activities in, **301**: 323-327
noninvasive analysis of cardiac function in, **301**: 297-309
psychological characterization of, **301**: 382-403
pulmonary function of, **301**: 371-381
endurance, skeletal muscles in, fiber types and metabolic potentials of, **301**: 3-29
female distance
aerobic responses of, to exercise, **301**: 726-733
body physique and compositions of, **301**: 764-776
self-perception of, **301**: 808-815
tolerance to heat of, **301**: 777-792
long distance, influence of environment on foot of, **301**: 881-887
male and female
biomechanical comparison of, **301**: 793-807
plasma lipoprotein levels in, **301**: 748-763
marathon
cardiac function in, assessed by noninvasive techniques, **301**: 900-917
coronary heart disease in, **301**: 593-619
deaths from coronary heart disease anticipated in, **301**: 620-626
heat stroke and hyperthermia in, **301**: 128-138
myoglobinuria in, and carbohydrate and lipid metabolism, **301**: 942-948
postcoronary, **301**: 455-465
psychological test of, using Myers-Briggs type indicator and demographic data, **301**: 1010-1019
running less than three hours, psychological study of, **301**: 1020-1028
- Running
and psychology and culture, **301**: 970-1001
97 distance, and depression after myocardial infarction, **301**: 1029-1038
injuries from, biomechanical approach to, **301**: 888-899
long distance, as meditation, **301**: 1002-1009
marathon
and immunity to atherosclerosis, **301**: 561-578
in rehabilitation of coronary patients, **301**: 484-494
metabolic adjustments to, in coronary patients, **301**: 466-483
- Rural alcohol abuse, **273**: 659-664
- Rural populations, modernization-relevant values in, **285**: 582-592
- Rush, Benjamin, and mental health, **291**: 94-103
- Rust, coffee, introduced into Brazil, **287**: 57-71
- Saccade fatigue and response to edrophonium for diagnosis of myasthenia gravis, **274**: 631-641
- Safety aspects of atmospheric transmission of lasers, **267**: 366-372
- Safety considerations
in laser research program at Los Alamos Scientific Laboratory, **267**: 135-151
with high dosages of ascorbic acid, **258**: 523-528
- St. Domingue, marronage and revolution in, **292**: 420-438
- St. Kitts, plantation society in, **292**: 379-388
- St. Lawrence lowland, Quaternary deposits in, **288**: 498-507
- Salamanders, tiger, tissue lesions of, and sewage effluents, **298**: 270-279
- Salicylic acid, effects of DMSO on blood concentrations of, **243**: 311-316
166-176
- Salmonellae detected by immunofluorescence in foodstuffs, feces, and water, **254**: 350-368
- Salmonella/microsome test in detection of mutagenic metabolites of carcinogens in urine, **269**: 21-25
- Sandflies, phlebotomine, transovarial transmission of viruses by, **266**: 125-134
- "Sandwich" complexation in cyclopeptides, and membrane processes, **264**: 221-243
- Sapir-Whorf hypothesis in historical perspective, **291**: 306-316

- Sarcoid granuloma**
cells of, morphology and distribution of, **278:** 147-160
mononuclear cells in, immunologic identification of, **278:** 136-146
- Sarcoid-like granulomatosis, pulmonary, lung water and capillary permeability in, 278:** 308-320
- Sarcoid lymphocytes, B- and T-cell quantitation in, 278:** 69-79
- Sarcoidosis**
and epithelioid and giant cells, **278:** 3-6
and Gougerot-Sjögren syndrome, **278:** 401-405
and other granulomatous disorders, seventh international conference on, **278:** 1-751
anergy of, compared with experimentally induced anergy in guinea pigs, **278:** 29-35
angiotensin-converting enzyme in, serum elevations of, **278:** 488-497, 498-513
antibodies to T cell in, **278:** 88-100
B- and T-cell subpopulations in, **278:** 80-87
cardiac, clinical course of, **278:** 470-474
cellular immunity in, T-rossette-forming cells related to, **278:** 108-116
centenary of, **278:** 736-741
chronic, prognosis of, **278:** 732-735
diagnosis of
problems in, **278:** 528-531
using fine-needle aspiration biopsy of spleen, **278:** 517-521
differentiation of, from beryllium disease, **278:** 654-664
early, circulating immune complexes in, **278:** 212-219
familial
possible genetic influence in, **278:** 386-400
possible mechanism of inheritance in, **278:** 371-376
gallium scanning in, **278:** 514-516
immunologic reactivity in, regulation of, **278:** 117-124
immunologic studies in, **278:** 47-51
using Kveim tests, **278:** 711-716
immunoproteins in, monocyte receptor activity for, **278:** 190-200
in Asia and Africa
analytic epidemiology of, **278:** 355-367
descriptive epidemiology of, **278:** 347-354
in Europe, **278:** 335-346
injection of dialyzable transfer factor in, acquisition of tuberculin sensitivity after, **278:** 129-135
intrathoracic
flexible-bronchoscope biopsy of lung and bronchial wall in, **278:** 522-527
in children and adults, **278:** 532-538
myocardial fatal, clinicopathologic studies of, **278:** 455-469
ocular, intraocular findings in, **278:** 445-454
of bone, **278:** 475-487
of upper respiratory tract related to lupus pernio, **278:** 416-426
ornithosis complement fixation test in, **278:** 225-232
patterns of, in three population groups in New York City, **278:** 371-376
peripheral blood of patient with lymphocytes in, **278:** 101-107
T- and K-cell activity in, **278:** 52-68
pulmonary
long-term corticosteroid treatment of, **278:** 717-721
membrane diffusing capacity and pulmonary capillary blood volume in, **278:** 284-291
pulmonary function in, **278:** 292-300
follow-up studies on, **278:** 301-307
racial differences in, **278:** 368-370
reactivities of leukocytes from patients with, to differential Kveim preparations, **278:** 700-710
report on, of Subcommittee of Classification and Definition, **278:** 742
sera in, search for specific antibody in, **278:** 220-224
skin window in, macrophage reactivity in, **278:** 201-203
structure and function in, **278:** 265-283
thoracic, selective arteriography of celiac artery in, **278:** 433-438
tissue homogenates from patients with, in induction of granulomas, **278:** 560-564
treatment of, report by Subcommittee on Therapy of, **278:** 743-751
viruses in, search for, **278:** 260-264
with liver involvement, lipoprotein-X test in patients with, **278:** 439-444
world-wide review of, **278:** 321-334
Sarcoid-specific granulomas, transmissibility of, 278: 249-259
Sarcoid tissue, transmissible agent from, 278: 233-248
Sarcoma
osteogenic
transfer factor vs. combination chemotherapy in, **277:** 558-574
tumor-specific transfer factor in, **277:** 621-627
Yoshida, and α -fetoprotein synthesis, **259:** 74-79
Sarcoma system, methylcholanthrene, augmentation of tumor immunity in, 277: 533-540
Sarcoma virus, Rous, inhibited by copper-binding ligands 284: 525-532
Sarcoplasmic reticulum
ATPase in, tryptic fragments of, **264:** 326-334
calcium transport in, **264:** 335-349
Scanning
gallium, in sarcoidosis, **278:** 514-516
information, laser beam in, **267:** 384-410
laser, of radiographs, **267:** 469-476
Scanning electron microscopy (SEM) to examine lymphocyte membranes of athymic mice, **249:** 154-165
Scans, gallium, in myasthenia gravis, **274:** 536-554

Scattering

Compton, in strong external electromagnetic fields, **257**: 72-76

problems in, gravitational energy loss in, **302**: 557-564

ultrasonic, in animal tissue, optical evaluation of, **267**: 312-323

Scheelite structure, oxide catalysts with, olefin oxidation over, **272**: 22-44

Schistosoma mansoni

effects of, on *Biomphalaria glabrata*, **266**: 380-393

secondary daughter sporocysts of, **266**: 426-436

Schistosome larvae and their molluscan hosts, **266**: 480-496

Schistosome sporocysts, oaubain-inhibited, potassium-dependent ATPase activity in, **266**: 465-479

Schistosomiasis mansoni, cell-mediated immune etiology of, **278**: 36-46

Schizophrenia, referent communication in, and perseverative-chaining model, **270**: 124-140

School

boarding, for comprehensive care of hemophiliacs, **240**: 226-237

food service program in, prospects for in U.S., **300**: 411-418

hemophiliacs in **240**: 238-245

Science

advance of, novel pressures on, **265**: 193-206

as partner with government in setting science public policy, **260**: 53-61

basic, and practical management of hemophilia, **240**: 74-78

cost of, **265**: 102-111

how not to do it, **262**: 496-500

incorporation of, **260**: 7-31

policy for (*see also* Policy, science)

and foundations, **260**: 62-75

national, search for, **260**: 32-40

role of American Chemical Society in, **260**: 101-110

science and government as partners in, **260**: 53-61

regional academies of, renaissance of, **260**: 114-121

scientists looking at, psychiatric view of, **265**: 112-117

Scientific information, society's need for, **261**: 126-136

Scientific optimism and societal concerns, and psychology of scientists, **265**: 82-101

Scientific responsibility, ethical, in face of uncertain consequences, **265**: 1-12

Scientists

in courtroom and public interest law, **260**: 111-113

looking at science, psychiatric view of, **265**: 112-117

psychology of, and societal concerns, **265**: 82-101

Sclerogenesis, arterial wall cells in, **275**: 286-301

Scots, role of, in economy and society of West Indies, **292**: 94-106

Sco X-1 and Cyg X-2, **262**: 400-403

Scrapie, acceleration of, in mice, by interferon inducers, **284**: 676-681

Screening (*see also* Detection; Tests; Testing)

for cataracts among radar technicians, **247**: 135-141

mutagenesis, *Drosophila* for, **269**: 34-36

Scrotal cancer and epithelioma, occupational aspects of, **271**: 138-142

Sea, Champlain

and Quaternary deposits in St. Lawrence lowland, **288**: 498-507

marine mammals in, **288**: 508-537

Sea urchin, mitotic apparatus of, isolated with glycerol-dimethyl sulfoxide, **253**: 378-382

Secretion

acid, ATP and redox in, **264**: 456-475

ACTH, regulation of, **297**: 591-593

and microtubules, cAMP and calcium, **253**: 771-779

cortisol, in psychiatric disease, **297**: 621-627

maternal nutritive, in transmission of microorganisms in insects, **266**: 162-165

of plasma protein, colchicine in blocking of, **253**: 780-788

pancreatic, and alcoholism, **252**: 187-199

Secretory effects of alcohol on pancreas, **252**: 183-186

Secretory granules, hexosamine, calcium, and neurophysin in, **248**: 202-217

Sedatives

in therapy of alcoholism, **252**: 379-384

long-term, in treatment of alcoholics, **252**: 396-399

Sedative-withdrawal seizures, primidone and diphenylhydantoin in, **273**: 378-380

Sediment in New York Harbor, **250**: 112-128

Seizures, development of, after electrical stimulation of central olfactory structures, **290**: 200-216

Selection pressures and plant pathogens, **287**: 207-222

Selenonucleosides related to pyrrolo [2,3-d]pyrimidine nucleoside antibiotics, **255**: 91-103

Self

and developmental psychology, **291**: 149-167

and Lotze and American psychology, **291**: 168-177

psychology of, 19th- and 20th-century trends in, **291**: 178-180

Self-care concept in hemophilia, and psychological problems, **240**: 221-225

Self-conscious mind, development of, and evolution of brain, **299**: 161-179

Self-stimulation, intracranial, and tonic properties of orosensation, **290**: 158-179

- Semantic development, early, individual differences in, **263**: 132-139
- Semantics
and syntax of children's language, **280**: 227-237
frame, and nature of language, **280**: 20-32
- Semantic subspaces, affective and denotative, differentiation of, **285**: 476-500
- Sense-organ-dependent tonus mechanisms, hypothesis of, **290**: 3-17
- Sensitive dyes, potential, optical changes of, **303**: 214-216
- Sensitizers, photodynamic, porphyrins as, **244**: 496-508
- Sensorium and modulation of cerebral states, **290**: 396-420
- Sensory affect and motivation, **290**: 18-34
- Sensory control of reproduction in female rodents, **290**: 72-97
- Sensory discriminability and central nervous correlates, **299**: 244-254
- Sensory input, tonic, in insects, **290**: 114-123
- Separation, laser isotope, **267**: 61-70, 81-92
at Lawrence Livermore Laboratory, **267**: 71-80
- Sephacryl beads, antigens bound to, microfluorometric assays with, **254**: 137-151
- Series, palmierite $Ba_{3-x}Pb_xV_2O_8$, structural inorganic chemistry of, **272**: 45-60
- Serodiagnostics of *Trichinella spiralis* infection, immunofluorescence and immunoenzyme methods in, **254**: 296-303
- Seroepidemiology of malaria, applications of immunofluorescence to, **254**: 326-330
- Serogroup, rabies, Mokola, Obodhiang, and Kotonkan viruses of, **266**: 241-250
- Serotherapy of avian reticuloendotheliosis virus-induced tumors, **277**: 634-646
- Serotonin metabolism, and ethanol and body temperature, **273**: 247-255
- Serotonin regulation of ACTH secretion, **297**: 527-535
- Serotyping for MLC, **254**: 289-295
- Serres basin, development and migration in, **268**: 59-70
- Serum
anticollagen, defined IF studies of, **254**: 614-617
bovine, immunosuppressive α globulin from, **249**: 236-247
from sarcoidosis patients, search for specific antibody in, **278**: 220-224
myasthenic, binding of acetylcholine receptors to alpha bungarotoxin after exposure to, **274**: 244-253
porphyrin-binding proteins in, **244**: 624-650
- Serum acetylcholine-receptor antibodies in myasthenia gravis, **274**: 235-243
- Serum albumin, bovine, irradiation of, with crossed-beam exposure-detection system, **247**: 312-322
- Serum alpha-1-antitrypsin and immunoglobulin levels in lepromatous leprosy, **278**: 125-128
- Serum angiotensin-converting enzyme elevations in sarcoidosis, **278**: 488-497, 498-513
- Serum factors, myasthenic, and innervated and denervated muscles, **274**: 475-492
- Serum levels of α -fetoprotein, evolution of, in man and rats, **259**: 17-28
- Serum lysozyme in experimentally induced granulomatous inflammation, **278**: 592-598
- Serum protective factor, antiviral humoral substance as, **284**: 418-430
- Serum proteins
in cancer patients and isolation of lymphocyte-stimulating hormone, **249**: 144-174
progesterone binding to, **386**: 10-28
- Serum sickness, chronic, in rabbits receiving high doses of antigen, **254**: 603-613
- Sesquiterpenes, synthesis of, **295**: 249-253
- Sex
and culture and development, **285**: 653-658
archetypes and stereotypes in ideologies of, **285**: 618-645
- Sex distribution among Greek students, **268**: 385-394
- Sex-linked differences in depressant actions of alcohol, **273**: 303-316
- Sex roles in cross-cultural perspective, **285**: 612-617
- Sexual behavior, role of progesterone in, **286**: 331-354
- Sewage (see also Waste)
- Sewage effluents, and tissue lesions of tiger salamanders, **298**: 270-279
- Shamanism among Kuikuru Indians of central Brazil, **293**: 215-228
- Shanidar cave Neanderthal flower burial, **293**: 114-124
- Shape, arbitrary, biomolecules of, Poisson equation for, **303**: 22-37
- Shawnee-Minisink Paleoindian archaeological site, **288**: 218-222
- Shawnee-Minisink site, **288**: 282-296
- Shear rate, blood, and platelet deposition on subendothelium, **283**: 284-292
- Shear stress, platelet function after, **283**: 138-158
- Sheep
hemoglobin switching in, **241**: 556-565, 566-581
ontogeny of hemoglobins in, **241**: 672-682
- Shenandoah valley, lower, geomorphologic evolution of, **288**: 189-193
- Shifts, red, and quasars, **262**: 422-427
- Shrimp, estuarine, and marine, *Baculovirus* infections in, **266**: 528-536
- Sickle cell anemia, cyanate for, **421**: 538-544
- Sickle cell hemoglobin phenotypes, detection of, in amniotic erythrocytes, **241**: 699-713
- Sickling phenomena of deer, **241**: 594-604
- Signals, ν_{as} of extraterrestrial origin, search for, **262**: 219-224
- "Signal theory" in cellular immunology, **249**: 27-33

- Sign language
 autonomy of, **280**: 505-513
 iconic and abstract, **280**: 514-538
 projects in, and implications for language origins, **280**: 589-591
- Signatures, x-ray, time scales and spectral features of, **302**: 329-348
- Simulation, computer
 of electrostatic confinement of plasmas, **251**: 370-380
 of radiofrequency confinement of plasma, **251**: 94-111
- Sinclair miniature swine as model for study of human alcoholism, **273**: 188-193

- Societal morphogenesis and intra-family violence, cross-cultural perspective on, **285**: 717-730
- Society
advanced and developing, orientation to change in, **285**: 565-581
and need for technical and scientific information, **261**: 126-136
archaic, in upper Susquehanna valley of New York, **288**: 392-399
contemporary, feminist perspective on, **260**: 84-100
for Occupational and Environmental Health, first annual award of, to Dr. Wilhelm Heuper, **271**: 457-459
modern Greek, relevance of concept of class to, **268**: 395-409
plantation
in 18th-century Mexico, role of family in, **292**: 226-241
of St. Kitts, from slavery to unfreedom in, **292**: 379-388
slave, development of, **292**: 63-71
slaveholding, in Brazil, **292**: 311-342
temporalization of, in 19th century, **291**: 140-148
West Indian
Scots' role in, **292**: 94-106
slave, economic analysis of, **292**: 597-609
- Sociobiological frame, language in, **280**: 798-809
- Socioeconomic factors and roots of American psychology, **291**: 203-221
- Sociological fieldwork in Cyprus, **268**: 345-354
- Socio-psychological variables, triangular (Japan—U.S.A.—Europe) study of, **285**: 221-226
- Sodium
changes of, in red cells, related to digoxin and hypokalemia, **242**: 693-703
effects of, on partial reactions of highly purified $\text{Na}^+ + \text{K}^+$ -ATPase, **242**: 235-245
- Sodium fluxes in squid axons, effects of membrane potential on, **242**: 406-434
- Sodium ions, uncoupled efflux of, from red blood cells, and Na-dependent ATPase activity, **242**: 461-470
- Sodium + potassium adenosine triphosphatase
action of methanethiol on, and implications for hepatic coma, **242**: 573-576
active site determination and criteria of purity of, **242**: 36-52
activity of during and after arrhythmic response to AY-22-241 in canine heart, **242**: 740-741
and cardiac monoglycosides, association and dissociation rate constants of, **242**: 598-616
and cytidine triphosphate in phosphorylation, **242**: 139-148
and digitalis cardiotoxicity, **242**: 658-670
and method of action of aldosterone, **242**: 471-488
antibodies to, and reactions catalyzed by enzyme, **242**: 372-388
anti-serum to, and ion-transporting and hydrolytic activities, **242**: 357-371
as pharmacologic receptor for cardiac glycosides, **242**: 646-657
binding of ATP to, **242**: 158-167
brain, effect of ethanol on, **273**: 331-337
cardiac
high-activity, binding and dissociation in, **242**: 577-597
ouabain-induced inhibition of, **242**: 683;684
different functional states of, cation interaction with, **242**: 185-202
digitonin as uncoupler of partial reactions of, **242**: 149-157
effects of $^2\text{H}_2\text{O}$ on, **242**: 280-292
effects of lipid phase transitions on, and protein conformational changes, **242**: 69-76
flip-flop model of, **242**: 203-219
heterotropic relaxation model for, and Na^+ , K^+ , and nucleotide interactions, **242**: 268-279
highly purified, effects of Na and K on, **242**: 235-245
in early embryonic development, **242**: 543-559
in rat nephron, **424**: 489-500
in synthesis of adenosine triphosphate, **242**: 80-91
interaction of
with cardiac glycosides, influencing factors on, **242**: 617-634

- with chlorpromazine free radical and related compounds, **242**: 527-542
- of heart, ouabain sensitivity to, **242**: 710-716
- of kidney and brain, reconstitution of active transport by, **264**: 387-397
- of mammalian erythrocyte membranes, **242**: 305-316
- phosphoenzyme conformations of, **242**: 120-132
- preparations of, sodium-dependent ionophore isolated from, **242**: 389-405
- properties and functions of, **242**: 5-741
- proteins undergoing changes associated with, sulfhydryl agents to identify, **242**: 246-254
- purification and properties of
 - and reconstitution of sodium transport, **242**: 12-23
 - from pig brain, **242**: 24-35
- reaction of, phosphorylated intermediates in, **242**: 92-105
- regulatory effects of potassium on, **242**: 220-234
- relationship of K^+ -activated phosphatase to, **242**: 293-304
- reminiscence about, **242**: 6-11
- renal, inhibition of, and natriuresis, **242**: 501-518
- role of, in renal function, **242**: 519-526
- solubilized myocardial, **242**: 53-68
- specific modifications of, by DMSO, **243**: 60-72
- g*-strophanthin binding on, **242**: 635-645
- Sodium-postassium affinity, effect of ATP on, **242**: 168-184
- Sodium-potassium and nucleotide interactions and heterotropic relaxation model for $Na^+ + K^+$ -ATPase, **242**: 268-279
- Sodium-potassium exchange and Na^+ , Na^+ exchange in squid axon, **242**: 435-444
- Sodium-potassium pump in goat red blood cells, kinetics of, **242**: 343-356
- Sodium pump
 - in red cells and mechanism of active transport, **242**: 445-458
 - regulating liver metabolism in experimental alcoholism, **242**: 560-572
- Sodium transport
 - and acid- and heat-stable phosphoenzyme complexes of $Na^+ + K^+$ -ATPase in the eel electric organ, **242**: 106-119
 - reconstitution of, and purification and properties of $Na^+ + K^+$ -ATPase, **242**: 12-23
- Soft-shell clams
 - from oil-impacted areas, neoplasms in, **298**: 409-426

and biological activity of some nucleosides resembling guanosine, **255**: 166-176
collagen
in cultured fibroblasts, and ascorbic acid, **258**: 288-306
related to catecholamines, **275**: 114-116
de novo cell-free, of human interferon, **284**: 697-702
 β -endorphin, from pituitary, **297**: 158-166
factor VIII antigen, by cultured human endothelial cells, **240**: 62-69
 α -fetoprotein
and Yoshida sarcoma and ascites hepatoma, **259**: 74-79
by rat ascites hepatoma cells, **259**: 29-36
in hepatoma cells, immunoelectronmicroscopic study of, **259**: 211-216
4'-substituted nucleoside, **255**: 151-165
gas, industrial organic chemicals through, **295**: 239-248
globin
in rabbit reticulocytes, **241**: 223-231
in the thalassemias, **241**: 247-252
hemoglobin, adult, in human fetus, **241**: 691-698
Herpesvirus hominis DNA, inhibited by 9- β -D-arabinofuranosyladenine, **284**: 34-48
methylated nucleoside, inhibition of, **255**: 567-575
nucleosides
related to pyrrolo [2,3-d]pyrimidine nucleoside antibiotics, **255**: 91-103
with trimethylsilyl-heterocycles, **255**: 82-90
of azapurine nucleosides as cytotoxic agents, **255**: 292-305
of novel analogs of thymidine, **255**: 332-341
of one type of globin chain by inhibiting synthesis of the opposite, **241**: 242-246
organic (see also Organic synthesis)
cobalt-carbonyl acetylene complexes in, **295**: 2-14
with polymer-attached homogenous catalysts, **295**: 15-35
ovalbumin, effects of estrogen and progesterone on, in withdrawn oviduct, **286**: 116-124
porphyrin, particular approaches to, **244**: 348-355
protein
in hepatocyte, **252**: 51-62
in rabbit uterus, and progesterone, **286**: 260-272
ribo-oligonucleotide, having sequence of tRNA, **255**: 71-81
sesquiterpene, **295**: 249-253
steroid, effects of ACTH, intestinal peptide and cholera toxin on, **297**:
6-substituted pyrimidine nucleoside, **255**: 121-130
tetrapyrane, **244**: 396-400
viral DNA, inhibited by chemotherapeutic agents, **284**: 396-409
vitamin C, in animals, **258**: 24-47
Synthetase, glucosamine-6-phosphate, carcinofetal alterations in, **259**: 298-306
Synthetic site-directed inhibitors of elastolytic proteases, **256**: 420-425
- Systems
afferent, tonic functions of, **290**: 35-42
amorphous, relationship of crystallization behavior to structure in, **279**: 185
binary
close, x-ray emission processes in, **302**: 6-13
discovery of pulsar in, **262**: 490-492
gravitational radiation damping and energy loss in, **302**: 557-5644
central nervous (see Central nervous system)
disordered, dynamic order parameter fluctuations in, **279**: 45-46
HZ Her, optical properties of accretion disk in, **302**: 55-60
ion transport, resolution and reconstitution of, **264**: 17-33
limbic, tonic environmental influences on, **290**: 396-420
olfactory, modulating affective behavior in pigeon, **290**: 314-330
personological, indispensables for making of, **291**: 323-331
plantation, development of, **292**: 63-71
progenitor, of x-ray binaries, **302**: 14-35
visual communication, mastery of, in aphasia, **280**: 885-897
x-ray, OB supergiants in, **262**: 379-384
- Tactoid formation in man and animals, molecular aspects of, **241**: 623-637
Tails of x-ray bursts, extended, **302**: 244-247
Tarahumara Indians, physiologic responses to ethanol among, **273**: 151-158

- Taste nucleus, thalamic, tonic control of water intake via, **290**: 124-138
- T-cell activity in peripheral blood of myasthenia gravis patients, **274**: 421-433
- of sarcoidosis patients, **278**: 52-68
- T-cell antigens, nature and function of, **249**: 505-522
- T-cell differentiation by thymus epithelial cells, **249**: 492-498
- in athymic mice, immunofluorescence studies of, **254**: 226-242
- T-cell factor produced in leukocyte cultures, stimulation of B immunocytes by, **249**: 264-277
- T-cell heterogeneity, mitogens and, **249**: 43-46
- T-cell immunoglobulin in cell cooperation, T-cell suppression and antigenic competition, **249**: 424-437
- T-cell interactions in autoimmune syndromes, **256**: 105-116
- T-cell-produced mediator substance in humoral immune response, **249**: 258-263
- T-cell quantification in sarcoid lymphocytes, **278**: 69-79
- T-cell regulation of immune responsiveness, **249**: 9-26
- T-cell rosettes activated by thymosin in immunodeficient patients, **249**: 308-315
- T cells
absolute requirement of, in induction of IgM-secreting cells, **277**: 477-484
- antibodies to, in sarcoidosis, **278**: 88-100
- distribution of, in myasthenia gravis patients, **274**: 411-420
- normal blood, effects of thymosin on, **249**: 300-307
- recovery of, in antithymosin-treated mice, antithymosin globulin in, **249**: 499-504
- suppressor, as regulators of lymphocyte function, **256**: 365-374
- θ -bearing, from bone marrow cells treated with thymic factor, **249**: 54-60
- T-cell subpopulation in sarcoidosis, **278**: 80-87
- T-cell suppression, role of T-cell immunoglobulin in, **249**: 424-437
- Technical information, society's need for, **261**: 126-136
- Technicians, radar, screening for cataracts in, **247**: 135-141
- Technological traditions of Paleoindians, **288**: 355-368
- Technology
and subjective culture and "nuclear allergy" in Japanese, **285**: 516-538
- electronic, and spread of knowledge, **261**: 242
- food, use and abuse of, **300**: 161-166
- genetic, ethical issues in use of, **265**: 22-45
- recombinant DNA, issues posed by, **265**: 59-81
- Teleost chromatophores, microtubule-dependent movement of pigment granules in, **253**: 692-701
- Temperature
body, and ethanol and serotonin metabolism, **273**: 247-255
- low, anomalous properties of glasses at, **279**: 150-172, 173-179
- skin, influenced by exercise mode and ambient conditions, **301**: 110-127
- Temperature-dependent epidermal tumors in European eel, **298**: 245-260
- Temperature measurement of absorbed radio-frequency power, fiberoptic liquid crystal probe for, **247**: 527-531
- Temporalization of ego and society in nineteenth century, **291**: 140-148
- Temporal-limbic dysfunction, lateralized, and psychopathology, **280**: 777-795
- Tensor calculations, stress, and conformed anomalies, **302**: 166-185
- Territoriality and evolution of brain asymmetry, **299**: 213-221
- Test
beryllium macrophage migration inhibition, **278**: 204-211
- Kveim
analyzed using Colindale (K 12) materials, **278**: 681-686
- in immunologic studies of sarcoidosis, **278**: 711-716
- lipoprotein-X, in sarcoidosis patients with liver involvement, **278**: 439-444
- Makari intradermal, in diagnosis of cancer, **276**: 97-105
- ornithosis complement fixation, in sarcoidosis, **278**: 225-232
- platelet retention, and platelet reactions near surfaces, **283**: 128-137
- psychological, of marathon runners using Myers-Briggs type indicator and demographic data, **301**: 1010-1019
- Salmonella*/microsome, in detection of mutagenic metabolites of carcinogens in urine, **269**: 21-25
- stress, in predicting coronary heart disease, **301**: 642-652
- treponemal antibody, absorbed fluorescent, sorbent and Reiter sonicate in, **254**: 395-399
- Test device to assess hemocompatibility, intravascular magnetic suspension of, **283**: 524-535
- Testing
electrical, in diagnosis of myasthenia gravis, **274**: 203-222
- mutagenesis, role of cytogenetics in, **269**: 12-15
- of African children, **285**: 326-331
- Test material, Kveim-Siltzbach, Edinburgh spleen as, **278**: 670-680
- δ^9 -Tetrahydrocannabinol
acute and chronic inhalation of, and brain electric activity, **282**: 387-398
- and other drugs, acute interactions between, in rat, **281**: 171-190

- interactions of, with other pharmacologic agents, **281**: 198-211
- Tetrahydroisoquinoline alkaloids and postalcohol intoxication states, **273**: 234-246
- Tetrapyrroles, synthetic approach to, **244**: 396-400
- Textile industry, workers in, oral and pharyngeal cancer in, **271**: 301-307
- Thalamic taste nucleus, tonic control of water intake via, **290**: 124-138
- Thalamus in man, asymmetric function of, **299**: 380-396
- Thalassemias
 globin synthesis in, **241**: 247-252
 globin translation in bone marrow in, **241**: 253-261
 pathophysiology of, **241**: 274-279
 potential molecular mechanism of, **241**: 132-141
- Theories
 dielectric, and properties of DNA in solution, **303**: 59-73
 gestural, of language origin, **280**: 482-504
 hole, to estimate pressure-induced densification of polymers, **279**: 88-93
 language-origin, since the Renaissance, **280**: 4-13
 of cognitive state, and perceptual processes and hypnosis, **296**: 274-283
 of compact x-ray sources, recent progress in, **262**: 331-360
 of competence, necessity for, **263**: 178-196
 of encephalization, **299**: 146-160
 of gravity, Einstein-Cartan, advances in, **262**: 241-245
 of performance, place of grammar in, **263**: 171-177
 of weak interactions, astrophysical implications of, **262**: 409-421
 quantum field, in curved space-time, **302**: 114-157
 quasar, **302**: 613-636
 traditional "trance state" of hypnosis, **296**: 34-47
- Thera, ethnography of, **268**: 328-340
- Therapeutics, genetic, ethics of, **265**: 153-161
- Therapeutic trials for DMSO, design of, **243**: 390
- Therapist-patient relationship in hypnotherapy, **296**: 238-249
- Therapy, gene
 future of, **265**: 141-152
 in man, **265**: 13-21
- Thermal balance of Hudson River estuary, **250**: 157-168
- Thermal exposure, effects of, on trace metal content of blood plasma and liver cells, **247**: 282-291
- Thermal knives compared with carbon dioxide lasers in excision of burns, **267**: 254-262
- Thermal properties, anomalous, of glasses at low temperature, **279**: 150-172
- Thermal reactions of bilirubin IX- α , **244**: 553-569
- Thermodynamic probes of ferrimyoglobin reactions, **244**: 35-50
- Thermodynamics
 configurational statistical, of polymer liquids, **279**: 2-14
 of black holes, **302**: 161-165
 of glass transition, **279**: 53-67
 of spindle microtubule assembly, **253**: 383-406
 statistical, of configurational properties, **279**: 68-77
- Thermonuclear microexplosions with intense ion beams, **251**: 679-689
- Thessaly as frontier between two cultural areas, **268**: 43-58
- Thiopurine nucleoside derivative, new, biochemical pharmacology of, **255**: 481-488
- Thiosemicarbazones inhibiting Rous sarcoma virus, **284**: 525-532
- Thoracic duct lymphocytes, adoptive immunotherapy using, **277**: 7-19
- Thoracic sarcoidosis, selective arteriography of celiac artery in, **278**: 433-438
- Thornton, William, 18th-century American psycholinguist, **291**: 264-276
- Thought
 distinguished from language, issues that arise from, **263**: 76-83
 role of, in developmental psycholinguistics, **263**: 7-11
- Threshold concepts and dose-response relationship, **271**: 22-28
- Threshold limit values approach to asbestos, **271**: 152-169
- Thrombogenesis, endothelial surface charge related to, **275**: 47-63
- Thrombosis
 experimental, metabolic influences in, **275**: 28-46
 use of topically applied DMSO in, **243**: 91-97
- Thymectomy
 and long-term prednisone for myasthenia gravis, **274**: 608-622
 in myasthenia gravis
 in adults, **274**: 527-535
 pathologic and electrophysiologic correlations with, **274**: 555-573
- Thymic fraction, polypeptide, stimulating antibody formation, **249**: 380-386
- Thymidine, novel analogs of, synthesis of, **255**: 332-341
- Thymidine kinase, herpes simplex virus types 1 and 2, alternative substrates for, **284**: 594-598
- Thymidine-methotrexate in treatment of murine leukemia, **255**: 261-265
- Thymin *see also* Thymopoietin)
 isolation of, **249**: 177-185
- Thymocyte precursors, inductive activity of thymopoietin on, **249**: 290-299
- Thymocyte proliferation in mice, effect of thymosin on, **249**: 438-450

- Thymocytes**
cortisone-sensitive, in DNA synthetic responses to antigen, **249**: 451-461
thymosin-induced differentiation of, in lymphocyte cultures, **249**: 145-153
- Thymoma** patients with or without myasthenia gravis, and HL-A antigens and autoantibody production, **274**: 468-474
- Thymopoietin**
inductive activity of, on thymocyte precursors, **249**: 290-299
isolation of, **249**: 177-185
- Thymosin**
activating T-cell rosettes in immunodeficient patients, **249**: 308-315
bovine, purification and properties of, **249**: 125-144
effects of
on normal blood T-cells, **249**: 300-307
on thymocyte proliferation and autoimmunity in mice, **249**: 438-450
in cancer patients, studies of, **273**: 609-620
inducing differentiation of murine thymocytes in lymphocyte cultures, **249**: 145-153
inducing response to diphtheria toxoid, **249**: 278-289
in treatment of autoimmune disease, **274**: 390-401
- Thymus**
and kinetics of colony-forming units, **249**: 468-476
bovine
antibody-stimulating factor isolated from, **249**: 211-219
immunosuppressive α globulin from, **249**: 235-247
endocrine, and autoimmune disease, **274**: 390-401
epithelial cells of, T-cell differentiation by, **249**: 492-498
progesterone binding in, **286**: 355-368
role of, in spontaneous autoimmune thyroiditis, **249**: 116-124
- Thymus cell** function, ontogeny of, **249**: 34-42
- Thymus-corticotropin** growth hormone and rejection of skin allografts, **249**: 387-401
- Thymus-derived** cytotoxicity to syngeneic lymphocyte surface proteins, **249**: 47-53
- Thymus-derived** leukemic cells, differentiation of, **249**: 484-491
- Thymus-derived** lymphocytes, cytolytic action of, and connective tissue, **256**: 141-149
- Thymus extract**
antitumor effect of, and T-lymphocyte maturation, **249**: 328-334
hypocalcemic and lymphocyte-stimulating substance isolated from, **249**: 220-235
stimulating immune responsiveness, **249**: 349-361
influence of, on maturation of immune response, **249**: 343-348
in transfer of delayed hypersensitivity, **249**: 462-467
- Thymus factors**
activation of immune competence by, **249**: 248-257
bone marrow cells treated with, θ -bearing T-cells from, **249**: 54-60
effect of, on differentiation of human marrow cells into T-lymphocytes, **249**: 335-342
humoral, influencing post-thymic cells, **249**: 89-105
in immunity, **249**: 5-547
in regulation of θ -antigen expression, **249**: 316-327
- Thymus hormones**, **249**: 61-67
as regulators of immune responses, **274**: 519-526
circulating, biochemical study of, **249**: 186-210
nature and biological activities of, **249**: 523-530
preparation of, extraction and fractionation of, **249**: 402-403
- Thyroid hormone** mobilization and microtubules, **253**: 763-770
- Thyroiditis**, spontaneous autoimmune, role of thymus in, **249**: 116-124
- Ticks** causing spotted-fever, rickettsiae in, and transovarial infection, **266**: 61-72
- Tiger salamanders**, tissue lesions of, and sewage effluents, **298**: 270-279
- Tilorone** in immunoadjuvant studies of cancer therapy, **277**: 269-287
- Time-dependence** of red shifts in Friedmann universes, **262**: 470-471
- Time scales**, and x-ray signatures, **302**: 329-348
- Timing effects** in rotating neutron stars, **302**: 445-459
- Tinnitus** of unknown origin, DMSO in, **243**: 468-474
- Tinos**, ethnography of, **268**: 314-327
- Tissue**
animal, optical evaluation of ultrasonic scattering in, **267**: 312-323
atherosclerotic arterial, cholesteryl ester metabolism in, **275**: 228-237
cancer L-leucine-sensitive alkaline phosphatase isozyme from, **259**: 325-336
canine, IgE in, **254**: 476-488
connective (*see* Connective tissue)
hepatic, histologic changes in, and α -fetoprotein, **259**: 156-167
intra-articular collagenous, antigen-antibody complexes in, **256**: 10-24
neuroendocrine, adrenal steroid feedback on, **297**: 568-579
of central nervous system, immunohistochemistry in study of, **254**: 407-432
preparation of, for immunohistochemical processing, **254**: 21-26
rheumatoid inflammatory, plasma cells in, **252**: 88-95
sarcoid, transmissible agent from, **278**: 233-248

- soft, and carbon dioxide laser in otolaryngologic surgery, **267**: 263-294
- synovial
 - collagenase production by, **256**: 289-303
 - role of inflammatory cells in destruction of, **256**: 288
 - temperature measurement during irradiation in, fiberoptic probe for, **247**: 527-531
- Tissue antigens, preservation of, in immunofluorescent antibody technique, **254**: 27-34
- Tissue autoantibodies, detection of, by immunofluorescence, **254**: 66-68
- Tissue changes induced by vitamin C deficiency, **258**: 317-328
- Tissue culture
 - arterial smooth muscle cells in, lipoprotein uptake and degradation by, **275**: 199-203
 - influenza virus in, efficacy of ribavirin against, **255**: 366-371
- Tissue gas tensions, effect of DMSO and hydrogen peroxide on, **243**: 320-324
- Tissue growth, fetal, inhibited in newborn recipients, **276**: 328-342
- Tissue injury
 - effect of complement depletion on, **256**: 426-440
 - initiation of, immune complexes in, **256**: 8-9
 - mechanisms of, with reference to rheumatoid arthritis, **252**: 5-450
 - pathogenic mechanisms of, in persistent viral infections, **256**: 65-72
- Tissue lesions of tiger salamanders and sewage effluents, **298**: 270-279
- Tissue lipid after injury to artery, **275**: 180-198
- Tissue specificity, role of viral receptors in, **266**: 255-258
- "Titanocene"-catalyzed reactions of olefins, **295**: 174-185
- Titanium, organic derivatives of, photochemical studies on, **295**: 103-109
- T lymphocytes
 - and cutaneous anergy in inflammatory bowel disease, **278**: 565-573
 - and immune response to exotoxin and antigens of *Vibrio cholerae*, **249**: 404-412
 - chemotactic lymphokine production by, **256**: 375-385
 - differentiation of human marrow cells into, effect of thymic factors on, **249**: 335-342
 - effects of x-irradiation on, **256**: 342-351
 - immune reactivity of, cellular interactions controlling, **249**: 106-115
 - in dermatitis, **254**: 592-599
 - maturation of, and antitumoral effect of thymic extract, **249**: 328-334
 - suppressor, in antibody-induced inhibition of cytophilic antibody receptors, **276**: 229-242
- Tobacco, mutant of, resistant to carboxin, **287**: 385-
- Togavirus, neutralization of, by antivector antisera, **266**: 251-254
- Tolerance (*see also specific agent*)
 - development of, agonist-antagonist interaction on, **281**: 244-251
 - tissue, and inhalation of hashish, marijuana, and cannabis, **282**: 387-398
 - to cannabis, **282**: 126-147
 - clinical study of, **282**: 221-239
 - to heat, of female distance runners, **301**: 777-792
 - to marijuana, related to adrenocortical metabolism of contraceptive, **282**: 173-179
 - work-heat, of distance runners, **301**: 139-150
- Tonic control of water intake via thalamic taste nucleus, **290**: 124-138
- Tonic effects
 - and genital desensitization and mating behavior in male cats, **290**: 299-313
 - and trigeminal deafferentation and feeding behavior in pigeon, **290**: 331-347
 - of light in entrainment of circadian rhythms, **290**: 51-59
- Tonic environmental influences on limbic and related systems, **290**: 396-420
- "Tonic" firing of *Aplysia* neuron, and slow membrane phenomena, **290**: 103-113
- Tonic functions
 - of afferent systems, **290**: 35-42
 - of sensory systems, **290**: 1-435
- Tonic hypothesis and patterning of behavior, **290**: 370-395
- Tonic mechanisms, sense-organ-dependent, **290**: 3-17
- Tonic processes in chemoception in Wistar rat, **290**: 226-269
- Tonic properties
 - of animal communication systems, **290**: 43-50
 - of orosensation, and intracranial self-stimulation, **290**: 158-179
- Tonic retinal influences in primates, **290**: 139-151
- Tonic sensory input in insects, **290**: 114-123
- Toolmaking, hunting, and origin of language, **280**: 266-274
- Torpedo*, acetylcholine receptors from, **274**: 108-115
 - purification and incorporation of, into phospholipid vesicles, **264**: 175-182
- Torque in accreting black holes, **262**: 113-122
- Toxicity
 - amine-nitrite, effect of ascorbic acid on, **258**: 169-174
 - chemical, and halogenated benzenes, **298**: 159-169
 - differential, of chloroform, **298**: 170-176
 - experimental acute, of vinyl chloride, **246**: 154-158
 - heavy metal
 - ascorbic acid protection against, **258**: 144-150
 - to *Biomphalaria glabrata*, **266**: 437-444
 - of 9- β -D-arabinofuranosyladenine in presence of

- inhibitor of adenosine deaminase, **284**: 91-102
- of DMSO, **243**: 98-103
- of vinyl chloride-polyvinyl chloride, **246**: 4-337
- Toxicity-reducing agent, DMSO as, in cancer therapy, **243**: 412-420
- Toxicology
- animal, of vidarabine and its 5'-monophosphate, **284**: 6-8
- human, of DMSO, **243**: 500-509
- of vinyl chloride-polyvinyl chloride, bibliography on, **246**: 322-337
- Toxin
- cholera, and adrenal cAMP and steroid synthesis, **297**: 314-328
- control of (*see specific toxin*)
- diphtheria, antitumor antibodies conjugated to, in immunotherapy of animal tumors, **277**: 690-699
- of marine animals, **245**: 57-64
- Trace metal content of blood plasma, effects of thermal and radio-frequency exposure on, **247**: 282-291
- Tracking, psychomotor, effects of alcohol and cannabis on, **282**: 240-256
- Trade, slave, profitability of, in 1840s, **292**: 84-93
- Traditional environment, modernization-relevant values in, **285**: 582-592
- Traditions, technological, of Paleoindians, **288**: 355-368

- Tumor-bearing hosts, elevated levels of complement in, **276**: 303-315
- Tumor cells
cytotoxicity of, macrophage-mediated, **276**: 134-145
growth and morphology of, effect of DMSO and dimethylformamide on, **243**: 164-171
irradiated, in immunotherapy of malignant melanoma, **277**: 355-366
lymphocytes sensitized against, **276**: 165-175
modification of, to increase immunogenicity, **276**: 45-60
modified, immunogenicity of, in syngeneic hosts, **276**: 61-74
mouse plasma, intracisternal A-type particles in, **243**: 172-184
neuraminidase-treated, as immunogen in leukemia, **277**: 313-331
sensitive and resistant to arabinosylcytosine, 3-deazauridine in, **255**: 501-521
syngeneic, as escape mechanism from immune surveillance, **276**: 455-464
virus-modified, in immunotherapy of osteosarcoma patients, **277**: 396-411
- Tumor destruction by acridine orange photoactivation by argon laser, **267**: 191-200
- Tumor-directed cellular hypersensitivity in patients with renal carcinoma, **276**: 260-271
- Tumor growth
herpes-like lesions in, **277**: 269-287
inhibition of, in newborn recipients, **276**: 328-342
in mouse, effect of IgG₁ class alloantibody on, **277**: 700-705
resistance to or enhancement of, by tumor antigens, **276**: 106-123
- Tumor immunity
augmentation of, in murine methylcholanthrene sarcoma system, **277**: 533-540
effect of antigenic competition on, **276**: 496-501
induction of, by intratumor chemotherapy, **276**: 565-572
peripheral and *in situ*, **276**: 373-380
- Tumor immunotherapy
in animals, current status and prospectus for, **277**: 716-721
with antitumor antibodies conjugated to diphtheria toxin or ricin, **277**: 690-699
with nonspecific immunostimulants, **277**: 60-93
- Tumor-infiltrating lymphocytes, **276**: 207-216

 - inhaled, in rats, **246**: 135-148, 149
 - interaction of, with 1,1-dichloroethylene, **246**: 150-151
- Vinyl chloride poisoning, clinical manifestations of, **246**: 53-69
- Violence, **261**: 243-249
 - intra-familial, and societal morphogenesis, **285**: 717-730
- Viper cell line and nuclear polyhedrosis virus of *Autographa californica*, **266**: 327-331
- Vira-A, antiviral activity of, effect of co-vidarabine on, **284**: 60-80
- Viral antigens in transplantable mammary tumor systems, **276**: 358-368
- Viral diagnostic laboratory, mini, as adjunct to use of antiviral drugs, **284**: 122-127
- Viral disease, inosiplex as immunomodulation model for, **284**: 128-138
- Viral DNA polymerases
 - avian myeloblastosis, inhibited by anthrocycline compounds, **284**: 566-575
 - inhibition of, biological implications of, **255**: 532-543
- Viral DNA synthesis, inhibition of, by chemotherapeutic agents, **284**: 396-409
- Viral hepatitis
 - acute, effect of ribavirin on, **284**: 278-283
 - in laboratory animals, effects of ribavirin on, **284**: 239-246
- Viral infection
 - effect of cyclic nucleotides on, **284**: 375-388
 - hepatitis B, immunodeficiency to, **259**: 181-195
 - herpes, inosiplex for, **284**: 190-196
 - herpes simplex, of guinea-pig skin as model for antiviral chemotherapy, **284**: 624-631
 - influenza, effect of interferon on, **284**: 667-675
 - influenza A, small airways dysfunction in, action of amantadine on, **284**: 106-117
 - leukemia, and antibody formation and cellular immunity, **276**: 411-416
 - persistent, pathogenic mechanisms of tissue injury in, **256**: 65-72
- Viral leukemogenesis, influence of immune stimulators on, **276**: 502-512
- Viral multiplication, inhibition of, by bichlorinated pyrimidines, **284**: 294-304
- Viral receptors, role of, in host and tissue specificity, **266**: 255-258
- Viral replication
 - DNA, antiviral activity of vidarabine for, effect of co-vidarabine on, **284**: 60-80
 - in cell cultures irradiated *in vitro*, effect of microwaves on, **247**: 263-274
- Viral RNA, polynucleotide mimics in, antiviral activity of, **284**: 682-696
- Virchow's triad, elucidation of, **283**: 477-493
- Virginia, Shenandoah valley of, geomorphic evolution of, **288**: 189-193
- Virgin Islands, Danish, slave laws in, **292**: 174-186
- Virion and virus-induced cell surface antigens, **276**: 343-357
- Virology, new immunoenzyme methods in, **254**: 369-384
- Virus
 - development of resistance against, indicating antiviral activity, **284**: 624-631
 - endogenous RNA tumor, autogenous immunity to, **276**: 343-357
 - Epstein-Barr, antigens associated with, **254**: 516-522
 - Friend
 - concanavalin-A-treated mice infected with, impaired B-lymphocyte functions in, **276**: 466-478
 - genetic resistance to immune suppression by, **276**: 217-228
 - herpes (see also Herpes virus)
 - herpes simplex, photodynamic inactivation of, **284**: 171-181
 - herpes simplex type 1, development of resistant strains of, **284**: 233-238
 - herpes simplex types 1 and 2, alternative substrates of, **284**: 594-598
 - influenza
 - inhibited by triphenylmethane compound, **284**: 632-637
 - in tissue culture, efficacy of ribavirin against, **255**: 366-371
 - interacting with chemical pollutants in crustacean, **298**: 497-504
 - keystone, ecology of, **266**: 144-151
 - Kotonkan, of rabies serogroup, **266**: 241-250
 - LaCrosse, transovarial transmission of, in *Aedes triseriatus*, **266**: 135-143
 - Mokola, of rabies serogroup, **266**: 241-250
 - nuclear polyhedrosis
 - of alfalfa looper, **266**: 302-326
 - of *Autographa californica*, and vertebrate viper cell line, **266**: 327-331
 - Obodhiang, of rabies serogroup, **266**: 241-250
 - polio, plant antiviral peptide inhibiting replication of, **284**: 431-440
 - Rauscher leukemia, inhibited by anthrocycline compounds, **284**: 566-575
 - RNA tumor, inhibition of replication of, **284**: 472-507
 - Rous sarcoma, inhibited by copper-binding ligands, **284**: 525-532

- Sindbis, infecting *Aedes albopictus* cell cultures, **266**: 214-231
- Sindbis mutant, isolated from *Aedes aegyptii* cell cultures, **266**: 204-213
- tumor, and immunocyte precursor cells, **276**: 442-454
- varicella-zoster, inhibited from replicating by 5-halogenated analogs of deoxycytidine, **284**: 389-395
- Viruses**
- action of flavenoids against, **284**: 357-364
- animal, replication cycles in, microtubules in, **253**: 440-444
- aphid-transmitted plant, vector specificity for, **266**: 293-301
- comparative effects of, on arthropod and vertebrate cells, **266**: 195-196
- DNA and RNA, contact inactivation of, by *N*-methyl isatin betathiosemicarbazone and CuSO_4 , **284**: 533-543
- endogenous oncogenic, immunologic activation of, **276**: 529-535
- herpes simplex, 5-halogenated analogs of deoxycytidine inhibiting replication of, **255**: 359-365
- in sarcoidosis, search for, **278**: 260-264
- multiple infections of invertebrate cells by, **266**: 232-240
- murine leukemia, in reversal of immunosuppression, **276**: 431-441
- of eels with and without stomatopapillomas, **298**: 233-244
- RNA tumor**
- inhibiting oncogenesis, **284**: 444-462
- interference of replication and expression of, **284**: 576-584
- transovarial transmission of, by phlebotomine sandflies, **266**: 125-134
- Virus-induced cell surface antigens, **276**: 343-357
- Virus-induced leukemia cells, murine, hemoglobin biosynthesis in, **241**: 582-588
- Virus-induced murine neoplasms, immunotherapy for, **272**: 557-564
- Virus-induced tumors, reticuloendotheliosis, serotherapy of, **277**: 634-646
- Virus-like particles in early rheumatoid arthritis, **256**: 39-54
- Virus-modified tumor cells in immunotherapy of osteosarcoma patients, **277**: 396-411
- Virus-specific immune responses after levamisole therapy of herpes progenitalis, **284**: 161-170
- Viscosity, polymer, remarks on, **279**: 43-44
- Visual communication system, mastery of, in aphasia, **280**: 885-897
- Visually based language, perception and production in, **263**: 225-235
- Visuocultural influences on lateralization, **299**: 474-476
- Vitamin A deficiency, control of, **300**: 210-220
- Vitamin B_6 , hematologic abnormalities involving, in alcoholics, **252**: 316-327
- Vitamin B_{12} , biosynthesis of, **244**: 356-370
- Vitamin C (see also Ascorbic acid) and cigarette smokers, **258**: 156-168
- and upper respiratory illness in Navajo children, **258**: 513-522
- current status of, **258**: 540-545
- large-scale trials of, **258**: 498-504
- marginal deficiency of, tissue changes induced by, **258**: 317-328
- overdosage of, diminished high-altitude resistance after, **258**: 377-381
- second conference on, **258**: 5-552
- status of, **258**: 438-450
- synthesis of, in animals, **258**: 24-47
- Vitamins, fortification of foods with, **300**: 151-160
- Vitreous materials, structural relaxation in, **279**: 15-35
- Vocalization, comparative neurology of, **280**: 745-757
- Vocalizing in unison and alternation in mother-child dyad, **263**: 89-100
- Vocal learning, ethological theory of origin of, **280**: 386-395
- Vocal tract**
- and brain, and search for evolutionary bottlenecks, **280**: 643-649
- human, phylogeny of, **280**: 612-630
- Vocational problems in hemophilia, **240**: 246-254
- Voltage-dependent membrane capacity of squid giant axons, **303**: 306-321
- Voltage-induced aggregation of channel precursors, membrane excitation through, **264**: 247-264
- von Willebrand's disease related to hemophilia A, **240**: 109-116
- Warfarin**, effects of DMSO on blood concentrations of, **243**: 311-316
- Waste** (see also Sewage)
- Waste deposition in New York Harbor, **250**: 112-128
- Wastes, industrial, and Hudson River estuary, **250**: 169-177
- Waste water**
- discharge of, and incidence of neoplasms in marine fish, **298**: 210-224
- reused, organic contaminants in, **298**: 561-573
- Water**
- carcinogenic pollutants in, global distribution of, **298**: 80-89
- contaminants in, health implications of, **298**: 557-560
- detection of *Salmonellae* in, by immunofluorescence, **254**: 350-368
- drinking, biorefractories in, **298**: 547-556
- drinking and food-processing, public health role of FDA in, **298**: 587-592
- inorganic components in, measurement of, **298**: 31-46
- intermolecular potential for, and hydration of proteins, **303**: 2-9

- liquid, nature of, **303**: 10-19
- lung, and capillary permeability in pulmonary sarcoid-like granulomatosis, **278**: 308-320
- organic compounds in, in health effects studies, **288**: 2-19
- products of ozonation reactions in, mutagenic effects of, **298**: 124-140
- waste
and neoplasms and other diseases in marine fish, **298**: 210-224
organic contaminants in, **298**: 561-572
- Water intake, tonic control of, via thalamic taste nucleus, **290**: 124-138
- Water metabolism, effects of, on chronic alcohol ingestion, **273**: 342-350
- Water potential of arid zone, **300**: 33-39
- Water resources, problems of, in New York City metropolitan area, **250**: 178-181
- Wavelengths, radio, small-scale structure of quasars and galactic nuclei at, **262**: 428-435
- Waves, gravitational, and black holes, **262**: 275-283
- Weak interactions
contribution of β decay to understanding of, **294**: 37-51
current problems in, **294**: 58-68
five decades of, **294**: 1-102
future of, **294**: 69-73
new theories of, astrophysical implications of, **262**: 409-421
questions and answers on, **294**: 3-11
- Wegener's granulomatosis, **278**: 618-635
- Wernicke's region, location of, **280**: 834-843
- "Western heritage," **261**: 213-214
- West Indies
British
emancipation in, **292**: 123-131
food imports to, **292**: 581-590
economy and society of, Scots' role in, **292**: 94-106
slave societies in, economic analysis of, **292**: 597-609
- Wheats, semidwarf, avoidance of genetic vulnerability in, **287**: 243-254
- White dwarfs, strong magnetic fields in, **257**: 80-81
- Window, skin, macrophage reactivity in, in sarcoidosis patients, **278**: 201-203
- Winds, stellar, and possibilities for accretion, **302**: 665-668
- Wire plasmas, high-energy/density-exploded, electrical characteristics of, **251**: 632-648
- Wisconsin, drug abuse in, alcohol as primary determinant for hospitalization in, **273**: 388-394
- Wisconsin man, indications of, from southwest Canadian prairies, **288**: 119-136
- Witchcraft among Kuikuru Indians of central Brazil, **293**: 215-228
- Withdrawal of alcohol
effects of lithium on, **273**: 371-377
EKG changes after, **273**: 364-370
- Withdrawal seizures, sedative-, primidone and diphenylhydantoin in, **273**: 378-380
- Withdrawal states, interactions of narcotics, narcotic antagonists, and ethanol during, **281**: 297-310
- Withdrawal syndrome, severity of, and desire to drink, **273**: 360-363
- Women (*see also* Female entries)
middle class alcoholic, psychosocial study of, **273**: 593-604
nature of, and man's culture, **293**: 15-24
participation of, in marathon, **301**: 862-876
- Wood industry, neoplasms in workers in, **271**: 294-300
- Work and the amotivational syndrome in cannabis users in Jamaica, **282**: 24-32
- Work capacity in prepubertal children, effects of endurance training regimen on, **301**: 734-747
- Workers
exposed to asbestos
and smoking and laryngeal carcinoma, **271**: 308-310
prospective surveillance of, lung cancer and mesothelioma in, **271**: 448-456
Tyler, Texas, program for, **271**: 353-364
exposed to benzoyl chloride, cancer among, **271**: 67-70
exposed to cadmium, cancer mortality among, **271**: 273-278
exposed to chloroprene, risk of cancer in, **271**: 91-93
exposed to coke by-products, **271**: 102-115
exposed to cutting-oil mist, mortality from cancer in, **271**: 94-101
exposed to lead, cancer mortality in, **271**: 250-259
exposed to metals
and lung cancer in Japan, **271**: 269-272
cancer mortality in, **271**: 243-249
exposed to polyvinyl chloride
blood screening tests and illness history in, epidemiologic studies of, **246**: 80-87
further results in, **246**: 18-21
in Japan, bone lesions in, **242**: 78-79
liver disease in, **246**: 88-94
prevalence of disease in, **246**: 22-41
unusual splenomegalic liver disease in, **242**: 95-134
exposed to rubber, cancer mortality in, epidemiologic study of, **271**: 125-137
exposed to vinyl chloride
alterations in liver and spleen in, **246**: 172-194
angiosarcoma of liver in, **246**: 231-236
risk of neoplasms in, **271**: 4-48
surveillance of, **246**: 311-312
exposed to vinyl chloride and polyvinyl chloride

- changes in pulmonary function in, **246**: 313–319
- clinical management of, **242**: 313–319
- mortality in, **246**: 225–230
- in aluminum potrooms, sputum cytology in, **271**: 239–242
- in ceramic factory in Japan, chronic beryllium disease in, **278**: 636–653
- in fibrous glass industry, mortality patterns among, **271**: 324–335
- in nickel sinter plant, cytologic monitoring of, **271**: 365–369
- in textile industry, oral and pharyngeal cancer in, **271**: 301–307
- involvement of, in risk assessment of carcinogenesis, **271**: 410–412
- in wood and pulp industry, neoplasms in, **271**: 294–300
- Work-heat tolerance of distance runners, **301**: 139–150
- Working capacity of elite distance runners and muscle fiber composition and enzyme activities, **301**: 323–327
- cardiorespiratory aspects of, **301**: 310–322
- Workplace, environmental concerns beyond, **246**: 296–302
- World, finite, economic growth in, **261**: 73–80
- World food crisis, projections, models and paradigms of, **261**: 159–174
- World monetary order, negotiation of, **261**: 62–72
- World order
- priorities for, **261**: 261–262
 - public, and protection of environment, **261**: 81–114
- World priorities, **261**: 5–14
- assignment of, **261**: 25–31
 - education for human survival as, **261**: 115–125
 - first, population and subsistence as, **261**: 147–149
- World regions and public order, **261**: 263–264
- World structure of public order, **261**: 253–255
- Wundt, Wilhelm
- and early American psychology, **291**: 13–20
 - revisions and reappraisal of thought of, **270**: 21–30
- X**anthine oxidase in enzymatic oxidation of diethyldithiocarbamate, **273**: 212–218
- Xenobiotic metabolism
- and halogenated benzenes, **298**: 159–169
 - in marine animals, **298**: 505–521
- Xenopus laevis*
- germinal vesicle of, poly (adenosine diphosphate ribose) synthase activity stimulated by progesterone in, **286**: 398–407
 - oocytes of, induction of soluble proteins in, **286**: 421–433
- X-irradiation, effect of, on T-lymphocyte numbers and function, **256**: 342–351
- X-ray binaries
- evolutionary processes in, **302**: 14–35
 - low-mass related to non-x-ray sources, **302**: 1–5
 - masses of, and optical light curves, **262**: 376–378
 - massive evolution of, **302**: 47–54
 - OB supergiants in, **262**: 379–384
 - parameters of, **262**: 299–311
- X-ray bursters, nature of, **302**: 197–209
- X-ray bursts
- degenerate dwarf models of, **302**: 261–299
 - extended tails of, **302**: 244–247
 - sources of, **302**: 210–228
- X-ray emission processes in close binary systems, **302**: 6–13
- X-ray globular clusters, optical observations of, **302**: 248–260
- X-ray laser research, guidelines for, at Naval Research Laboratory, **267**: 3–15
- X-ray modulation of cell-mediated immunity, **256**: 342–351
- X-ray observations of neutron stars, **302**: 482–513
- X-ray patterns from microtubules, **253**: 53–59
- X-ray polarimetry of binary sources, **262**: 367–375
- X-ray results from Ariel V and Copernicus, **302**: 386–402
- X-ray signatures, time scales and spectral features of, **302**: 329–348
- X-ray sources
- astronomy of, and physics of accretion, **302**: 229–243
 - compact, recent progress in theory of, **262**: 331–360
 - cosmic, polarization of, **302**: 312–328
 - extragalactic, **262**: 361–366; **302**: 300–311
- X-ray spectrum, hard, of Her-I, cyclotron emission in, **302**: 538–544
- Y**aquina Bay oysters, proliferative disorders in, **298**: 356–373
- Yin/yang modulation of lysosomal enzyme release from polymorphonuclear leukocytes, **256**: 222–232
- Yolk sac tumor, α -fetoprotein in, **259**: 221–233
- Yoshida sarcoma and synthesis of α -fetoprotein, **259**: 74–79
- Zeitgeist, sitzfleisch*, and “hindsightgeist,” **291**: 390–394
- Ziegler-type catalysts, base effects on, **295**: 110–126
- Zirconium, organic derivatives of, photochemical studies on, **295**: 103–109
- Zone, arid, water potential of, **300**: 33–39
- Zoophytomicrobes in insects, **266**: 276–292
